**Creating and Capturing Value through Crowdsourcing** Christopher L. Tucci,Allan Afuah,Gianluigi Viscusi,2018-03-16 Examples of the value that can be created and captured through crowdsourcing go back to at least 1714 when the UK used crowdsourcing to solve the Longitude Problem obtaining a solution that would enable the UK to become the dominant maritime force of its time Today Wikipedia uses crowds to provide entries for the world s largest and free encyclopedia Partly fueled by the value that can be created and captured through crowdsourcing interest in researching the phenomenon has been remarkable Despite this or perhaps because of it research into crowdsourcing has been conducted in different research silos within the fields of management from strategy to finance to operations to information systems biology communications computer science economics political science among others In these silos crowdsourcing takes names such as broadcast search innovation tournaments crowdfunding community innovation distributed innovation collective intelligence open source crowdpower and even open innovation This book aims to assemble chapters from many of these silos since the ultimate potential of crowdsourcing research is likely to be attained only by bridging them Chapters provide a systematic overview of the research on crowdsourcing from different fields based on a more encompassing definition of the concept its difference for innovation and its value for both private and public sector

**Capturing Value in Digital Health Eco-Systems** Felix Lena Stephanie,Ravi S. Sharma,2021-11-10 The United Nations Sustainable Development Goals call for the establishment of Good Health and Well being and target a universal digital healthcare ecosystem by 2030 However existing technology infrastructure is ineffectual in achieving the envisioned target and requires massive reconfiguration to achieve its intended outcome This book suggests a way forward with fair and efficient digital health networks that provide resource efficiencies and inclusive access to those who are currently underserved Specifically a fair and efficient digital health network that provides a common platform to its key stakeholders to facilitate sharing of information with a view to promote cooperation and maximise benefits A promising platform for this critical application is cloud technology with its offer of computing as a utility and resource sharing This is an area that has attracted much scholarly attention as it is well suited to foster such a network and bring together diverse players who would otherwise remain fragmented and be unable to reap the benefits that accrue from cooperation The fundamental premise is that the notion of value in a digital health ecosystem is brought about by the sharing and exchange of digital information However notwithstanding the potential of information and communication technology to transform the healthcare industry for the better there are several barriers to its adoption the most significant one being misaligned incentives for some stakeholders This book suggests among other findings that e health in its true sense can become fair and efficient if and only

if a regulatory body concerned assumes responsibility as the custodian of its citizens health information so that collaboration for value will replace competition for revenue as the new axiom in delivering the public good of healthcare through digital networks

Thrive is about unpacking the drivers that I have noticed in the landscape that do not yet have a place in our existing vocabulary. It is about ceasing to ignore the signs and beginning to embrace the changes that are becoming more tangible with every day that passes. It is about recognizing the amplified importance of the human as a social being in this dawning age of transparency and systemic activity. The individual becomes the collective as we move into a sphere of shared value creation, ideation and knowledge dissemination. Existing in this new business landscape is not about eliminating the competition but rather working together in a bid to share resources and expand far beyond what we could ever hope to achieve as individual organizations. Through *Built to Thrive*, I hope to open your mind and introduce you to a way of thinking that will fundamentally shift your views and may provide a lifeline in a world where the new school will rule. **ECIE 2023 18th European Conference on Innovation and Entrepreneurship Vol 2** Fernando Moreira, Shital Jayantilal, 2023-09-21

Research Anthology on Business Continuity and Navigating Times of Crisis Management Association, Information Resources, 2022-01-07. When the COVID 19 pandemic caused a halt in global society, many business leaders found themselves unprepared for the unprecedented change that swept across industry. Whether the need to shift to remote work or the inability to safely conduct business during a global pandemic, many businesses struggled in the transition to the new normal. In the wake of the pandemic, these struggles have created opportunities to study how businesses navigate these times of crisis. The *Research Anthology on Business Continuity and Navigating Times of Crisis* discusses the strategies, cases and research surrounding business continuity throughout crises such as pandemics. This book analyzes business operations and the state of the economy during times of crisis and the leadership involved in recovery. Covering topics such as crisis management, entrepreneurship and business sustainability, this four-volume comprehensive major reference work is a valuable resource for managers, CEOs, business leaders, entrepreneurs, professors and students of higher education, researchers and academicians. Examining the Intersection of Circular Economy, Forestry, and International Trade Gopalakrishnan, Badri Narayanan, Duggal, Taranjeet, Tewary, Tavishi, 2021-01-22. Sustainable development has always been a contested concept and has been extensively debated over the last 30 years with new classifications arising since then. There was a previous push for the radical transformations of the market economy to downscale production and consumption that would increase human well-being and enhance ecological conditions. Because of

this conflict there was a need for a new model that challenges and could be the alternative for the linear economy this new model is called the circular economy A circular economy aimed at eliminating waste and the continual use of resources It gained its ground in the era of disruptive technological advancement and a dynamic global value chain By supporting resource efficient industrial models the circular economy preserves and improves natural capital optimizes the value of resources and abolishes negative environmental externalities such as pollution Examining the Intersection of Circular Economy Forestry and International Trade explores the link between the circular economy and various aspects of the business and environment to understand the usage and viability of adapting the circular economy from a business perspective The chapters highlight the transition to the circular economy its implementation across society its intersection with forestry and international trade and the solutions and challenges of the circular economy This book is aimed at researchers in the field of business management economics and environmental studies along with practitioners stakeholders researchers academicians and students looking for more information on the various fields impacting the circular economy as well as the implementation usage and viability of a widespread adoption of a circular economy *Business Modeling and Software Design* Boris Shishkov, 2014-05-09 This book contains the extended and revised versions of selected papers from the Third International Symposium on Business Modeling and Software Design BMSD 2013 held in Noordwijkerhout The Netherlands during July 8 10 2013 The symposium was organized and sponsored by the Interdisciplinary Institute for Collaboration and Research on Enterprise Systems and Technology IICREST in cooperation with the Dutch Research School for Information and Knowledge Systems SIKS the Center for Telematics and Information Technology CTIT Aristotle University of Thessaloniki AUTH and AMAKOTA Ltd The theme of BMSD 2013 was Enterprise Engineering and Software Generation The 13 full and 20 short papers presented at BMSD 2013 were selected from 56 submissions The eight papers published in this book were carefully reviewed and selected from the 13 full papers The selection includes papers touching upon a large number of research topics ranging from more conceptual ones such as modeling landscapes process modeling declarative business rules and normalized systems to more practical ones such as business case development and performance indicators and from more business related topics such as value modeling and service systems to topics related to information architectures *Networked Business Models in the Circular Economy* Nogalski, Bogdan, Szpitter, Agnieszka Anna, Jabłoński, Adam, Jabłoński, Marek, 2019-09-27 Economic changes in a globalized world require businesses to create new management practices to remain competitive and successful While a network paradigm is a key management development the effective application of this paradigm in organizational practice is complicated by differing interpretations and approaches Therefore it is important to thoroughly understand the applicable factors and mechanisms to an efficacious business network Networked Business Models in the Circular Economy provides innovative insights into achieving synergy through the cooperation of many business partners and organizations and adapting operational strategies for the whole

network While highlighting topics such as smart mobility digital solutions and green supply chain this publication is ideally designed for organizational managers entrepreneurs economists management scientists business analyzers financial consultants researchers and students seeking current research on the dynamical contributions required to achieve mutual growth
