March, 2012-04-01 The thin ribbon of the Carmel River is just thirty six miles long and no wider in most places than a child can throw a stone It is the primary water supply for the ever burgeoning presence of tourists agriculture and industry on California s Monterey Peninsula It is also one of the top ten endangered rivers in North America The river s story which dramatically unfolds in this book is an epic tale of exploitation development and often unwitting degradation reaching back to the first appearance of Europeans on the pristine peninsula River in Ruin is a precise weaving of water history local and larger and a natural social and environmental narrative of the Carmel River Ray A March traces the river s misuse from 1879 and details how ever more successful promotions of Monterey demanded more and more water leading to one dam after another As a result the river was disastrously depleted cluttered with concrete rubble and inhospitable to the fish prized by visitors and residents alike March s book is a cautionary tale about squandering precious water resources about the ultimate cost of a ruined river and the slim but urgent hope of bringing it back to life

California Cottage Style Ann Zimmerman, Scot Zimmerman, 2005 The Zimmermans whose work has appeared in a number of architecture and design books and periodicals show the array of styles that make up California cottages Each home is depicted in numerous photographs Library Journal California cottages are famed for their openness and creatively designed interiors and this magnificent tribute brilliantly showcases the variety of styles that belong to the tradition Splendid photographs taken by a prominent architectural photographer present Pioneer Queen Anne Spanish Colonial Revival Craftsman and Tudor revival homes some designed by major figures such as Frank Lloyd Wright Take a look at the examples and see exactly what makes cottages different from other houses and how to make the most of their beauty Each one will inspire fresh ideas for decorating in small spaces and gracing every square foot with lovely details **Reworking Class** John R. Hall, 2018-09-05 The twelve essays in this volume propose new directions in the analysis of class John R Hall argues that recent historical and intellectual developments require reworking basic assumptions about classes and their dynamics The contributors effectively abandon the notion of a transcendent class struggle They seek instead to understand the historically contingent ways in which economic interests are pursued under institutionally socially and culturally structured circumstances In his introduction Hall proposes a neo Weberian venue intended to bring the most promising contemporary approaches to class analysis into productive exchange with one another Some of the chapters that follow rework how classes are conceptualized Others offer historical and sociological reflections on questions of class identity A third cluster focuses on the politics of class mobilizations and social movements in contexts of national and global economic change Storied Land John Walton, 2001-10-01 Storied Land is not only an important record of events it is also a powerful and innovative investigation of how historical narratives are produced Walton looks at how Franciscan missionaries and military governors created competing historical narratives of civilizing the Native American population He explores changing historical conditions that generate successive narratives of Yankee progress Spanish romance and working class Cannery Row Today the nostalgic story of early California competes with political activists conceptions of environmental protection and ethnic diversity Walton uses these historical examples to examine the larger issues of collective memory arguing that history is a product of the interplay of events and narratives *California Coast & Ocean*, 1998 *Topophilia and Topophobia* Xing Ruan, Paul Hogben, 2020-10-28 This book is about the love and hate relations that humans establish with their habitat which have been coined by discerning modern thinkers as topophilia and topophobia Whilst such affiliations with the topos our manmade as well as natural habitat have been traced back to antiquity a wide range of twentieth century cases are studied here and reflected upon by dwelling on this framework The book provides a timely reminder that the qualitative aspects of the topos sensual as well as intellectual should not be disregarded in the face of rapid technological development and the mass of building that has occurred since the turn of the millennium Topophilia and Topophobia offers speculative and historical reflections on the human habitat of the century that has just passed authored by some of the world's leading
