Basic Malaria Microscopy World Health Organization, 2010 Includes questionnaire for evaluation of training in volume 2

Malaria Microscopy Quality Assurance Manual World Health Organization, 2009 Early diagnosis and prompt effective treatment is the basis for the management of malaria and key to reducing malaria mortality and morbidity An acceptable microscopy service is one that is cost effective provides results that are consistently accurate and timely enough to have a direct impact on treatment This requires a comprehensive and active quality assurance QA program This manual outlines a hierarchical structure based on retraining validation and the development of competency standards designed to ensure the quality of diagnosis necessary for a successful malaria program while remaining within the financial and personnel resources likely to be available The mode of implementation of the QA system outlined in this manual will vary according to the organization of the national laboratory services dealing with malaria which may fall under the national malaria control program or under a separate laboratory structure working closely with the malaria program

Malaria Microscopy Quality Assurance Manual - Version 2 World Health Organization, 2016-04-05 The first version of the WHO Malaria microscopy quality assurance manual 2009 was based on recommendations made at a series of informal consultations organized by WHO particularly a bi regional meeting of the WHO regional offices for South East Asia and the Western Pacific in April 2005 in Kuala Lumpur Malaysia followed by informal consultations held in March 2006 and February 2008 in Geneva Switzerland Subsequently extensive consultations among international malaria experts led to consensus and preparation of the manual This second version of the Manual is based on the recommendations of experts made at a WHO technical consultation in March 2014 in Geneva Switzerland The aim of the meeting was to review the experiences of national malaria control programmes NMCPs national reference laboratories NRLs and technical agencies in using the Manual and country experience in order to improve systems for managing the quality of malaria microscopy This second version takes into account the many years of experience of several agencies in the various aspects of quality assurance QA described in the Manual In particular the sections on assessment of competence in malaria microscopy are based on use of this method by the WHO regional offices for South East Asia and the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria in Australia and by the WHO Regional Office for Africa in collaboration with Amref Health Africa The section on setting up and managing an international reference malaria slide bank is based on the work of the WHO Regional Office for the Western Pacific in collaboration with the WHO Coordinating Centre for Malaria Diagnosis in the Philippines The section on proficiency testing for malaria microscopy is based on work in the WHO Regional Office for Africa in collaboration with the National Institute for Communicable Diseases in South Africa and experience in regional initiatives by Amref Health Africa The section on slide validation is based on work by M decins sans Fronti res and the section on outreach training and supportive supervision OTSS is based on work by the President s Malaria Initiative Malaria Care Project Medical Care

Development International and Amref Health Africa The Manual is designed primarily to assist managers of NMCPs and general laboratory services responsible for malaria control The information is also applicable to nongovernmental organizations NGOs and funding agencies involved in improving quality management systems for malaria microscopy The Manual is not designed for QA of microscopy in research situations such as in clinical trials of new drugs and vaccines or for monitoring parasite drug resistance It forms part of a series of WHO documents designed to assist countries in improving the quality of malaria diagnosis in clinical settings including the revised training manuals on Basic malaria microscopy 2010 and the Bench aids for malaria microscopy 2010 District Laboratory Practice in Tropical Countries, Part 1 Monica Cheesbrough, 2005-09-08 This new edition includes an update on HIV disease AIDS recently developed HIV rapid tests to diagnose HIV infection and screen donor blood and current information on antiretroviral drugs and the laboratory monitoring of antiretroviral therapy Information on the epidemiology and laboratory investigation of other pathogens has also been brought up to date Several new rapid simple to perform immunochromatographic tests to assist in the diagnosis of infectious diseases are described including those for brucellosis cholera dengue leptospirosis syphilis and hepatitis Recently developed IgM antibody tests to investigate typhoid fever are also described The new classification of salmonellae has been introduced Details of manufacturers and suppliers now include website information and e mail addresses The haematology and blood transfusion chapters have been updated including a review of haemoglobin measurement methods in consideration of the high prevalence of anaemia in developing countries The volume is packed with much valuable information which is presented in a format that is readily readable There are ample clear illustrations tables and photographs to render the various information easy to digest The authors have succeeded in producing a work that will fulfil an important need for developing countries I highly recommend this book with its Part I counterpart to anyone with an interest in the practice of laboratory medicine Pathology District Laboratory Practice in Tropical Countries sets the gold standard and is an essential read and reference for anyone engaged in clinical laboratory practice in the tropics Tropical Doctor Book jacket **Basic Malaria Microscopy**, 2010 **New Standards in Laboratory Diagnosis of Malaria** Caroline Amuche Okoli, 2024-12-23 This book is a well researched text covering laboratory and diagnostic procedures in malariology It was born out of several years of laboratory practice in some of the best laboratories in Nigeria The detailed manner in which the author has handled each aspect of the book depicts a meticulous attention to detail hardly seen in most texts on the subject There cannot be many texts of equal measure of attention on malariology It is highly recommended to both laboratory science practitioners biomedical and medical students alike **Basic Malaria Microscopy**, 1991 Handbook of Deep Learning Applications Valentina Emilia Balas, Sanjiban Sekhar Roy, Dharmendra Sharma, Pijush Samui, 2019-02-25 This book presents a broad range of deep learning applications related to vision natural language processing gene expression arbitrary object recognition driverless cars semantic image segmentation deep visual residual abstraction brain computer interfaces big data processing

hierarchical deep learning networks as game playing artefacts using regret matching and building GPU accelerated deep learning frameworks Deep learning an advanced level of machine learning technique that combines class of learning algorithms with the use of many layers of nonlinear units has gained considerable attention in recent times Unlike other books on the market this volume addresses the challenges of deep learning implementation computation time and the complexity of reasoning and modeling different type of data As such it is a valuable and comprehensive resource for engineers researchers graduate students and Ph D scholars

Malaria ,1996-12 Explains the many simple things that community health workers can do to treat malaria prevent new cases and thus help reduce the alarming number of deaths particularly in young children and pregnant women Practical in its approach the manual concentrates on activities that are within the competence of health workers and feasible and affordable at the community level Information ranges from a basic explanation of the disease and its transmission to tables illustrating correct treatment schedules for different age groups The manual which is abundantly illustrated can be used in training courses as a support to the health worker s day to day activities or as a tool for health education in the community The main purpose is to communicate basic facts and messages that if widely understood within a community could do much to reduce the incidence and severity of malaria Chloroquine is presented as the first line treatment The manual has three parts The first explains what community health workers can do to control malaria and lists the essential medicines and equipment needed Part two introduces basic facts about malaria and the behaviour of mosquitos and elaborates three main approaches to malaria prevention in communities The third and most extensive part sets out step by step instructions for the recognition and treatment of malaria giving particular attention to standard malaria treatment schedules measures for ensuring compliance what to do when standard treatment fails and how to recognize treat and refer severe cases The management of malaria in young children and pregnant women also receives special attention
