Basic Mechanism of Light Polarization in Cosmic Media Ю.Н. Гнедин, Yu N. Gnedin, N. A. Silantev, 1997

The Century of Space Science J.A. Bleeker, Johannes Geiss, M. Huber, 2012-12-06 One of the most attractive features of the young discipline of Space Science is that many of the original pioneers and key players involved are still available to describe their field. Hence at this point in history we are in a unique position to gain first hand insight into the field and its development. To this end *The Century of Space Science* a scholarly authoritative reference book presents a chapter by chapter retrospective of space science as studied in the 20th century. The level is academic and focuses on key discoveries, how these were arrived at, their scientific consequences and how these discoveries advanced the thoughts of the key players involved. With over 90 world class contributors such as James Van Allen, Cornelis de Jager, Eugene Parker, Reimar Lüst and Ernst Stuhlinger and with a Foreword by Lodewijk Woltjer, past ESO Director General, this book will be immensely useful to readers in the fields of space science, astronomy and the history of science. Both academic institutions and researchers will find that this major reference work makes an invaluable addition to their collection. *Literature 1988, Part 1* U. Esser, H. Hefele, Inge Heinrich, W. Hofmann, D. Krahn, V. R. Matas, Dr. Lutz D. Schmadel, G. Zech, 2013-11-11 From the reviews *Astronomy and Astrophysics Abstracts* has appeared in semi annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy, astrophysics and neighbouring sciences. It is the most important English language abstracting journal in the mentioned branches. The abstracts are classified under more than a hundred subject categories, thus permitting a quick survey of the whole extended material. The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences. As such it represents a necessary ingredient of any astronomical library all over the world. *Space Science Reviews* 1 Dividing the whole field plus related subjects into 108 categories, each work is numbered and most are accompanied by brief abstracts. Fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back, making the catalogues easy to use. The series appears to be so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes. *The Observatory Magazine* 2 *Literature 1987, Part 1* S. Böhme, U. Esser, H. Hefele, I. Heinrich, W. Hofmann, D. Krahn, V. R. Matas, L. D. Schmadel, G. Zech, 2013-11-11 *Astronomy and Astrophysics Abstracts* aims to present a comprehensive documentation of the literature concerning all aspects of astronomy, astrophysics and their border fields. It is devoted to the recording, summarizing and indexing of the relevant publications throughout the world. *Astronomy and Astrophysics Abstracts* is prepared by a special department of the Astronomisches Rechen Institut under the auspices of the International Astronomical Union. Volume 43 records literature published in 1987 and received before August 15 1987. Some older documents which we received late and which are not surveyed in earlier volumes are included too.
