level students in a class in basics and then to train the medium level and upper level students along with the trained lower levels in a different manner than the conventional music theory training does so that even the higher levels will reconsider their knowledge on the facts which will allow them go in the details deeper and even inspire the way think music and musical analysis Analysis is expected to be a quiet easy skill that student uses in a fluent way The book provides exercises at the end of every chapter The study of these exercises should be sufficient for a basic level learning The exercises usually cover more than one aspect of a goal in separate questions Among the other powerful features of this book we can mention the chapters on musical design The music student usually learns only one dimension of identification of chords in music which lacks of concerning the textural differences We find it essential to mention main textural differences and demonstrate how to approach them in order to make a good analysis at the beginner level We think the basic music theory training should include such an unpronounced aspect of analysis We also explain the effect of instrumental choice in the work and what to expect to see as well as how to approach different setups for analysis by demonstrations including orchestral writing

technique must not be averted To better facilitate the learning of music theory and chord construction it is extremely important to have at least a basic understanding of the keyboard One need not master the keyboard but understanding its rudimentary construction makes understanding scales and chord structures easier and thus learning the guitar easier Because students are better motivated if they learn songs early in their musical education several songs are interspersed throughout the various lessons with a rather large selection of songs in various genres and formats Beyond guitar chords and scales the student receives lessons in basic music theory the theory of chord construction tablature notation playing by ear finger picking double stops songwriting technique and more
