Basic Business Statistics Dean P. Foster, Robert A. Stine, Richard P. Waterman, 2001-06-27 Preface Statistics is seldom the most eagerly anticipated course of a business student It typically has the reputation of being a boring complicated and confusing mix of mathematical formulas and computers Our goal in writing this casebook and the companion volume Business Analysis Using Regression was to change that impression by showing how statistics yields insights and answers interesting business questions Rather than dwell on underlying formulas we show how to use statistics to answer questions Each case study begins with a business question and concludes with an answer to that question Formulas appear only as needed to address the questions and we focus on the insights into the problem provided by the mathematics The mathematics serves a purpose The material in this casebook is organized into 11 classes of related case studies that develop a single key idea of statistics The analysis of data using statistics is seldom very straightforward and each analysis has many nuances Part of the appeal of statistics is this richness this blending of substantive theories and mathematics For newcomers however this blend is too rich and they are easily overwhelmed and unable to sort out the important ideas from nuances Although later cases in these notes suggest this complexity we do not begin that way

A Handbook in Business Management Jacob W. Chikuhwa,2013-05-01 Present day enterprises need insights into markets customers and their own internal processes faster than their competitors to capitalise on opportunities and to deliver sustainable business performance To do this businesses must learn to cope with the high volume and velocity of real time structured and unstructured data in different formats In covering the fields of manpower development accounting procedures and data processing a middle of the road analysis has been made to include those overlapping developments in business studies Disciplines like accountancy and electronic data processing frequently have unavoidable use in commerce and industry A Handbook in Business Management examines organisation and manpower management and reflects on their significant role in the arena of business management The objective with manpower management is to distribute personnel to activities where their talents are required and are best utilised In financial control the book examines both the technical and managerial approaches The technical approach is concerned with measurement where an analysis is made as to whether resources are being assigned to the right categories and whether generally accepted accounting principles are being

followed And the managerial approach is to understand and interpret what the financial figures mean Critically all managers should take responsibility for financial management and should not assume that this falls within the remit of the accounts team alone Under data processing concepts the book takes an overview of the availability continuity and security of data in public and private concerns An efficient data processing system makes it possible to adjust the financial situation of a business before it gets out of hand by adjusting income distribution and combating organisation and manpower inefficiency This book offers to the professional student and corporate executive a preliminary survey of the fields of manpower development accountancy and electronic data processing while the start up entrepreneur may find in its pages something to stimulate reflection upon those larger issues in business management

Business Management (A Brief Exposé) Jacob W. Chikuhwa,2013-09-12 The links between manpower management financial control and information management systems are clearly defined in Business Management A Brief Expos where an analysis of budgeting for manpower needed for production and marketing basic steps in accounting procedures and stages in data processing are expounded It is realised that whereas the factory processes raw materials and produces goods for sale a data processing department processes basic data and produces basic business documents and control information for management to keep them informed of events within the business This enables them to coordinate different activities of the organisation s functional groups and to control the day to day transactions and be in a position to take whatever corrective action is necessary to achieve the objectives of the particular business Furthermore an efficient data processing system makes it possible to adjust the situation before it goes out of hand by adjusting income distribution and combating organisation inefficiency With carefully structured data processing systems a general method can be established for decision making or policy making in individual cases of manpower recruitment and development investment projects and income distribution A brief description of the complexities of economic and business affairs may be necessarily misleading but I hope that this booklet is not more misleading than the average of such materials It is an attempt to explain the immense complexity of the real world by logical theories which provide the student with worthwhile intellectual exercise and excitement Business Management A Brief Expos offers to the professional student the start up entrepreneur the small and medium size businessman and the business executive a preliminary survey of the fields of manpower development accountancy and electronic data processing The wider public whose enlightened interest is the mainspring of social progress may I hope find in its pages something to stimulate reflection upon those larger issues which must be determined if at all by the consensus of their opinion The purpose of this booklet is to give the reader an insight into the way organisations emerge and grow and the relationships between manpower management financial management and management information systems In particular Business Management A Brief Expos will be of help to the busy Chief Executive Officer who hardly has time to read through different volumes associated with

manpower management financial control and computerised management information systems Nevertheless more reading and details may be found in A Handbook in Business Management by the same author Jacob Wilson Chikuhwa has also published a number of books on Zimbabwe s socio economic developments Business ,2003 **EBOOK:**
Quantitative Methods for Business and Management Frank Dewhurst,2006-03-16 The new edition of Quantitative Methods for Business and Management offers a complete introductory course in Quantitative Methods providing students with basic practical experience in quantitative approaches in modelling and analysis for business and management The book features sections on foundation topics models for business and management and modelling and analyzing decisions In particular the new edition features greater coverage of statistics to reflect teaching in this area with chapters on Elementary Statistics Summary Statistics and Inferential Statistics Other new areas of coverage in the second edition include Network Models and Non linear Models The book retains its popular style which offers students numerous examples accompanied by clear and straightforward explanations Excel examples are also integrated throughout to help students to understand how this software tool is used by managers and frequent questions and exercises enable students to test their understanding A free CD contains Excel applications and solutions to the exercises in the textbook and a full online learning centre completes an excellent learning package for business students
