Hayes,Chantal de Jonge Oudraat,1999 The concept of a middle ground between simple peace enforcement and traditional peacekeeping by lightly armed observers has been both ill defined and controversial But the authors of this thoughtful yet challenging volume make a strong case for both the

practicability and the desirability of such operations Coercive inducement the term was suggested by Kofi Annan when he was undersecretary general for peacekeeping is a form of coercive diplomacy that relies more on the deployment and demonstration of military force than on the use of force per se In the absence of such an option the international community finds it hard to respond to a variety of crises including ones that can spiral into genocide After first laying out general principles the book explores four recent UN operations in Somalia Rwanda Bosnia and Haiti in which coercive inducement was particularly relevant and then presents operational guidelines for its use Clear sighted and pragmatic throughout the authors conclude by suggesting when and to what extent the international community should commit itself to undertake coercive inducement **Department of State Publication** ,1985 **American Foreign Policy, Current Documents** ,1987 **Coastal State Jurisdiction over Ships in Need of Assistance, Maritime Casualties and Shipwrecks** Iva Parlov,2022-08-01 In Coastal State Jurisdiction over Ships in Need of Assistance Maritime Casualties and Shipwrecks Iva Parlov offers a comprehensive analysis of the rights and obligations of coastal States over ships in need of assistance maritime casualties and shipwrecks under international customary law treaty law and other international instruments Important regime interactions are discussed in depth most extensively the interaction between the 1982 United Nations Convention on the Law of the Sea and regulations adopted at the International Maritime Organization but also between conventional and customary law public and private law In contrast to the existing literature that mostly focuses on separate issues such as intervention places of refuge salvage and wreck removal this book takes a systemic approach to consider from the coastal State s perspective jurisdictional problems at each stage of a maritime occurrence deteriorating into a maritime casualty and ultimately into a wreck Particular attention is given to legal differences associated with maritime zones and the physical state of a ship Adding a temporal scale to the analysis the book provides an insight into the legal developments since the Torrey Canyon 1967 disaster and offers some reflections on the directions in which the tide is flowing not least in light of the recent European Union s proposal for amendments of the IMO Guidelines on Places of Refuge *International Migration Law* Richard Plender,1988-04-05 13 The expulsion of aliens **Basic Documents of Asian Regional Organizations** Michael Haas,1974
