remains unclear how the success or failure of these sanctions is measured This book examines the seldom explored United Nations economic sanctions deliberation process and exposes systematic problems in the measurement of the success or failure of these sanctions Centering on the key concepts of peace and security the author brings the reader's attention to the discrepancies that exist in the process of decision making implementation and evaluation of UN imposed economic sanctions She engages international law and development methods to provide proof for the lack of consensus in measures of success and failure which in turn suggests that sanction implementation on a uniform domestic front are unattainable This thorough analysis concludes with suggestions for improving the sanctions process only to clear the path for negating them as a whole and suggest alternative non coercive measures for mitigating conflict situations and threats to peace and security *Green Web-II* Medani P. In dealing with the IUCN one must bear in mind that there never has been and undoubtedly never will be any other organization even remotely resembling it Its peculiarities subtleties and complexities are sometimes mind boggling Nicholson 1990 in Holdgate 1999 ix *Green Web II* investigates IUCN's role in global biodiversity conservation policy as well as in national program development in India Pakistan Nepal and Bangladesh It explores how nature protection priorities and approaches are promoted or addressed by IUCN an international organization and how environment conservation policies are created and maintained in states with different capacities of South Asia It also evaluates IUCN's competency in bio diversity climate change nature conservation and environmental policy formulation at global regional and country level This study is the first detailed scholarly study on the IUCN as an organization as well as on its efforts in biodiversity conservation This book adds to our knowledge firstly by contributing to a small but growing body of work on the sociology of international organizations IOs especially International Governmental Organizations IGOs have long been the subject of mostly political science Secondly it applies a fuller sociological imagination to the study of IOs by critically exploring one of the largest and most active nature conservation organizations in the world Thirdly it also explores how the IUCN actually goes about building protectoral programs with individual member nations Additionally the book explores the recent development of the green economy GE concepts into IUCN's program planning today The green economy initiative applies a people first approach Although the concept is relatively new this research explores the theoretical development of a green economy and illustrates how this theory is applied in IUCN's program planning to program implementation

The United Nations and the Rationale for Collective Intelligence Bassey Ekpe, 2009 Taking as its central argument the question of whether an intelligence system is both desirable and feasible within the UN structure this study explores the complex and sometimes irreconcilable issues of strategic intelligence in a sharing context This study further identifies and develops both conceptual and empirical framework for a viable intelligence capability in multi agency institutions exploring and suggesting for the first time necessary and acceptable conditions for collective intelligence in an environment characterised by conflicting objectives among international actors It takes as its main premise the view that the

United Nations and the world of intelligence are two separate and contradicting entities that conflict in both principles and operating doctrines. From this point of view, the author explores the many theoretical imperatives which set the two institutions apart and stand in the way of understanding the concepts. He also goes further to examine the contexts in which the contradictions could be harmonised. This book is one of a handful of studies; it is highly original in that it focuses on the relationship between intelligence and the United Nations. While previous efforts to examine the subject have approached it from a strictly practical point of view, this work is clearly focused on the linkages between theory and practice. The methodology is thoughtful and broad in scope, and the work is theoretically well informed and sophisticated in its analysis of the subject matter. The discussion of aspects of the theory of international relations, specifically those relevant to the role of international governance and the examination of the working of the UN and several case studies of the UN in action, are further characteristics of the rigor and clarity in which the author approaches the study in an intelligent and illuminating manner. While the book's many contributions can be found at various levels of originality, its thorough assessment of the linkage between theory and policy stands out perhaps as the most important and primary contribution to the areas of collective intelligence and international relations. Other important contributions include the case study analyses and specification of criteria for evaluating collective security intelligence mechanisms. In essence, a lack of scholarly efforts to ground the notion of collective intelligence within a rigorous intellectual framework is a significant vacuum in the study of intelligence, which the present study has filled. Scholars working within the international relations discipline and more specifically issues of global governance and security will find this study invaluable. The book should also appeal to many categories of readers working in information and policy environment as well as governmental and non-governmental organisations.

*Government and the Economy* Jan-Erik Lane, Svante O. Ersson, 2002-01-01. Globalization is a common theme in the discourse of post industrial society, yet it is a process that is ill understood. Is it basically a technological phenomenon or does its immense impulse derive from economic factors? Should it be regulated by government and at what level? Questions such as these are debated continuously in the mass media, yet there are no simple answers available, as globalization is not only an amorphous but also a contested phenomenon. *Government and the Economy* is a completely reworked edition of Jan Erik Lane and Svante Ersson's popular text *Comparative Political Economy*, which the authors have updated for the twenty first century. They present a profound analysis of how globalization changes the boundaries between state and market, public and private, and government and society. When the state retreats and markets expand, what are the major outcomes? And what is driving this process of redefining the roles of government and the tasks of society? The book offers a penetrating survey of the differences between the countries of the world in terms of their economy and polity, and a forceful critique of the prevailing models in political economy. Lane and Ersson look closely at Public Choice theories which emphasize the role of markets in accomplishing efficient solutions to human interaction, while modeling governments as enhancing state failure.

They argue that such accounts are misguided The need for government in the global market economy is as strong as it is in relation to the domestic economy They go on to suggest that the most efficient and equitable means of strengthening government in the global market place without creating one world government is the reform and empowerment of IGOs
