Basic Human Needs A Framework For Action:

Basic Human Needs John McHale, Magda Cordell McHale, 1978 **UNEP Annual Review, 1978** United Nations Environment Programme, 1980 **Encyclopedia of Social Work**, 1965 **Resources in Education**, 1981 From Marshall Plan to Debt Crisis Robert Everett Wood, 1986-01-01 **Development Issues of Our Time** Rameshwar Prasad Misra, 1985 **Regional Planning** R.P. Misra, 1992 Papers presented at the All India Seminar on Regional Development and Planning held at Mysore during 9-11 October 1967 *Global Health Leadership and Management* William H. Foege, Nils M.P. Daulaire, Robert E. Black, Clarence E. Pearson, 2005-05-06 Written by an international panel of distinguished global health experts this book distills valuable lessons from a wide variety of successful health programs that have been implemented around the world *Global Health Leadership and Management* gives practical suggestions for enhancing and developing the essential skills of leadership management communication and project planning for health care leaders The book will assist health leaders to work well within their communities and effectively plan direct implement and evaluate effective programs and activities *Global Health Leadership and Management* outlines and describes such core competencies as Identifying challenges and developing and managing policy Developing strategies pathways and solutions Creating networks and partnerships and planning for change Learning from experience to build a generation of leaders Leading and managing teams by recognizing and celebrating success From Marshall Plan to Debt Crisis Robert E. Wood, 2024-07-26 This book traces the evolution of concessional financing to Third World countries from its postwar origins in the Marshall Plan to the debt crisis that engulfed virtually the entire Third World in the early 1980s It documents the evolution of a system of aid provision of structured access to concessional external financing The central focus is on how this structure of access to aid has changed over time and shaped development options and choices in the Third World From this perspective the emergence of the debt crisis is closely connected to the role of aid in the world economy Although the debt crisis had other roots as well this book elucidates an important set of determinants generally overlooked within the systems of aid provision itself It further seeks to show that the debt crisis defines a new era not simply a set of discrete and extraordinary events between say Mexico's request for rescheduling in August 1982 and Argentina's coming to terms with the International Monetary Fund in September 1984 The debt crisis has profoundly altered the international environment that Third World countries face and the legacy of debt will continue to be a central focus of international relations and development choices for years to come This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1987 *The New Critique of Ideology* Ricardo Camargo, 2016-02-05 This book offers a new ideology critique for political analysis by revisiting Habermas via a Hegelian reading The book includes an application of

the theory to the case of the political consensus reached in Chile's post Pinochet

Spirituality and Ethics in Management Laszlo Zsolnai, 2011-04-20 The book which was originally published by Kluwer in 2004 is a collection of scholarly papers focusing on the role of spirituality and ethics in renewing the contemporary management praxis. The basic argument is that a more inclusive, holistic and peaceful approach to management is needed if business and political leaders are to uplift the environmentally degrading and socially disintegrating world of our age. The book uses diverse value perspectives: Hindu, Catholic, Buddhist and Humanist, and a variety of disciplines: philosophy, ethics, management studies, psychology and organizational sciences to extend traditional reflections on corporate purpose and focuses on a self-referential organizational existential search for meaning, identity and success.

Buddhism and Peace Chanju Mun, 2006 *Buddhism and Peace: Theory and Practice* is among the most comprehensive books on this topic to date. Of the seven international seminars on Buddhism and Leadership for Peace which have gained worldwide reputation in leading discussions on Buddhism and peace, the seventh seminar was the most successful. Thirty-one eminent scholars and activists among the more than forty participants presented papers on Buddhism and peace from the varying perspectives of their expertise. The two major Buddhist traditions, the Theravada and the Mahayana, are equally represented in this book. Likewise, a balance is struck in this book in terms of the number of articles dealing with theory and those concentrating on practice. The result is a collection of essential readings on the application of Buddhist wisdom for peace activists, scholars of religion, social scientists and others in these troubled times. Buddhists and non-Buddhists alike.

The Synergism Hypothesis Peter A. Corning, 1983 This book represents a major theoretical synthesis between the life sciences and the social sciences. Peter Corning shows that the selective advantages arising from various kinds of cooperation, from single-celled creatures to wolf packs to modern nation states, are the cause of the directional aspect of evolutionary history: that is, the progressive emergence of more complex hierarchically organized systems in the biological, cultural and political realms. The Synergism Hypothesis spans a vast intellectual and scientific territory and speaks to the central concerns of evolutionary biology, sociobiology, anthropology, psychology, economics, sociology and political science. It is an extraordinary contribution which should influence all future discussions of why we behave the way we do. From back cover. **A**

LCA and Consumption/Needs-Based GHG Accounting for Climate Action Kwi-Gon Kim, 2025-02-06 This book reveals causes of the GHG emission accounting practice failure over the last several decades, describes evolution of new tenets of the accounting and remaining tasks, and suggests a new comprehensive integrated accounting in the form of protocol. The latest Intergovernmental Panel on Climate Change (IPCC) assessment report calls for net zero CO₂ emissions by 2050 to limit warming to 1.5 degree C. As a result, many countries, cities and industries are putting forward their greenhouse gas (GHG) emission reduction actions and commitments. But can the countries, cities and

industries meet these ambitious decarbonization goals without a reliable GHG inventory This book tries to answer this question It has been argued that there is a need to include LCA and consumption needs based GHG emissions as a complimentary indicator to the current approach of production based GHG accounting emissions As a shifting of the focus of accounting system after the Paris Agreement consumption needs based approach is newly focused on a more broader accounting approach for NDCs and LDCs with a vision of all of society approach Traditional national inventory approach to GHG emission accounting has been severely criticized as being too production process oriented sector based approach less transparent a lack of public participation no considerations for human needs and human factors *Nature and Resources*
