Basic Programs For Chemical Engineers:

Basic Programs for Chemical Engineers D. Wright, 2011-10-06 The microcomputer has put a vast amount of computational power in the hands of the practicing chemical engineer. However, a microcomputer is of little use unless there are programs available to solve chemical engineering problems. In this book, I have put together a collection of BASIC programs that will help the practicing engineer be more productive and able to solve complex problems that are normally handled on mainframe computers. The plant engineer will find the book particularly useful. The plant engineer is called upon to investigate problems that range from simple troubleshooting to the detailed design of complex chemical plants. The larger projects are usually add-on jobs to the regular duties of keeping a chemical plant running. In today's business climate, answers to problems must be obtained quickly and accurately. The computer is capable of testing hypothesis, thereby allowing engineers to evaluate alternative solutions to problems quickly and provide answers to management's questions that invariably shift like the sand in a desert. *Basic Programs for Chemical Engineers* D. Engineers D. Wright, 1986-07-31 *Handbook of Fluidization and Fluid-Particle Systems* Wen-Ching Yang, 2003-03-19 This reference details particle characterization, dynamics, manufacturing, handling, and processing for the employment of multiphase reactors, as well as procedures in reactor scale-up and design for applications in the chemical, mineral, petroleum, power, cement, and pharmaceuticals industries. The authors discuss flow through fixed beds, elutriation, and entrainment; gas distributor and plenum design in fluidized beds; effect of internal tubes and baffles; general approaches to reactor design; applications for gasifiers and combustors; dilute phase pneumatic conveying; and applications for chemical production and processing. This is a valuable guide for chemists and engineers to use in their day-to-day work. **Numerical Methods with**

NUMERICAL, SYMBOLIC AND STATISTICAL COMPUTING FOR CHEMICAL ENGINEERS USING MATLAB

Ghosh, Pallab, 2018-09-01 Numerical analytical and statistical computations are routine affairs for chemical engineers They usually prefer a single software to solve their computational problems and at present MATLAB has emerged as a powerful computational language which is preferably used for this purpose due to its built in functions and toolboxes Considering the needs and convenience of the students the author has made an attempt to write this book which explains the various concepts of MATLAB in a systematic way and makes its readers proficient in using MATLAB for computing It mainly focuses on the applications of MATLAB rather than its use in programming basic numerical algorithms Commencing with the introduction to MATLAB the text covers vector and matrix computations solution of linear and non linear equations differentiation and integration and solution of ordinary and partial differential equations Next analytical computations using the Symbolic Math Toolbox and statistical computations using the Statistics and Machine Learning Toolbox are explained Finally the book describes various curve fitting techniques using the Curve Fitting Toolbox Inclusion of all these advanced level topics in the book stands it out from the rest **KEY FEATURES** Numerous worked out examples to enable the readers understand the steps involved in solving the chemical engineering problems MATLAB codes to explain the computational techniques Several snapshots to help the readers understand the step by step procedures of using the toolboxes Chapter end exercises including short answer questions and numerical problems Appendix comprising the definitions of some important and special matrices Supplemented with Solutions Manual containing complete detailed solutions to the unsolved analytical problems Accessibility of selected colour figures including screenshots and results outputs of the programs cited in the text at www.phindia.com Pallab_Ghosh **TARGET AUDIENCE** BE B Tech Chemical Engineering ME M Tech Chemical Engineering
