WHAT IS ECONOMICS?

Economics is the study of how society manages its scarce resources and attempts to answer the three key questions we noted above. In most societies, resources are allocated through the combined actions of millions of households and firms through a system of markets. Economists:

- Study how people make decisions: how much they work, what they buy, how much they save and how they invest their savings.

- Study how people interact with one another. For instance, they examine how the multitude of buyers and sellers of a good together determine the price at which the good is sold and the quantity that is sold.

- Analyze forces and trends that affect the economy, including the growth in average income, the fraction of the population that cannot find work and the rate at which prices are rising.

Scarcity means that society has limited resources and therefore cannot produce all the goods and services people wish to have.
