**Contact in the 16th Century** Brad Loewen, Claude Chapdelaine, 2016-05-12 From Labrador to Lake Ontario the Gulf of Saint Lawrence to French Acadia and Huronia Wendaki to Tadoussac and from one chapter to the next this scholarly collection of archaeological findings focuses on 16th century European goods found in Native contexts and within greater networks forming a conceptual interplay of place and mobility The four initial chapters are set around the Gulf of Saint Lawrence where Euro Native contact was direct and the historical record is strongest Contact networks radiated northward into Inuit settings where European iron nails roofing tile fragments and ceramics are found Glass beads are scarce on Inuit sites as well as on Basque sites on the Gulf s north shore but they are numerous in French Acadia Ceramics on northern Basque sites are mostly from Spain An historical review discusses the partnership between Spanish Basques and Saint

Lawrence Iroquoians c 1540 1580 The four chapters set in the Saint Lawrence valley show Tadoussac as a fork in inland networks Saint Lawrence Iroquoians obtained glass beads around Tadoussac before 1580 Algonquin from Lac Saint Jean began trading at Tadoussac after that They plied a northern route that linked to Huronia Wendaki via the Ottawa Valley and the Frontenac Uplands Finally four chapters set around Lake Ontario focus on contact between this region and the Saint Lawrence valley Huron Wendat sites around the Kawartha Lakes show an influx of Saint Lawrence trade in the 16th century followed by an immigration wave about 1580 Huron Wendat sites near Toronto show an unabated inflow of Native materials from the Saint Lawrence valley however neutral sites west of Lake Ontario show Native and European materials arriving from the south A review of glass bead evidence presented by various authors shows trends that cut across chapters and bring new impetus to the study of beads to discover 16th century networks among French and Basque fishers Inuit and Algonquian foragers and Iroquoian farmers With contributions from Sara Barreiro Meghan Burchell Claude Chapdelaine Martin S Cooper Amanda Crompton Vincent Delmas Sergio Escribano Ruiz William Fox Sarah Grant Fran ois Guindon Erik Langevin Brad Loewen Jean Fran ois Moreau Jean Luc Pilon Michel Plourde Peter Ramsden Lisa Rankin and Ronald F Williamson Published in English *Learning a non-native language in a naturalistic environment: Insights from behavioural and neuroimaging research* Christos Pliatsikas,Vicky Chondrogianni,2015-09-02 It is largely accepted in the relevant literature that successful learning of one or more non native languages is affected by a number of factors that are independent of the target language s per se these factors include the age of acquisition AoA of the target language s the type and amount of formal instruction the learners have received as well as the amount of language use that the learners demonstrate Recent experimental evidence suggests that one crucial factor for efficient native like performance in the non native language is the amount of naturalistic exposure or immersion that the learners receive to that language This can be broadly defined as the degree to which language learners use their non native language outside the classroom and for their day to day activities and usually presupposes that the learners live in an environment where their non native language is exclusively or mostly used Existing literature has suggested that linguistic immersion can be beneficial for lexical and semantic acquisition in a non native language as well as for non native morphological and syntactic processing More recent evidence has also suggested that naturalistic learning of a non native language can also have an impact on the patterns of brain activity underlying language processing as well as on the structure of brain regions that are involved expressed as changes in the grey matter structure This Research Topic brings together studies on the effects of learning and speaking a non native language in a naturalistic environment These include more efficient or native like processing in behavioural tasks tapping on language lexicon morphology syntax as well as changes in the brain structure and function as revealed by neuroimaging studies

*Transeurasian Verbal Morphology in a Comparative Perspective* Lars Johanson, Martine Irma Robbeets, 2010 The term Transeurasian refers to a large group of geographically adjacent languages stretching from the Pacific in the East to the Mediterranean in the West They share a significant amount of linguistic properties and include five linguistic families Japanese Korean Tungusic Mongolic and Turkic There is disagreement among scholars on the question whether these languages are genealogically related in the sense of an Altaic family Many linguists however seem to agree on at least one point namely that investigations into the striking correspondences in the domain of verbal morphology could substantially help unravelling the question The present volume brings together prominent specialists in the field who explore potentially shared features of verbal morphology among the Transeurasian languages and search for the best way to explain them Important issues dealt with include the following How useful is verbal morphology really in establishing genealogical relations among languages Is there concrete evidence for cognate verbal morphology across the Transeurasian languages Is it possible to draw wider connections with Indo European and Uralic How to distinguish between genealogical retention and copying of verbal morphology In which ways can typological similarities be significant in this context

**The Development of Grammar** Esther Rinke, Tanja Kupisch, 2011 This volume focuses on different aspects of language development The contributions are concerned with similarities and differences between first and second language acquisition the acquisition of sentence structure and functional categories cross linguistic influence in bilingual first language acquisition as well as the

relation between language acquisition language contact and diachronic change The recurrent topic of the volume is the link between linguistic variation and the limitation of structural variability in the framework of a well defined theory of language In this respect the volume opens up new perspectives for future research **The Acquisition of Spanish Morphosyntax**

Ana Teresa Pérez-Leroux, Juana Muñoz Licerias, 2012-12-06 Recent developments in linguistic theory as well as the growing body of evidence from languages other than English provide new opportunities for deeper explorations into how language is represented in the mind of learners This collection of new empirical studies on the acquisition of Spanish morphosyntax by leading researchers in the field of language acquisition specifically contributes to the characterization of the L1 L2 connection in acquisition Using L1 and L2 Spanish data from children and adults the authors seek to address the central questions that have occupied developmental psycholinguists in the final decades of the previous century and that will no doubt continue engaging them into the present one Syntactic Analysis and Description David Lockwood, 2005-12-07 This book is designed to teach undergraduate and beginning graduate students how to understand analyse and describe syntactic phenomena in different languages The book covers every aspect of syntax from the basics to more specialised topics such as clitics which have grammatical importance but cannot be used in isolation and negation in which a construction contradicts the meaning of a sentence The approach taken combines concepts from different theoretical schools which view syntax differently These include M A K Halliday s systemic functional linguistics the stratificational school advocated by Sydney Lamb and Kenneth L Pike s tagmemic model The emphasis of the book is on syntactic structures rather than linguistic meaning and the book stresses the difference between a well formed sentence and a meaningful one The final chapter brings these two aspects together to show the connections between syntax and semology Each chapter concludes with exercises from a diverse range of languages and a list of major technical terms The book also includes a glossary as an essential resource for students approaching this difficult subject for the first time Culinary Tourism Lucy M. Long, 2013-07-24 Well researched and original essays on the intersection between food and adventure Publishers Weekly Culinary Tourism is the first book to consider food as both a destination and a means for tourism The book s contributors examine the many intersections of food culture and tourism in public and commercial contexts in private and domestic settings and around the world The contributors argue that the sensory experience of eating provides people with a unique means of communication whether they re trying out a new kind of ethnic restaurant in their own town or the native cuisine of a place far from home Editor Lucy Long explains how and why interest in foreign food is expanding tastes and leading to commercial profit in America but the book also shows how tourism combines personal experiences with cultural and social attitudes toward food and the circumstances that allow for adventurous eating Contributors to the book are widely recognized food experts who encourage readers to venture outside the comforts of home and embark on new eating experiences Lexington Herald Leader

Gedeon, Lance C.C. Fung, 2003-12-01 Consider the problem of a robot algorithm learning mechanism moving along the real line attempting to locate a particular point To assist the mechanism we assume that it can communicate with an Environment Oracle which guides it with information regarding the direction in which it should go If the Environment is deterministic the problem is the Deterministic Point location Problem which has been studied rather thoroughly 1 In its pioneering version 1 the problem was presented in the setting that the Environment could charge the robot a cost which was proportional to the distance it was from the point sought for The question of having multiple communicating robots locate a point on the line has also been studied 1 2 In the stochastic version of this problem we consider the scenario when the learning mechanism attempts to locate a point in an interval with stochastic i e possibly erroneous instead of deterministic responses from the environment Thus when it should really be moving to the right it may be advised to move to the left and vice versa Apart from the problem being of importance in its own right the stochastic point location problem also has potential applications in solving optimization problems In many optimization solutions for example in image processing pattern recognition and neural computing 5 9 11 12 14 16 19 the algorithm works its way from its current solution to the optimal solution based on information that it currently has A crucial question is one of determining the parameter which the optimization algorithm should use Confronting the Sacred: Durkheim vindicated through philosophical analysis, ethnography, archaeology, long-range linguistics, and comparative mythology Wim van Binsbergen, 2018-05-06 With Elementary Forms of Religious Life 1912 the sociologist Emile Durkheim formulated the most influential social science theory of religion to date Pivotal are the paired concepts sacred profane the notion of collective representations and the hypothesis that through such religious symbols society compels its members to venerate herself i e to submit to the social as an irreducible instance in its own right Having grappled with this Durkheimian inheritance for half a century the anthropologist of religion and intercultural philosopher Wim van Binsbergen in this book traces his own steps in confronting Durkheim's sacred through theoretical criticism through ethnographic application to popular Islam in the segmentary social organisation of the highlands of Northwestern Tunisia and by state of the art long range methods of linguistic and comparative

mythological analysis Thus much to his surprise he demonstrates the continued validity of Durkheim's insights in religion

*Gabelentz and the Science of Language* James McElvenny, 2025-10-01 The German sinologist and general linguist Georg von der Gabelentz 1840-1893 occupies a crucial place in linguistic scholarship around the end of the nineteenth century As professor at the University of Leipzig and then at the University of Berlin Gabelentz was present at the main centers of linguistics of the time He was however generally critical of the narrow technical focus of mainstream historical comparative linguistics as practiced by the Neogrammarians and instead emphasized approaches to language inspired by a line of researchers stemming from Wilhelm von Humboldt Gabelentz's alternative conception of linguistics led him to several pioneering insights into language that anticipated elements of the structuralist revolution of the early twentieth century *Gabelentz and the Science of Language* brings together four essays that explore Gabelentz's contributions to linguistics from a historical perspective In addition it makes one of his key theoretical texts *Content and Form of Speech* available to an English speaking audience for the first time
