Crane, 2016-04-05 Resistance is a product of will times means Carl von Clausewitz postulated in his treatise On War In his 1993 Bombs Cities and Civilians which the American Historical Review judged must reading for anyone interested in the subject of air warfare Conrad C Crane focused on the moral dimension of American air strategy in World War II specifically the Allied effort to break the enemy s will through targeting civilians With decades of research and reflection and a wealth of new material at his command Crane returns to the subject of America s WWII airpower strategy to offer an analysis fully engaged with the means side of Clausewitz s equation the design and impact of strategic bombing of the enemy s infrastructure and thus its capacity to fight A marked advance in our understanding of the use of airpower in war in general and the Second World War in particular Crane s work shows how despite an undeniable lack of concern about civilian casualties in Germany and Japan late in the war American strategic bombing in WWII consistently focused on destroying the enemy s war making capacity instead of its collapsing will Further Crane persuasively argues that in the limited wars since then separating such targets has become increasingly more difficult and all air campaigns against states have subsequently escalated to accept greater risks for civilians American Airpower Strategy in World War II also provides an expanded close look at the use of airpower in the last three months of the strategic air war against Germany when so many bombing missions relied upon radar aids as well as the first direct comparison of 8th and 15th Air Force bombing campaigns in Europe The result is the most coherent and concise analysis of the application and legacy of Allied strategic airpower in WWII and a work that will inform all future practical and theoretical consideration of the use and the role of airpower in war **Strategic Bombing by the United States in World War II** Stewart Halsey Ross, 2015-10-03 The United States relied heavily on bombing to defeat the Germans and the Japanese in World War II and air raids were touted as precision bombing in American propaganda But was precision possible over cloud covered Europe or a darkened Japanese countryside Could the vaunted Norden optical bombsight in fact drop bombs into pickle barrels as advertised Were the American aircrews well trained and well protected How good were their airplanes What were the results of the costly raids This work sets suppositions against facts surrounding the United States use of strategic bombing in World War II Chapters cover the events leading up to World War II the start of the war the seers and the planners the airplanes bombs bombsights and aircrews the planes Germany used to defend itself against American planes the five cities Hamburg Dresden Tokyo Hiroshima and Nagasaki that experienced the most destruction and the U S Strategic Bombing Survey of the damage done by aerial bombing The book also probes the government s myth building statements that supported America s view of itself as a uniquely humanitarian nation and analyzes the role played by interservice rivalry battleship admirals against bomber
