Basic Belief Basic Knowledge:

Basic Belief and Basic Knowledge René Woudenberg, Sabine Roeser, Ron Rood, 2013-05-02 Over the last two decades foundationalism has been severely criticized In response to this various alternatives to it have been advanced notably coherentism At the same time new versions of foundationalism were crafted that were claimed to be immune to the earlier criticisms This volume contains 12 papers in which various aspects of this dialectic are covered A number of papers continue the trend to defend foundationalism and foundationalism s commitment to basic beliefs and basic knowledge against various attacks Others aim to show that one important objection against coherentism viz that the notion of coherence is too vague to be useful can be countered

Theory of Knowledge Keith Lehrer, 2015-10-15 In this important new text Keith Lehrer introduces students to the major traditional and contemporary accounts of knowing Beginning with the accepted definition of knowledge as justified true belief Lehrer explores the truth belief and justification conditions on the way to a thorough examination of foundation theories of knowledge externalism and naturalized epistemologies internalism and modern coherence theories as well as recent reliabilist and causal theories Lehrer gives all views careful examination and concludes that external factors must be matched by appropriate internal ones to yield knowledge Readers of Professor Lehrer s earlier book Knowledge will want to know that this text adopts the framework of that classic text But Theory of Knowledge is a completely rewritten and updated version of that book that has been simplified throughout for student use

Religion: Key Concepts in Philosophy Brendan Sweetman, 2007-06-23 An introduction to the philosophy of religion for undergraduates

The Structure of Empirical Knowledge Laurence Bonjour, 1985 Whether empirical knowledge is best conceived in terms of a foundationalist or coherentist model is a significant topic of current epistemic debate Bonjour sets out the most extensive antifoundationalist argument yet developed Publisher s description

Philosophy for AS and A2 Elizabeth Burns, Stephen Law, 2004 Philosophy for AS and A2 is the definitive textbook for students of Advanced Subsidiary or Advanced Level courses The book is structured directly around the AQA specification devoting a chapter each to the six themes covered by the syllabus

Perception and Basic Beliefs Jack C Lyons, 2009-01-20 This book argues that perceptual beliefs are epistemologically basic noninferentially justifiable and that a basic belief is one that results from a certain kind of cognitive module of which perceptual modules are a special type The result is a reliabilist epistemology that takes inferential justification seriously while remaining staunchly externalist

Epistemology Robert Audi, 2010-09-13 Epistemology or the theory of knowledge is concerned with how we know what we know what justifies us in believing what we believe and what standards of evidence we should use in seeking truths about the world and human experience This comprehensive introduction to the field of epistemology explains the concepts and theories central to understanding knowledge Along with covering the traditional topics of the discipline in detail Epistemology explores emerging areas of research The third edition features new sections on such topics as the nature of intuition the skeptical challenge of rational

disagreement and the value problem the range of questions concerning why knowledge and justified true belief have value beyond that of merely true belief Updated and expanded Epistemology remains a superb introduction to one of the most fundamental fields of philosophy Special features of the third edition of Epistemology include a comprehensive survey of basic concepts major theories and emerging research in the field enhanced treatment of key topics such as contextualism perception including perceptual content scientific hypotheses self evidence and the a priori testimony understanding and virtue epistemology expanded discussion of the relation between epistemology and related fields especially philosophy of mind philosophy of science and ethics increased clarity and ease of understanding for an undergraduate audience an updated list of key literature and annotated bibliography

The Rationality of Theism Paul Copan, Paul Moser, 2004-07-31 The Rationality of Theism is a controversial collection of brand new papers by thirteen outstanding philosophers and scholars Its aim is to offer comprehensive theistic replies to the traditional arguments against the existence of God offering a positive case for theism as well as rebuttals of recent influential criticisms of theism

Rational Belief Robert Audi, 2015 This book is a wide ranging treatment of central topics in epistemology It provides conceptions of belief and knowledge offers a theory of how they are grounded in our experience and in the social context of testimony and connects them with the will and with action moral responsibility and intellectual virtue

An Introduction to Epistemology - Second Edition Jack S. Crumley II, 2009-07-30 The second edition of Jack Crumley's *An Introduction to Epistemology* strikes a balance between the many issues that engage contemporary epistemologists and the contributions of the major historical figures. He shows not only how philosophers such as Descartes, Hume, Locke, Berkeley, and Kant foreground the contemporary debates but also why they deserve consideration on their own terms. A substantial revision of the first edition, the second edition is even more accessible to students. The new edition includes recent work on contextualism, evidentialism, externalism, and internalism, and perceptual realism, as well as the chapter on coherence theory, which is substantially revised, reflecting recent developments in that area. New to this second edition is a chapter on feminist epistemology, which includes discussions of major positions and themes such as feminist empiricism, feminist standpoint epistemology, postmodern epistemology, and feminist critiques of objectivity. It presents the important contributions of philosophers such as Sandra Harding, Helen Longino, Genevieve Lloyd, and others. Each chapter ends with a list of study questions and readings for further study.

The Love of Wisdom Steven B. Cowan, James Spiegel, 2009 This Christian-based introduction to philosophy textbook is all the more appealing to its student audience for including humor and popular culture illustrations to teach important concepts.

Groundless Belief Michael Williams, 2020-12-08 Inspired by the work of Wilfrid Sellars, Michael Williams launches an all-out attack on what he calls phenomenism, the idea that our knowledge of the world rests on a perceptual or experiential foundation. The point of this wider than normal usage of the term phenomenism, according to which even some forms of direct realism deserve to be called phenomenistic, is to call attention to important continuities of thought between theories often thought to be competitors. Williams's target is not phenomenism in its classical sense, datum and reductionist form, but empiricism generally. Williams examines and rejects the idea that unless our beliefs are answerable to a given element in experience, objective knowledge will be impossible. *Groundless Belief* was first published in 1977. This second edition contains a new afterword in which Williams places his arguments in the context of some current discussions of coherentism versus the Myth of the Given and explains their relation to subsequent developments in his own epistemological views.

Analytic and Linguistic Trends Richard John Kosciw, 2014-04-29 The science of mind has grown rapidly since the mid-twentieth century. There is now a sizeable body of empirical knowledge concerning the structures and processes of neurophysiological studies, which are underpinning e.g. thoughts, sensations, and emotions. More generally, the interdisciplinary fields of thought are burgeoning on several fronts. Contemporary philosophical reflection about mindful inquiries is quite intensive. Nonetheless, the philosophy of mind, as an aspect of reality and the faculty of thinking, reasoning, and applying knowledge for the principle of intelligence, commits to the consciousness that brings an object or idea to mind. If not only to become aware as these liberating features are shielded away from writings that are heavy in formalism and dense argumentation. However, from an opened to a closed condition, we are found of a dilemma that much has been taken for granted and accepted for what it is. That there is some hope of

gathering from the discerning fundamentals a reservoir of continuatives phenomenon for which of us are to discover or rediscover that there are no radical dissimilarities in qualities or quantitative differences from those in vogue of previous eras as perhaps their lives existed for whatever the changelessness of self mesmerizing amplification were to succumb of a life that simply is Or should it be said do we live of our lives in the way that should BE Resilience in a VUCA world Annette Potgieter, 2023-03-01 This book sheds light on how humans deal with adversity especially in uncertain and turbulent times as seen during the COVID 19 pandemic Resilience theory has become popular in scholarly discourse and the term is difficult to define as so many opinions exist This book aims to engage critically with resilience theory as a scholarly debate from the unique vantage point of the world of social work as well as theology This specific aspect of originality contributes to the generation of new knowledge in the broad field of social sciences and humanities The inception of the book stems from an interdisciplinary conference held at Hugenote Kollege Wellington where scholars from social work as well as theology engaged in a discourse on resilience Professor Adrian van Breda a specialist in resilience theory and from the social work department of the University of Johannesburg was one of the keynote speakers inspiring scholars to understand what is meant by resilience Professor Yolanda Dreyer from the University of Pretoria and a seasoned theologian and prolific writer on trauma and resilience was also a keynote speaker providing insights from a theological perspective The collaboration between these two fields of thought is unique and rendered new insights into engaging with resilience Different methodologies and perspectives from researchers are prevalent as contributors are from different scholarly fields The book ranges from linguistic liturgical philosophical practical autoethnographical anthropological sociological and online methodological approaches contributing to ways to deal with traumatic turbulent and trying times The book is divided into four main themes that stood out from the results obtained at the conference namely 1 religious imagination and resilience 2 communities and resilience 3 online teaching and resilience and 4 the resilience of philosophical questions **Relativism and the Foundations of Philosophy** Steven D. Hales, 2009-08-21 A defense of the view that philosophical propositions are true in some perspectives and false in others arguing that the rationalist intuition driven method of acquiring basic beliefs favored by analytic philosophy is not epistemically superior to such alternate belief acquiring methods as religious revelation and the ritual use of hallucinogens The grand and sweeping claims of many relativists might seem to amount to the argument that everything is relative except the thesis of relativism In this book Steven Hales defends relativism but in a more circumscribed form that applies specifically to philosophical propositions His claim is that philosophical propositions are relatively true true in some perspectives and false in others Hales defends this argument first by examining rational intuition as the method by which philosophers come to have the beliefs they do Analytic rationalism he claims has a foundational reliance on rational intuition as a method of acquiring basic beliefs He then argues that there are other methods that people use to gain beliefs about philosophical topics that are strikingly analogous to rational intuition and examines two of these

Christian revelation and the ritual use of hallucinogens Hales argues that rational intuition is not epistemically superior to either of these alternative methods There are only three possible outcomes we have no philosophical knowledge skepticism there are no philosophical propositions naturalism or there are knowable philosophical propositions but our knowledge of them is relative to doxastic perspective Hales defends relativism against the charge that it is self refuting and answers a variety of objections to this account of relativism Finally he examines the most sweeping objection to relativism that philosophical propositions are not merely relatively true because there are no philosophical propositions all propositions are ultimately empirical as the naturalists contend Hales s somewhat disturbing conclusion that intuition driven philosophy does produce knowledge but not absolute knowledge is sure to inspire debate among philosophers **Handbook of**

Epistemology I. Niiniluoto, Matti Sintonen, Jan Wolenski, 2004-03-31 The twenty eight essays in this Handbook all by leading experts in the field provide the most extensive treatment of various epistemological problems supplemented by a historical account of this field The entries are self contained and substantial contributions to topics such as the sources of knowledge and belief knowledge acquisition and truth and justification There are extensive essays on knowledge in specific fields the sciences mathematics the humanities and the social sciences religion and language Special attention is paid to current discussions on evolutionary epistemology relativism the relation between epistemology and cognitive science sociology of knowledge epistemic logic knowledge and art and feminist epistemology This collection is a must have for anybody interested in human knowledge and its fortunes and misfortunes **Philosophy: Themes and Thinkers** J. W. Phelan, 2005-04-14
