Basic Mechanisms of the Epilepsies Herbert Henri Jasper, Arthur A. Ward, Alfred Pope, 1969. It has been the objective of all concerned that this volume should bring together the current work considered significant, viable and provocative in the field of epilepsy. It is hoped that by so doing it will serve as a benchmark which summarizes past scientific accomplishments against which future progress can be measured. To this end the monograph has a twofold mission: to make available to clinicians, scientists and students a body of data and concepts relevant to epilepsy and to serve as a stimulus for an expanded interdisciplinary research effort in the epilepsies.
