Daniels,2016-03-23 This book brings together the fruits of different traditions in legal philosophy and draws on them to develop a systematic thesis on the concept of law The work uses a legal model to explore the underlying question of how the current phenomena of transnational law are best understood in combination with an examination of the traditions of J rgen Habermas s critical theory and H L A Hart s analytic jurisprudence This leads the author to conclude that the key to a fruitful dialogue and comprehensive understanding is to appreciate that the concept of law is not state centered and must reflect relationships to other legal systems *Basic Baskets* Mara Cary,1975 Demonstrates techniques tools and materials for weaving simple baskets and provides a personal perspective on the aesthetic appeal of the craft **The development of ballistic missiles in the United States Air Force 1945-1960** , *The Development of Ballistic Missiles in the United States Air Force, 1945-1960* Jacob Neufeld,1990 Following World War II the onset of nuclear weapons long range jet bombers and ballistic missiles radically changed American foreign policy and military strategy The United States Air Force led by men of far sighted vision and uncommon dedication accepted the challenge of organizing and leading a massive research and development effort to build ballistic missiles In the quarter of the century since these weapons have constituted one of the tree legs of the strategic triad the basis of America s strategy of deterring nuclear war yet they have received less attention from the public and within the Air Force than the more glamorous manned bombers of the Strategic Air Command or the missile launching submarines of the U S Navy This volume attempts to correct the imbalance by telling the story of development of Air Force ballistic Missiles It concentrates on the first generation of ballistic missiles the intercontinental Atlas and Titan and the intermediate range Thor Although the effort to develop rockets has a longer history than commonly assumed the modern history spans the relatively short era from 1945 to 1960 During this brief interval missiles advanced from drawing board to alert status where the next generation now remains poised to deter war Department of Defense Appropriations for 1958 United States. Committee on Appropriations,1957 Classified material has been deleted **Pendejo Cave** Richard S. MacNeish,Jane G. Libby,Jane G. Liddy,2003 This account of the archaeology of a cave in southern New Mexico makes a dramatic contribution to the ongoing debate over how long human beings have lived in the Americas The findings presented here show that human settlement may go back as far as 75 000 years before the present whereas the long accepted Clovis dates showed humans only about 12 000 years ago MacNeish and his colleagues subjected the cave its environs and its contents to rigorous interdisciplinary

investigation The first section of this volume comprises their reports on the changing environment of the area The second section concentrates on the excavation of the cave s layers presenting the results of radiocarbon dating and describing the evidence of human occupation including friction skin prints and human hair The third section discusses the cultural implications of the materials recovered and suggests how the ancient peoples may have exploited the changing environment and developed different ways of life throughout the Americas before the time of Clovis man No serious discussion of early inhabitants in the New World can disregard the findings presented in this monumental work of scholarship
