Basic Statistics in Business and Economics George William Summers,William Stanley Peters,Charles P. Armstrong,1981

Essential Statistical Inference Dennis D. Boos,L A Stefanski,2013-02-06 This book is for students and researchers who have had a first year graduate level mathematical statistics course It covers classical likelihood Bayesian and permutation inference an introduction to basic asymptotic distribution theory and modern topics like M estimation the jackknife and the bootstrap R code is woven throughout the text and there are a large number of examples and problems An important goal has been to make the topics accessible to a wide audience with little overt reliance on measure theory A typical semester course consists of Chapters 1 6 likelihood based estimation and testing Bayesian inference basic asymptotic results plus selections from M estimation and related testing and resampling methodology Dennis Boos and Len Stefanski are professors in the Department of Statistics at North Carolina State Their research has been eclectic often with a robustness angle although Stefanski is also known for research concentrated on measurement error including a co authored book on non linear measurement error models In recent years the authors have jointly worked on variable selection methods

Introduction to Statistical Methods for Biosurveillance

Ronald D. Fricker,2013-02-25 Presents basic and advanced methods with a focus on demonstrated added value for a broad class of public health surveillance problems

Fundamental Statistical Inference Marc S. Paolella,2018-09-04 A hands on approach to statistical inference that addresses the latest developments in this ever growing

field This clear and accessible book for beginning graduate students offers a practical and detailed approach to the field of statistical inference providing complete derivations of results discussions and MATLAB programs for computation It emphasizes details of the relevance of the material intuition and discussions with a view towards very modern statistical inference In addition to classic subjects associated with mathematical statistics topics include an intuitive presentation of the single and double bootstrap for confidence interval calculations shrinkage estimation tail maximal moment estimation and a variety of methods of point estimation besides maximum likelihood including use of characteristic functions and indirect inference Practical examples of all methods are given Estimation issues associated with the discrete mixtures of normal distribution and their solutions are developed in detail Much emphasis throughout is on non Gaussian distributions including details on working with the stable Paretian distribution and fast calculation of the noncentral Student's t An entire chapter is dedicated to optimization including development of Hessian based methods as well as heuristic genetic algorithms that do not require continuity with MATLAB codes provided The book includes both theory and nontechnical discussions along with a substantial reference to the literature with an emphasis on alternative more modern approaches The recent literature on the misuse of hypothesis testing and p values for model selection is discussed and emphasis is given to alternative model selection methods though hypothesis testing of distributional assumptions is covered in detail notably for the normal distribution Presented in three parts Essential Concepts in Statistics Further Fundamental Concepts in Statistics and Additional Topics Fundamental Statistical Inference A Computational Approach offers comprehensive chapters on Introducing Point and Interval Estimation Goodness of Fit and Hypothesis Testing Likelihood Numerical Optimization Methods of Point Estimation $Q-Q$ Plots and Distribution Testing Unbiased Point Estimation and Bias Reduction Analytic Interval Estimation Inference in a Heavy Tailed Context The Method of Indirect Inference and as an appendix A Review of Fundamental Concepts in Probability Theory the latter to keep the book self contained and giving material on some advanced subjects such as saddlepoint approximations expected shortfall in finance calculation with the stable Paretian distribution and convergence theorems and proofs
