Weir, 1998 **Conquest of Body** Polona Tratnik, 2017-05-26 This book reflects on the phenomenon of biotechnology and how it affects the body and discusses a number of related issues including visualization mediation and epistemology The author offers a compelling thesis arguing that the exploration of the human body has one ultimate aim to gain knowledge of it and to conquer it Exploration of body has an intrinsic link to power since knowledge is constitutive for the power over the body Ultimately the conquest of body means the power to intervene into life processes The book breaks new ground with its study of body visualizations from the Renaissance drawings to the medical imaging In particular it investigates their complex mediality It also considers the extension and the reach of biopower that is now possible thanks to a wide range of engineering applications The author originally questions the research approach by rethinking the relationship between mental and sensual examination She takes into consideration the epistemological problem of the two modes of exploration obtaining knowledge from empirical exploration and projecting that knowledge to the object of exploration **Applied Evolutionary Anthropology** Mhairi A.
