The book is designed to help practice supervisors and practice assessors to identify and plan for a range of learning opportunities to consider what is possible for learning and assessment in their area to get ready for and deliver the best learning experiences that they can to prepare students for their role as future nurses and midwives. Activities, top tips, examples and scenarios all help the reader to set the principles in context and to support students in achieving the NMC's standards of proficiency. Covering the learning environment and culture, interprofessional supervision, coaching models and feedback methods and types of assessment, simulation-based learning and the future of practice learning, the book aims to help individuals and organisations to create the best environment for supporting supervising and assessing students in practice. This is a contemporary text that is truly a practical guide that steers and supports.
