*Bowker's Guide to Characters in Fiction* 2007 ,2008-02      *Stylistic Manipulation of the Reader in Contemporary Fiction* Sandrine Sorlin,2019-12-12 This book focuses on how readers can be manipulated during their experience of reading fictional texts and how they are incited to perceive process and interpret certain textual patterns Offering fine grained stylistic analysis of diverse genres including crime fiction short stories poetry and novels the book deciphers various linguistic pragmatic and multimodal techniques These are skilfully used by authors to achieve specific effects through a subtle manipulation of deixis metalepsis dialogue metaphors endings inferences or rhetorical narratorial and typographical control Exploring contemporary texts such as *The French Lieutenant's Woman* *The Remains of the Day* and *We Need to Talk About Kevin* chapters delve into how readers are pragmatically positioned or cognitively mis directed as the author guides their attention and influences their judgment They also show how readers responses can conversely bring about a certain form of manipulation as readers challenge the positions the texts invite them to occupy      **Manipulating Anisotropic**

**Transport and Superconductivity by Focused Ion Beam Microstructuring** Maja D. Bachmann,2020-08-28 This thesis presents pioneering work in the relatively new field of focused ion beam FIB sculpting of single crystals to produce bespoke devices and enable the investigation of physics that cannot be studied in bulk samples It begins with a comprehensive and didactic account of how to achieve this sculpting revealing the tricks of the trade of state of the art FIB microstructuring In subsequent chapters the author presents ground breaking results obtained from microstructures of the delafossite oxide metal PdCoO<sub>2</sub> and the heavy fermion superconductor CeIrIn<sub>5</sub> In these elegant forefront experiments a new form of directional ballistic transport in the ultra pure delafossites is described and explained Furthermore a new way to spatially modulate superconductivity induced by strain is demonstrated with electrical transport measurements that agree well with predictions based on thermoelastic finite element simulations      **Dining Room Detectives** Silvia Bauckova,2015-09-04 In

the structuralist understanding as proposed by John G Cawelti a classical detective novel is defined as a formula which contains prescribed elements and develops in a predefined ritualistic manner When described in this way the crime fiction formula very closely resembles a recipe when one cooks they also add prescribed ingredients in a predefined way in order to produce the final dish This surprising parallel serves as the starting point for this book's analysis of classical detective novels by Agatha Christie Here a structuralist approach to Golden Age crime fiction is complemented by methodology developed in the field of food studies in order to demonstrate the twofold role that food plays in Christie's novels namely its function as an element of the formula a literary device but also as a cultural sign Christie employed food on various different levels of her stories in order to portray characters construct plots and depict settings What is more incorporating domesticity and food in her novels helped her fundamentally alter the rigid conventions of the crime fiction genre as it developed in the nineteenth century and enabled her to successfully introduce the character of the female detective and to feminise the detective novel as
