The American Board of Psychiatry and Neurology Michael Jeffrey

Aminoff, Larry R. Faulkner, 2012 This definitive history of the American Board of Psychiatry and Neurology ABPN shows how the Board by defining core competencies in psychiatry and neurology established national guidelines and standards for certification during an era of unparalleled technical and therapeutic advances Understanding how the various specialties and subspecialties evolved and how the credentialing process was conceived developed and adapted to reflect changes in clinical practice is invaluable to both the candidate approaching the certification exams and the diplomate seeking to maintain certification In addition the book's emphasis on the future as well as the past provides a framework for thinking about the contemporary issues that confront the individual clinician and the community as a whole The American Board of Psychiatry and Neurology Looking Back and Moving Ahead provides persuasive testimony that those earning certification have achieved an exceptional standard of professionalism expertise commitment to lifelong learning and adherence to ethical standards as well as assurance that the ABPN will continue to provide this service to the profession and the public at the highest level

Core Competencies for Psychiatric Practice Stephen C. Scheiber, Thomas A. Kramer, ABPN, 2008-08-13 The practice of medicine has changed radically during the past few decades Patients better informed than ever now demand more of their physicians viewing them as partners rather than revering them as sole decision makers In this environment nonnegotiable core competencies ever evolving and measured by certification recertification and more recently maintenance of certification are more important than ever Written from the perspective of those responsible for educating and certifying the next generations of psychiatrists this groundbreaking compendium by distinguished contributors offers for the first time a concise look at the final product of the June 2001 Invitational Core Competencies Conference sponsored by the American Board of Psychiatry and Neurology ABPN as regards psychiatry with a future comparable publication focusing on neurology Divided into four parts Part I sets the stage for the current concept of physician competence by presenting a brief history of medical competence explaining the logic behind the development of the current competence outline Part II provides two different views of how to look at core competencies how competence is defined by the Royal College of Physicians and Surgeons of Canada and based on some of their work what is currently being done in the United States Part III discusses the organizing principles identified in 1999 by the Accreditation Council for Graduate Medical Education ACGME and the American Board of Medical Specialties ABMS that frame all of our conversations about competence as currently delineated for psychiatrists across the six core competency categories Patient Care Medical Knowledge Interpersonal and Communications Skills Practice Based Learning and Improvement Professionalism and Systems Based Practice Also presented are discussions of when in a physician's career these competencies should be assessed and what methodologies would be appropriate for that assessment Part IV discusses how the psychiatry core competencies are changing board certification and recertification Also presented are informed predictions about the changes that medical school faculty and residency training directors will have to make and how practitioners will have to change behaviors to maintain their board certification Concluding with an

appendix outlining the six core competencies for psychiatry this invaluable resource will both help psychiatric residents and their faculty and training directors understand the core competencies important to the ABPN and provide practitioners with a view of what will be contained in their upcoming maintenance of certification programs now being designed Current Catalog National Library of Medicine (U.S.),1979 Includes subject section and 1968 1970 technical reports

Murray,1986 **Critical Care Neurology and Neurosurgery** Jose I. Suarez,2004-01-13 An authoritative and comprehensive review of the most important clinical issues facing critically ill neurologic and neurosurgical patients The authors provide pertinent basic clinical diagnostic and management guidelines for all the conditions commonly encountered in the neurocritical care unit including the management of autonomic disorders that require critical care postoperative management and endovascular treatment The authors also discuss the latest developments in the monitoring of different body systems emphasizing the management of cardiorespiratory complications and other medical conditions that may threaten the patient s life Also detailed are the concepts of intracranial physiology and current neuromonitoring techniques subjects whose understanding is basic to effective management of critically ill neurologic patients Numerous tables figures diagrams and radiographs simplify and explicate both the diagnostic and therapeutic processes *Achieving Equity in Neurological Practice* Bruce Ovbiagele,Sharon Lewis,Daniel José Correa,Reena Thomas,Larry CharlestonIV,2024-10-22 The recent high profile murders of George Floyd and other African American individuals along with the prevailing coronavirus disease COVID 19 pandemic have reinforced the notion that certain marginalized populations have worse health outcomes than other populations likely due to unequal and unjust policies and practices Neurological processes and prognoses frequently vary by sex gender race ethnicity socioeconomic status and geographic location In particular individuals of lower socioeconomic status and from minority racial and ethnic backgrounds have worse neurological health and often receive a lower standard of neurological care These inequities in neurological outcomes are attributed to wider societal social influences which impact how people live and how neurology is practiced Published evidence suggests that healthcare providers and the healthcare system contribute to inequities in neurological care for vulnerable and underserved populations However educating neurology care providers about these issues and training them to provide equitable care for these patients can potentially improve neurology care access delivery and outcomes In this book we provide the theoretical background scientific evidence and experiential knowledge warranted to properly care for vulnerable underserved patients with neurological diseases at the levels of the provider and system This book examines the root causes of neurological health inequities across a broad range of topics and offers possible solutions for achieving neurological health equity Initial chapters help to frame the overall issue of neurological health equity Subsequent chapters evaluate neurological health equity from the clinical practice standpoint with a focus on select populations and subspecialty care delivery settings Lastly we discuss the bigger picture with regard to the pipeline of practitioners and purview of policy makers This text is relevant for neurology residents and fellows multidisciplinary neurological care practitioners neurologists neurosurgeons advanced practice providers hospitalists emergency physicians critical care physicians pharmacists and allied health personnel and public health researchers and

health policy makers The book is divided into three sections Principles Neurological Conditions and Priorities The first section establishes the framework and explains various key terminologies and concepts which undergird the care of vulnerable and undeserved patient populations The second section Neurological Conditions covers key neurological diseases by sub specialty describing published evidence of care and outcome disparities gaps in knowledge practical techniques for bridging these disparities on provider and system levels The third section Priorities identifies important areas of focus and improvement targeting trainees researchers community partners stakeholder organizations and policy makers which would be crucial for implementing sustained societal level enhancements in the neurological health of these vulnerable populations

Principles and Practice of Urogynaecology A Tamilselvi,Ajay Rane,2015-01-07 Despite the wide prevalence of urogynaecological problems in clinical practice there is a paucity of specialists that are skilled in the management of these conditions The recognition of the need for a specialist to deal with these specific problems has led to the recent evolution of urogynaecology as a subspecialty This book Principles and Practice of Urogynaecology aims to equip the practicing professionals Gynaecologists Urogynaecologists and Urologists with up to date information on the principles that guide the evaluation and management of pelvic organ prolapse and other common urogynaecological problems With an emphasis on evidence based medicine the book aims to deliver guidance on management of common urogynaecological problems and provides information on the latest cutting edge surgical techniques Written by global experts in the field of urogynaecology the book focuses initially on pelvic floor anatomy and function moving seamlessly to the evaluation and management of clinically relevant pelvic floor problems A detailed discussion on management of mesh related complications is a highlight
