Basic Readings In Communication Theory:

Basic Readings in Communication Theory C. David Mortensen, 1979 Basic Readings in Interpersonal Communication Bobby R. Patton, 1971 *Building Communication Theories* Fred L. Casmir, 2013-10-16

Concern with various matters related to humans as they communicate has led to an increase in both research and theorizing during the second half of the 20th century. As a matter of fact, so many scholars and so many disciplines have become involved in this process that it is virtually impossible to understand and appreciate all that has been accomplished so far. This book focuses on one important aspect of human sense making theory building and strives to clarify the thesis that theories do not develop in some sort of social intellectual or cultural vacuum. They are necessarily the products of specific times, insights, and mindsets. Theories dealing with the process of communication or communicating are tied to socio-cultural value systems and historic factors that influence individuals in ways often inadequately understood by those who use them. The process orientation of this book inevitably leads to an emphasis on the perceptions of human beings. Thus, the focus shifts from the subject or area called communication to the act of communicating. Finally, this volume offers insight into how the process of human sense making has evolved in those academic fields commonly identified as communication, rhetoric, speech, communication, or speech within specific socio-cultural settings.

The Handbook of Group Communication Theory and Research Lawrence R. Frey, Dennis Gouran, Marshall Scott Poole, 1999-07-08

The Handbook of Group Communication Theory and Research establishes a central resource for the field, documenting and synthesizing the work done in group communication's 50-year history. With contributions from the most experienced and respected scholars in the field, the editors, Lawrence R. Frey, Dennis S. Gouran, and Marshall Scott Poole, present an overview of group communication study and examine a variety of theoretical positions and methodological practices. The volume is divided into six broad areas of communication scholarship: Foundations of group communication theory and research; Individuals and group communication; Task and relational group communication; Group communication processes; Group communication facilitation; Group communication contexts and applications. The sections serve as a crossroads where various paths pursued in each area meet, summarize, and suggest new maps and roads that need to be followed in the future. Offering a comprehensive history of group communication theory and research and establishing new conceptual perspectives and research agendas for future group communication scholars, this important resource will be an unrivalled tool for scholars, researchers, educators, practitioners, and students alike.
