Time-Varying Image Processing and Moving Object Recognition, 4 V. Cappellini, 1997-07-25 New digital image processing and recognition methods implementation techniques and advanced applications television remote sensing biomedicine traffic inspection robotics etc are presented in this volume Novel approaches i e digital filters source coding neural networks etc for solving 2 D and 3 D problems are described Many papers focus on the motion estimation and tracking recognition of moving objects The increasingly important field of Cultural Heritage is also covered Some papers are more theoretical or of review nature while others contain new implementations and applications Generally the book presents for the above outlined area the state of the art theory implementation applications with future trends This book will be of interest not only to researchers professors and students in university departments of engineering communications computers and automatic control but also to engineers and managers of industries concerned with computer vision manufacturing automation robotics and quality control

Intracranial Endoscopic Neurosurgery David F. Jimenez, 1998 In one book the practitioner can obtain a solid foundation in the field of endoscopy as practiced by neurosurgeons Included is a review of the physics and instrumentation of neuroendoscopic systems comprehensive coverage of the anatomy upon which neuroendoscopic procedures are performed and illustrations and text describing how endoscopic surgery can be used as an alternative to traditional surgery for such complex procedures as hematoma evacuation abscess and third ventriculocisternostomies Avoiding and managing frequently encountered complications are thoroughly discussed Intracranial Endoscopic Neurosurgery contains The physics of neuroendoscopic systems and the instrumentation Neuroendoscopes and instruments Access to the ventricular system Anatomy for neurosurgical endoscopic procedures The

use of endoscopes for shunt placement Third ventriculostomy Neuroendoscopic treatment of arachnoid cysts Endoscopic removal of colloid cysts Endoscopic management of complex hydrocephalus Endoscopy Assisted craniotomy and microsurgery Endoscopic transsphenoidal resection of stellar lesions Distributed by Thieme for the American Association of Neurological Surgeons

Intelligent Multimedia Data Hiding Hsiang-Cheh Huang, Wai-Chi Fang, 2007-04-25 This book lays out all the latest research in the area of multimedia data hiding The book introduces multimedia signal processing and information hiding techniques It includes multimedia representation digital watermarking fundamentals and requirements of watermarking It moves on to cover the recent advances in multimedia signal processing before presenting information hiding techniques including steganography secret sharing and watermarking The final part of this book includes practical applications of intelligent multimedia signal processing and data hiding systems

Vision and Information Processing for Automation A. Browne, L. Norton Wayne, 2013-11-09 Developments in electronic hardware particularly microprocessors and solid state cameras have resulted in a vast explosion in the range and variety of applications to which intelligent processing may be applied to yield cost effective automation Typical examples include automated visual inspection and repetitive assembly The technology required is recent and specialized and is thus not widely known VISION AND INFORMATION PROCESSING FOR AUTOMATION has arisen from a short course given by the authors to introduce potential users to the technology Its content is a development and extension of material presented in the course The objective of the book is to introduce readers to modern concepts and techniques basic to intelligent automation and explain how these are applied to practical problems Its emphasis is on machine vision Intelligent instrumentation is concerned with processing information and an appreciation of the nature of information is essential in configuring instrumentation to handle it efficiently An understanding of the fundamental principles of efficient computation and of the way in which machines make decisions is vital for the same reasons Selection of appropriate sensing e.g camera type and configuration of illumination of hardware for processing microchip or parallel processor to give most effective information flow and of the most appropriate processing algorithms is critical in obtaining an optimal solution Analysis of performance to demonstrate that requirements have been met and to identify the causes if they have not is also important All of these topics are covered in this volume
