Basic text on insurance law Robert E. Keeton, 1973 *Principles of European Insurance Contract Law: A Model Optional Instrument* Project Group Restatement of European Insurance Contract Law, Helmut Heiss, Mandeep Lakhani, 2011-05-31
Following the publication of the Principles of European Insurance Contract Law PEICL in 2009 there has been significant political and academic discussion on their possible use as an optional instrument. Experts' views on this topic were exchanged at a conference held in Vienna in January 2010. The distinguished speakers represented European politics, legal science, insurance industry, insurance intermediaries and consumers. These independent experts, who were not involved in drafting the PEICL, presented their critical unbiased opinions on the project. This volume presents the proceedings of the Vienna conference. It also includes a postscript in commemoration of the late Professor Dr Fritz Reichert, Facilitator whose visionary ideas led to the creation of the Project Group Restatement of European Insurance Contract Law and to the drafting of the PEICL. *Basic Text on Insurance Law* Robert E. Compensation Mechanisms for Job Risks Michael J. Moore, W. Kip Viscusi, 2014-07-14. In this major new work Michael J. Moore and W. Kip Viscusi explore the question: How are workers compensated for exposing themselves to the risk of physical injury while on the job? The authors detail the diverse nature of labor market responses to job risks and the important role played by compensation for risk mechanisms. Following an overview of the literature, they present a number of unprecedented results. Comprehensive and systematic discussions of issues such as wage risk tradeoffs, the effects of workers compensation on wages and risk, the role of unions and the role of product liability suits in job related injuries make the volume an essential work for all those interested in risk policy and workplace safety. Among the major results presented for the first time are the first estimates of the value of life derived from recently released occupational fatality risk data from the National Traumatic Occupational Fatality Survey. From these same data, the authors also demonstrate that higher workers compensation benefit levels significantly reduce fatalities on the job, a finding that challenges virtually every other treatment of this topic.
