As international and celebrated figures athletes are powerful symbols yet few spectators realize that a global regulatory network is in place in an attempt to ensure ideals of fair play The athletes caught and punished for doping are not always the ones using performance enhancing drugs to cheat In the case of female athletes violations of fair play can stem from their inherent biological traits Combining historical and ethnographic approaches Testing for Athlete Citizenship offers a compelling account of the origins and expansion of anti doping regulation and gender verification rules Drawing on research conducted in Australasia Europe and North America Henne provides a detailed account of how race gender class and postcolonial formations of power shape these ideas and regulatory practices Testing for Athlete Citizenship makes a convincing case to rethink the power of regulation in sports and how it separates athletes as a distinct class of citizens subject to a unique set of rules because of their physical attributes and abilities *Gamma Radiation Feriz*
