Ethics and Aesthetics of Translation Harriet Hulme, 2018-11-19 Ethics and Aesthetics of Translation engages with translation in both theory and practice as part of an interrogation of ethical as well as political thought in the work of three bilingual European authors Bernardo Atxaga Milan Kundera and Jorge Semprín In approaching the work of these authors the book draws upon the approaches to translation offered by Benjamin Derrida Ricœur and Deleuze to highlight a broad set of ethical questions focused upon the limitations of the monolingual and the democratic possibilities of linguistic plurality upon our innate desire to translate difference into similarity and upon the ways in which translation responds to the challenges of individual and collective remembrance Each chapter explores these interlingual but also intercultural interrelational and interdisciplinary issues mapping a journey of translation that begins in the impact of translation upon the work of each author continues into moments of linguistic translation untranslatability and mistranslation within their texts and ultimately becomes an exploration of social political and affective untranslatability In these journeys the creative and critical potential of translation emerges as a potent often violent but always illuminating vision of the possibilities of differentiation and connection generation and memory in temporal linguistic cultural and political terms

The Survival of Myth Paul Hardwick, David Kennedy, 2010-04-16 What are myths and what are they for Myths are stories that both tell us how to live and remind us of the inescapability and pull of the collective past The Survival of Myth Innovation Singularity and Alterity explores the continuing power of primal stories to inhabit our thinking An international range of contributors examine a range of texts and

figures from the Bible to Cormac McCarthy and from Thor to the Virgin Mary to focus on the way that ancient stories both give access to the unconscious and offer individuals and communities personae or masks Myths translated and recreated become in this sense very public acts about very private thoughts and feelings The subtitle of the book Innovation Singularity and Alterity reflects the way in which the history of cultures in all genres is a history of innovation of a search for new modes of expression which paradoxically often entails recourse to myth precisely because it offers narratives of singularity and otherness which may be readily appropriated The individual contributors offer testament to the continuing significance of myth through its own constant metamorphosis as it both reflects and transforms the societies in which it is re produced

Bloodline of the Gods Nick Redfern, 2025-09-12 Are significant numbers of humanity the product of an ancient and advanced alien civilization Have we across the millennia been periodically modified and refined as a species In short has our genetic make up been manipulated by otherworldly beings that view human civilization as one big lab experiment These are controversial and thought provoking questions They are also questions that demand answers answers that may very well be found by examining those people whose blood type is Rh negative The vast majority of humankind 85 to 90 percent is Rh positive which means a person's red blood cells contain an antigen directly connected to the Rhesus monkey This antigen is known as the Rh factor Each and every primate on the planet has this antigen except for one the remaining 10 to 15 percent of humans If the theory of evolution is valid that each and every one of us is descended from ancient primates shouldn't we all be Rh positive Yes we should But we're not The Negatives are unlike the rest of us They are different They are the unique individuals whose bloodline may have nothing less than extraterrestrial origins
