century **Armoured Fighting Vehicles** Philip Trehwhitt, 2008-04-01 Armoured Fighting Vehicles is a compendium of the most important and influential military vehicles that have seen service since World War I It begins with the unreliable tanks of World War I and continues through to the present day **Hungarian Armoured Fighting Vehicles in the Second World War** Eduardo Manuel Gil Martínez, 2019-12-27 The actions of the German armoured forces during the Second World War is well known What has not yet been so well told are the actions of the armoured forces from Germany's allies While it is true that their performance was generally quite secondary in comparison to the Reich the actions of the Hungarian armoured forces should be highlighted Hungary not only managed to organize its armoured forces but developed its own military industry that was able to supply weapons and equipment to its troops The Hungarian military was able to produce all kinds of weapons vehicles and armoured vehicles although they were generally under gunned and under armoured This book rescues Hungary's participation during the Second World War from oblivion through the use of superb photographs which take the reader from the beginning of the USSR campaign and the conquest of Soviet lands before ending with the bloody battles to avoid the Soviet and Romanian advance into Hungary the Siege of Budapest and the last clashes in Austrian and Slovenian territory before the army's unconditional surrender The author highlights the bravery and courage of these men as well as the terrible fate of the Hungarian armoured forces when the Soviet Army invaded Hungary Modern Armored Fighting Vehicles Jack Livesey, 2008 Previously published as part of a larger volume The world encyclopedia of armoured fighting vehicles T p verso **Modern Armored Fighting Vehicles** Thomas Bruce, 2018-09-13 Armored vehicles are essentially armed and armored high mobility off road vehicles While their mobility aspects are clearly very important there are many high mobility off road vehicles not designed for military applications Therefore the key defining aspects of an Armored Fighting Vehicle AFV as the name implies is the armament they carry to inflict damage and the armor they possess as protection against damage There has within recent years been a great number of exciting and innovative developments in critical AFV technologies Key among these are significant enhancements to both armament and armor The primary armament of an AFV consists of relatively large caliber guns that fire a range of ballistic munitions including kinetic energy penetrators high explosive incendiary and shaped charge warhead tipped rounds Some guns are also capable of firing anti tank guided missiles In addition to the main weapon many AFV's are also equipped with a range of secondary weapons including machine guns grenade launchers mortar tubes and missile launchers These weapons and their capabilities in penetrating standardized armor is reviewed in detail in this volume AFV armor is designed to protect the vehicle against both threats fired by other AFVs and threats originating from any other source including buried mines infantry portable weapons air launched missiles artillery shells and improvised devices Protection against each type of threat often requires a unique type of armor solution These solutions are then layered onto the vehicle to provide the required protection Vehicle armor systems include applique armor spaced armor reactive armor cage armor netted armor electric armor spall systems dazzlers

jammers and Active Protection Systems APS Each type of armor is covered in detail in this volume both at a system level and with respect to their integration into specific AFVs This volume covers the theory of AFV design of armament performance and of armor design and performance As well most modern AFVs are described and discussed A modern AFV is considered to be one that was either designed over the last 20 years or is likely to continue to see service with front line combat troops for the foreseeable future Main battle tanks light tanks reconnaissance vehicles tracked and wheeled armored personnel carriers infantry fighting vehicles and tank destroyers are covered
