Arms Control And The End Of The Cold War:

Arms Control and the End of the Cold War P. Edward Haley, 2002 **Stepping Back** William B. Vogele, 1994-04-30
Vogele provides a contemporary history of the nuclear arms control negotiations of the 1980s tracing these negotiations from their initiation at the beginning of the decade through the agreements that were reached by the end. Two chapters provide background on arms control efforts from the mid 1950s through 1980. The work is an analytical history of nuclear arms control bargaining processes and an evaluation of the utility of alternative negotiation strategies for producing agreement. Thus the history of these negotiations offers lessons for the continuing pursuit of arms control and other cooperative security arrangement in the post Cold War international order. Arms Control After the End of the Cold War Sergei Mikhailovich Rogov, Henry Gaffney (Jr.), 1997 Global and Regional Approaches to Arms Control in the Middle East Gamal M. Selim, 2013-07-11
Since the end of the Cold War the Middle East has been the focus of various projects for the establishment of arms control including CBMs regimes. Whereas some of these projects were initiated at the global level others were discussed and debated at the regional level. This book analyses the global and regional dynamics of arms control in the Middle East in the post Cold War era. It examines American and European arms control projects, the contexts in which they were presented, the reactions of major regional actors and their impacts on arms control efforts in the region. It assesses Arab perceptions of the motivations for and constraints on establishing arms control regimes. It also explores the prospects of regional arms control in the context of the ongoing Arab Spring with its ramifications for Arab regional politics and provides a new perspective on arms control in the Middle East. This volume enriches the ongoing discourse which to date has been dominated by mainly Western perspectives. The Law of Arms Control Guido den Dekker, 2001-05-01
This book is about the role of international law in the arms control process. It discusses the law of arms control as a special branch of international law and covers the following topics: the place of the law of arms control in the system of international law and politics; special characteristics of arms control law; the international legal framework of supervision in the law of arms control; general features of supervisory mechanisms in all multilateral arms control treaties currently in force; case studies on the CWC, IAEA safeguards system and CTBT; and enforcement of the law of arms control. As such, this study provides a comprehensive theory and model for the analysis of supervisory mechanisms in arms control treaties and offers an in-depth overview of the law of arms control as it stands in the post Cold War situation. The book will be of interest to international lawyers as well as political scientists and policy makers. **The Arms Control and Disarmament Agency** United States. Congress. House. Committee on Foreign Affairs. Subcommittee on International Security, International Organizations, and Human Rights, 1994
Strategies of Arms Control Stuart Croft, 1996
In this groundbreaking analysis Stuart Croft brings the subject of arms control into the era of complex multi polar international relations. He moves beyond the narrow definitions of the phenomenon associated with the Cold War to show how it not only has a long past but also a clear future. The author begins

by tracing the history of agreements between polities over weapons back to ancient times An understanding of this history allows him to put forward a typology of arms control It occurs at the end of major conflicts stabilises balances between states develops norms of behaviour manages weapons proliferation and acts as a tool of international organisations Stuart Croft examines the evolution of these five qualitatively different strategies and applies the typology to arms control agreements in the post Cold War world This definitive new study will be of interest to students in international relations and security studies as well as specialists in these disciplines

Norm Dynamics in Multilateral Arms Control Harald Muller, Carmen Wunderlich, 2013-04-01 Efforts to create or maintain rules to contain the risks stemming from an unrestrained multilateral arms race are at the core of a world order based on consensual norms rather than on a pure balance of power Whereas security cooperation is conventionally considered to be motivated primarily by interest and security based factors studies have shown that all actors use moral arguments and are deeply embedded in the normative patterns surrounding their realm of action Norm Dynamics in Multilateral Arms Control based on research conducted by a large PRIF team led by Harald M
