Arms Control And The New Middle East Security Environment:

Arms Control And The New Middle East Security Environment Shai Feldman, 2019-03-11 This volume incorporates the talks delivered at a conference on Arms Control and the New Middle East Security Environment held in Ginosar Israel in January 1992. The conference was organized within the framework of the Project on Security and Arms Control in the Middle East conducted by Tel Aviv University's Jaffee Center for Strategic Studies. Some 28 scholars from eight different countries together with some 30 Israelis took part in the conference deliberations. **Arms Control in the Middle East**

Emily B. Landau, 2006-08-24 This book focuses on the Middle East arms control process as it unfolded during the years 1992-1995 as part of the multilateral track of the Arab-Israeli peace process initiated in Madrid October 1991. Security and Environment in the Mediterranean Hans Günter Brauch, Peter H. Liotta, Antonio Marquina, Paul F. Rogers, Mohammad El-Sayed Selim, 2012-12-06 In this volume security specialists, peace researchers, environmental scholars, demographers as well as climate, desertification, water, food, and urbanisation specialists from the Middle East and North Africa, Europe, and North America review security and conflict prevention in the Mediterranean. They also analyse NATO's Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South. The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II, the Gulf War, the Balkan wars, and the Middle East conflict. It also examines factors of global environmental change, population growth, climate change, desertification, water scarcity, food, and urbanisation issues as well as natural disasters. Furthermore, it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century.

Integrated Middle East Regional Approaches to Unconventional Arms Control and Disarmament Laura Drake, 1999-10-12 The topic of biological weapons and the issues of arms control and disarmament are addressed in Middle East regional perspective. This requires that the subject be dealt with not as a separate category but within the overall context of the Middle East military balance. This taken into consideration, the different approaches to unconventional and mixed arms control are addressed in terms of how they affect the national interests of regional states and in what form they are most likely to appear as increasing rather than diminishing their security. The US-USSR nuclear arms control effort during the Cold War is advocated as a process model for the Middle East. It provides a way to disarm the most heavily armed regional powers of their most dangerous weapons without damaging their respective national interests. The voluntarism inherent in this approach respects the sovereignty of the region's several states, thereby overcoming both the Israeli distrust of international organizations and treaties and the Arab distrust of the partiality of the American superpower. The further recommendation to marry the US-USSR arms control negotiation model to the Middle East theater and its long history of negotiated military agreements beginning with the Arab-Israeli armistice agreements in 1948-49 contains the additional

benefit of separating the military requirements of arms control from the political shackles of a declining Middle East peace process Israel's objection is that the Arms Control and Regional Security Committee part of the multilateral track of the peace process does not include states like Iran Iraq Syria and Libya the states by which Israel says it is most threatened The remodeling of Middle East arms control according to Cold War standards enables the inclusion of those proliferating states which are not prepared to enter into political and economic normalization or security cooperation with Israel but whose arms races with Israel and with one another are creating an ever more dangerous regional environment *The Middle East Military Balance 2000-2001* Shai Feldman, Yiftah Shapir, 2001 With its wealth of current hard to find information The Middle East Military Balance offers an authoritative and indispensable guide to military capabilities in the Middle East Although Israel and its Arab neighbors have taken many steps toward peace in recent years the Middle East remains an uncertain and volatile region Stretching from Morocco to Iran the area has seen numerous international and internal conflicts in recent decades Understanding the dynamics of these conflicts requires detailed information on the military capabilities of the region's countries The Middle East Military Balance is prepared annually by the Jaffee Center for Strategic Studies in Tel Aviv Israel It is based on data from many sources including some that are unavailable to other institutes With its wealth of current hard to find information it offers an authoritative and indispensable guide to military capabilities in the Middle East Governments the media and researchers pay close attention to its data and analysis each year The Jaffee Center's new reorganized Middle East Military Balance provides the most comprehensive and objective analysis of Middle East military developments available in the open literature A first rate product Geoffrey Kemp Director of Regional Strategic Programs The Nixon Center

Gender and International Security Laura Sjoberg, 2009-10-16 This book defines the relationship between gender and international security analyzing and critiquing international security theory and practice from a gendered perspective Gender issues have an important place in the international security landscape but have been neglected both in the theory and practice of international security The passage and implementation of UN Security Council Resolution 1325 on Security Council operations the integration of gender concerns into peacekeeping the management of refugees post conflict disarmament and reintegration and protection for non combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally in order to demonstrate the importance of gender analysis to the study of international security and to expand the feminist research program in Security Studies The chapters included in this book not only challenge the assumed irrelevance of gender they argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue Rather the contributors argue that gender is conceptually empirically and normatively essential to studying international security They do so by critiquing and reconstructing key concepts and theories in international security by looking for the increasingly complex roles women

play as security actors and by looking at various contemporary security issues through gendered lenses Together these chapters make the case that accurate rigorous and ethical scholarship of international security cannot be produced without taking account of women s presence in or the gendering of world politics This book will be of interest to all students of critical security studies gender studies and International Relations in general Laura Sjoberg is Assistant Professor of Political Science at the University of Florida She has a Phd in International Relations and Gender Studies from the University of Southern California and is the author of *Gender Justice and the Wars in Iraq* 2006 and with Caron Gentry *Mothers Monsters Whores Women s Violence in Global Politics* 2007

The Middle East Arms Control and Regional Security (ACRS)

Talks Bruce W. Jentleson, 1996 *Countering the Proliferation of Weapons of Mass Destruction* Thanos P Dokos, 2020-07-24 As counter proliferation is expected to become the central element in the new national security policy of the US such actions will constitute a central element of every major international conflict in the first decades of the 21st century One of the most important geostrategic phenomena of the past decade has been the extraordinary diffusion of war making capabilities from the developed North to the developing South In the eyes of some proliferant states possessing nuclear biological and chemical NBC weapons would not only add to their regional stature but would also offer an asymmetrical counter to the West s massive superiority in conventional forces In the Eastern Mediterranean and the Middle East a number of countries are assumed to possess varying levels of NBC weapons capabilities Reasons for concern include the fact that such weapons have been used in the past the region s geographic proximity to Europe and the vital interests of the West which is prepared under certain circumstances to use force to protect them the multiplicity of conflicts and other security problems and the general instability in the region including the spread of religious extremism This important and timely book assesses in detail the accuracy of predictions and perceptions about a possible military threat from the Southern Mediterranean Muslim world and their impact on NATO s political and military posture Thanos P Dokos presents an assessment of the Alliance s options for dealing with the problem This book represents an invaluable topical resource for researchers and policy makers

Nuclear Disarmament in the Twenty-first Century Wade L. Huntley, Mitsuru Kurosawa, Kazumi Mizumoto, 2005-03-06 This work provides a comprehensive examination of the current state and future prospects for nuclear disarmament at the turn of the century The work juxtaposes a sober review of progress made during the last decade with a proactive agenda of proposals for new disarmament initiatives in the next decade Taken together the contributions to this volume suggest that contrary to current conventional wisdom the increasing global cache of nuclear weapons and the waning progress on nuclear disarmament of recent years need not become the defining features of the post Cold War era Rather by examining the new conditions that have emerged at the dawn of the 21st century through both national and issue based perspectives this work reveals how the likelihood of continuing uncertainty and change in world affairs creates opportunities as well as the need for renewed progress toward significant nuclear disarmament

Israel's Nuclear Option Zaki Shalom, 2005-04-01

The discussions which pitted Israel's security concerns against the United States determined goal to stem nuclear proliferation produced a set of strategic understandings. This book recounts the dialogue and related diplomatic activity that took place during the Kennedy and Johnson administrations and the Ben Gurion and Eshkol premierships. *Global and Regional Approaches to Arms Control in the Middle East* Gamal M. Selim, 2013-07-11 Since the end of the Cold War the Middle East has been the focus of various projects for the establishment of arms control including CBMs regimes. Whereas some of these projects were initiated at the global level others were discussed and debated at the regional level. This book analyses the global and regional dynamics of arms control in the Middle East in the post Cold War era. It examines American and European arms control projects, the contexts in which they were presented, the reactions of major regional actors and their impacts on arms control efforts in the region. It assesses Arab perceptions of the motivations for and constraints on establishing arms control regimes. It also explores the prospects of regional arms control in the context of the ongoing Arab Spring with its ramifications for Arab regional politics and provides a new perspective on arms control in the Middle East. This volume enriches the ongoing discourse which to date has been dominated by mainly Western perspectives. **Regional Security Dialogue in the Middle East** Chen Kane, Egle Murauskaite, 2014-07-25 At this time of considerable political turmoil in the Middle East there is a pressing need to explore alternative frameworks for regional security. The book discusses the Helsinki Process as one potentially relevant historical model to learn from. The Helsinki Process began in a divided Europe in the early 1970s and over 40 years achieved major successes in promoting cooperation between the Warsaw Pact and NATO member states on social, human rights, security and political issues. In this volume established Middle East experts, former diplomats and emerging scholars assess the regional realities from a broad range of perspectives and with the current momentum for reform across the Middle East chart a path towards a comprehensive mechanism that could promote long term regional security. Providing a gamut of views on regional threat perception and suggesting ways forward for regional peace, this book is essential reading for students and scholars with an interest in Politics, the Middle East and Conflict Studies. *Defense Trade News*, 1992 *Israel's National Security* Efraim Inbar, 2007-12-21 This book brings together a collection of essays that covers the main national security issues Israel has faced since 1973. *Index Islamicus*, 2007 **Bridging the Gap** Shai Feldman, Abdullah Toukan, 1997 A path breaking collaboration between an Israeli arms control expert and a Jordanian policy advisor, this concise book offers a frank assessment of Arab and Israeli perceptions of their security problems. Building on the bilateral and multilateral peace process, the authors propose a set of measures to increase trust between the two sides and break out of the security dilemma in which a move by one side to strengthen itself provokes the other side to do the same. *American Defense Policy* Peter L. Hays, Brenda J. Vallance, Alan R. Van Tassell, 1997 defense policies reviewing excerpts from key defense policy statements and assessing the likely challenges for future policy makers. Brent Scowcroft International Affairs **The War That Must Never Be Fought** George P.

Shultz,James E. Goodby,2015-08-01 This book discusses the nuclear dilemma from various countries points of view from Japan Korea the Middle East and others The final chapter proposes a new solution for the nonproliferation treaty review
