Urban Development and the Panama Canal Zone Graciela Arosemena Díaz, Almyr Alba, María Sánchez de Stapf, 2023-09-27 The construction of the Panama Canal at the beginning of the twentieth century created an enclave that ran parallel to the interoceanic waterway controlled by the US government the Canal Zone This book aims to understand the implications that Panama Canal Zone urban planning had on human health natural resources and biodiversity through the study case of Fort Clayton highlighting how the sanitary concerns shaped building regulations and the urban landscape of towns This book highlights the role of North American entomologists and health workers in developing control strategies for diseases transmitted by mosquitoes and how mosquito ecology determined building regulations that shaped the image of the Canal Zone towns On the other hand the book determines the environmental assessment of Fort Clayton determined by the two fundamental aspects that set on the environmental impact of an urban settlement The first one is the suitability of the site's location The second is the urban structure of the adopted city model and its impact on the connectivity of the surrounding forests during the twentieth century This text is aimed at both undergraduate and postgraduate students architects urban planners historians and environmental science professionals Geoenvironmental Mapping: Methods, Theory and Practice Peter T Bobrowsky, 2001-01-01 This text illustrates the range of environmental geoscience mapping presently carried out around the world Specialists in several countries have contributed a number of subdisciplinary and thematic topics including volcanic hazards landslides dolines tsunamis radon potential medical geology rainfall erosion engineering geology borehole stratigraphy lake sediment geochemistry aggregate resources and remote sensing The collection analysis and interpretation of data by geologists geographers and engineers typically involves the presentation of information in map form which can range from black white to colour 2 D to 3 D and paper copy to digital format illustrations

This volume reaffirms the global need for mapping geoscientific data **Urban Climates in Latin America** Cristián Henríquez,Hugo Romero,2019-02-23 This book describes the observation of urban climates in Latin American and their relationships with urban sprawl the economic emergence of Latin American countries social segregation urban ecology disasters and resilience The chapters include contributions dealing with urban heat islands local climate zones thermal comfort air pollution extreme climate index green infrastructure health issues and adaptations based on the socio economic background of urban areas This book revises the role of urban planning and environmental governance highlighting the singularities in climate adaptation policies in developing countries *Spatial Interaction Models with Land Use* Paulo Silveira,Tomaz Ponce Dentinho,2024-04-25 This book develops spatial interaction models for the analysis of human interaction within space in terms of both accessibility and land use Presenting case studies on the Azores and Morocco it covers applications in various regions of Europe and Africa The respective models simulate land use employment households commuting and shopping movements and land values employment distribution for basic activities changes in accessibility and changes in land suitability due to climate change This book will appeal to scholars and students of regional and spatial science ecological economics and agricultural economics as well as to spatial planners and practitioners dealing with issues of spatial planning to address such problems as unsustainable land use adaptation to climate change desertification of rural areas heavily dependent on land use and the impacts of external shocks on land and property values **Manual de diseño básico para el taller de arquitectura** Sebastián Gray,Francisco Vergara,Camilo Meneses,2021-04-05 Este manual para estudiantes representa 25 años de enseñanza en los talleres de la Escuela de Arquitectura de la Pontificia Universidad Católica de Chile y es fruto de las prácticas profesionales y docentes de diversos profesores Comenzó como una serie de recomendaciones empíricas que los profesores del taller de tercer año hacían a sus alumnos para facilitarles el proceso de diseño y permitirles concentrarse en cuestiones menos triviales y más abstractas de la disciplina Luego este conjunto de recomendaciones se convirtió en una charla semestral y más adelante en un primer borrador del presente manual el que ha sido informalmente reproducido y distribuido por años entre el alumnado Los textos originales datan de la década de 1990 y son obra de Luis Eduardo Bresciani Prieto Sebastián Gray y Dino Bozzi las subsecuentes revisiones y contribuciones son obra de Francisco Vergara Dávila Sebastián Gray y Camilo Meneses Es motivo de alegría para los autores lograr la edición formal de este manual después de tantos años de existencia clandestina y por ello estamos seguros de que resultará interesante y útil tanto para estudiantes y profesores de arquitectura en todo Chile como para todos aquellos involucrados en el arte del bien proyectar y del bien construir *Removing Barriers to Environmental Comfort in the Global South* Laura Marín-Restrepo,Alexis Pérez-Fargallo,María Beatriz Piderit-Moreno,Maureen Trebilcock-Kelly,Paulina Wegertseder-Martínez,2023-05-11 This book describes how comfort energy and climate change in developing countries and vulnerable sectors of the population relate to buildings The building sector is currently facing significant challenges

connected to energy consumption energy poverty and climate change effects When studied in developing countries and vulnerable sectors of the population these factors which are commonplace in the tropics and the southern hemisphere are interlinked and share a critical component environmental comfort Although progress has been made in environmental comfort through research and the development of standards and policies at the international level in the Global South where the countries with the highest levels of income inequality are concentrated environmental comfort has its own characteristics and challenges that prevent a clear understanding from the established vision of the Global North This book presents research theories and techniques related to Thermal comfort Indoor air quality Visual comfort and Acoustic comfort and its relationship with energy use and energy efficiency seeking to address different barriers to environmental comfort It shows how to improve the way buildings are designed and operated to promote healthier environmental conditions and more sustainable construction by presenting studies and reflections carried out in the target geographical area the Global South In this way this book contributes to developing the concept of environmental comfort visualising how progress has been made in understanding it from a tropical and southern perspective and posing common challenges The book is intended for engineers architects and researchers of the built environment who are interested in environmental comfort and its influence on energy consumption energy poverty and other related factors in the Global South context It is also a useful resource for decision makers and public policy developers concerned with the indoor comfort of buildings Moreover the book aims to provide guidance for those in developing countries by gathering existing knowledge in the field for the tropics and southern hemisphere climatic and sociocultural contexts allowing us to move forward in this subject with actions and proposed solutions that fit our particular needs

Health and Well-Being Considerations in the Design of Indoor

Environments González-Lezcano, Roberto A.,2021-06-25 Indoor residential environments have a direct influence on human health both in developed and developing countries Significant levels of indoor pollution can make housing unsafe and can negatively impact on human health Housing therefore is a key health factor for people all over the world and various parameters such as air quality ventilation hygrothermal comfort lighting physical environment building efficiency and others can contribute to healthy architecture and the conditions that can result from the poor application of these parameters Health and Well Being Considerations in the Design of Indoor Environments addresses issues concerning indoor environmental quality IEQ including air quality and ventilation access to daylight and views acoustic conditions and control over lighting and thermal comfort as well as the impact that this environment can have on human health and mental well being The book also investigates the functional aspects of interior design such as whether the layout provides easy access to tools and sufficient space for occupants It also considers energy demand and building energy losses due to such issues as air renovations and enclosure infiltrations Covering topics such as sustainable design pollution building materials and lighting this book is an effective resource for students professors academicians researchers architects designers planners engineers

interior designers building managers construction companies and other industry professionals looking to increase building occupant satisfaction by considering all aspects of IEQ Cooling Technologies - Technologies and Systems to Guarantee Thermal Comfort in Efficient Buildings David Bienvenido-Huertas,2023-07-19 Cooling systems are a fundamental technology to ensure adequate living conditions in the interior spaces of buildings As climate change is increasing the outside temperature cooling systems are experiencing greater use which can affect the decarbonization objectives established for the built environment Thus aspects such as efficient technologies in cooling systems user operating patterns and user thermal expectations have a significant impact In addition the use of new refrigerants can have repercussions both on the operation of the installation and on the environment This book is a compendium of research studies reviews and case studies related to refrigeration system design and technology and energy efficiency and thermal comfort **Arquitectura y energía natural** Rafael Serra Florensa,Helena Coch Roura,2001 La arquitectura se ha entendido normalmente como geometria y materia abstraccion dibujada y realidad tangible pero raramente se ha valorado el papel de la energia luz sonido calor etc en su definicion Desde la percepcion ambiental y el confort hasta la constatacion del valor espacial de la energia se intentan facilitar al arquitecto los conceptos para encontrar la solucion optima de unas necesidades a menudo imprecisas El conocimiento de los conceptos sistemas y componentes adecuados asi como de los sistemas practicos de evaluacion permiten entender el diseno con energias naturales en la arquitectura como una nueva forma de enfocar el proyecto *Counteracting Urban Heat Island Effects in a Global Climate Change Scenario* Francesco Musco,2016-08-30 Urban heat islands are a new type of microclimatic phenomenon that causes a significant increase in the temperature of cities compared to surrounding areas The phenomenon has been enforced by the current trend towards climate change Although experts consider urban heat islands an urgent European Union public health concern there are too few policies that address it The EU carried out a project to learn more about this phenomenon through pilot initiatives The pilots included feasibility studies and strategies for appropriately altering planning rules and governance to tackle the problem of urban heat islands The pilots were carried out in eight metropolitan areas Bologna Modena Budapest Ljubljana Lodz Prague Stuttgart Venice Padova and Vienna The feasibility studies carried out in these pilot areas focused on the specific morphology of EU urban areas which are often characterised by the presence of historical old towns **Energy Performance of Buildings** Sofia-Natalia Boemi,Olatz Irulegi,Mattheos Santamouris,2015-11-23 This book analyzes the trends and technologies of green and energy efficient building identifying strategies for implementing energy savings and enabling the use of renewable resources in residential commercial healthcare and educational building sectors The authors focus on best practices in temperate climates providing in depth coverage of urban heat island climate change and fuel poverty mitigation through architectural optimization leveraging renewable energy sources and utilization of cutting edge cooling materials Pragmatic emphasis is placed on improving the energy performance of existing building stock to meet short and long term objectives of climate and energy

conservation strategies Engineers architects designers students policy makers and efficiency professionals will all gain valuable insights and ideas from this practical handbook to greening the built environment **Portugal SB07** Luis Bragança,2007 The construction industry is a vibrant and active industry The building sector is responsible for creating modifying and improving the living environment of humanity On the other hand construction and buildings have considerable environmental impacts consuming a significant proportion of limited resources of the planet including energy raw material water and land Therefore the sustainability of the built environment the construction industry and the related activities is a pressing issue facing all stakeholders in order to promote Sustainable Development The new millennium is challenging practitioners and researchers with the sustainability of the built environment and the construction industry Hence the main purpose of this publication is to discuss these challenges and present solutions that actively facilitate and promote the adoption of policies methods and tools to accelerate the movement towards a global sustainable built environment The issues presented include Building sustainability assessment tools Indoor environment quality and benchmarks Sustainable resources and materials use Use of non conventional materials Use of industrial waste Eco materials and technologies Sustainable management of existing building stock Innovative sustainable construction systems and Design **Building in Hot and Humid Regions** Napoleon Enteria,Hazim Awbi,Mat Santamouris,2019-04-26 This book presents an in depth analysis covering climatic and weather conditions house and building development history construction methods and technologies and environmental conditions It provides relevant house and building information and highlights recent advances in hot and humid regions as well as developments in other regions that are relevant to hot and humid climates The countries in hot and humid regions which include the tropical countries the Middle Eastern countries around the Mediterranean and many countries of Central Asia and Africa are home to some of the most challenging conditions in the world in terms of house and building design and construction and in terms of maintaining indoor thermal comfort and air quality in an energy efficient way The book s respective chapters prepared by expert contributors cover essential concepts designs and construction methodologies for houses and commercial buildings As such the book offers a valuable resource for undergraduate and graduate students in architecture and engineering house and building designers and building sciences researchers Building contractors manufacturers and distributors of building equipment and devices and government policymakers and legislators will also benefit from the information provided in this book **Creating Through Mind and Emotions** Mário Ming Kong,Maria do Rosário Monteiro,Maria João Pereira Neto,2022-07-01 The texts presented in Proportion Harmonies and Identities PHI Creating Through Mind and Emotions were compiled to establish a multidisciplinary platform for presenting interacting and disseminating research This platform also aims to foster the awareness and discussion on Creating Through Mind and Emotions focusing on different visions relevant to Architecture Arts and Humanities Design and Social Sciences and its importance and benefits for the sense of identity both individual and
