Excitable Speech Judith Butler,2021-03-29 When we claim to have been injured by language what kind of claim do we make Judith Butler Excitable Speech Excitable Speech is widely hailed as a tour de force and one of Judith Butler s most important books Examining in turn debates about hate speech pornography and gayness within the US military Butler argues that words can wound and linguistic violence is its own kind of violence Yet she also argues that speech is excitable and fluid because its effects often are beyond the control of the speaker shaped by fantasy context and power structures In a novel and courageous move she urges caution concerning the use of legislation to restrict and censor speech especially in cases where injurious language is taken up by aesthetic practices to diminish and oppose the injury such as in rap and popular music Although speech can insult and demean it is also a form of recognition and may be used to talk back injurious speech can reinforce power structures but it can also repeat power in ways that separate language from its injurious power Skillfully showing how language s oppositional power resides in its insubordinate and dynamic nature and its capacity to appropriate and defuse words that usually wound Butler also seeks to account for why some clearly hateful speech is taken to be iconic of free speech while other forms are more easily submitted to censorship In light of current debates between advocates of freedom of speech and no platform and cancel culture the message of Excitable Speech remains more relevant now than ever This Routledge Classics edition includes a new Preface by the author where she considers speech and language in the context contemporary forms of political polarization *Principles of Movement* Ken Ludden,2013-02-17 Principles of Movement is a book in the educational series by the Fonteyn Academy Press It accompanies the Academy Method International Teacher Certificate training program but is quite helpful to all instructors and students of dance The Academy Method is taught at The Margot Fonteyn Academy of Ballet It is based on the fundamental principles of movement as they apply to classical theatrical dancing Carrying forward the teachings of Margaret Craske and her students this is what Dame Margot Fonteyn herself studied so long as she was dancing This book gives the foundation of the complete system of classical theatrical dance practiced and taught at The Margot Fonteyn Academy of Ballet Arrest and Movement H. A. Groenewegen- Frankfort,Henriette A. Groenewegen-Frankfort,1972 *The Division of Literature* Peggy Kamuf,1997-02-15 These questions guide Peggy Kamuf s analysis of the complex history of literary study in the modern university and orient her critical reading of developments from the French Revolution through the nineteenth century and beyond in Europe She then turns to one of the most troubling works in the American literary canon Melville s The Confidence Man to show how academic literary history has avoided confronting the implications of works in which meaning is never solely confined within

Static Forms Shir Alon, 2025-10-28 What does it mean to write a literature of the present In the early twentieth century Arabic and Hebrew writers faced a parallel predicament Modern literature aspired to reflect the contemporary moment yet the Middle Eastern present seemed incompatible with dominant literary forms especially the novel Projects of cultural awakening implied that Arabs and Jews were somehow inhabiting the present wrongly Arabic and Hebrew writers found themselves grappling with the simultaneous necessity and impossibility of narrating the present and achieved strikingly similar literary solutions to this challenge This book develops a new theory of the emergence of modernist literary forms through a series of parallel readings of Arabic and Hebrew prose Situating literary production in projects of modernization settler colonialism and state building Shir Alon traces the proliferation of what she calls static forms These literary forms articulate a modern present experienced as stuck suspended or absent embodying the lived temporalities of Orientalist fantasies of origin regimes of productive and reproductive labor and the routine violence of occupation *Static Forms* positions writers such as Mahmud al Mas'adi Sonallah Ibrahim Elias Khoury Adania Shibli S Y Agnon Y H Brenner and Yeshayahu Koren as innovators and theorists of global modernism writing the present as a series of suspensions of modernity's narrative of progress

Natural Resistance Mechanisms of Plants to Viruses Gad Loebenstein, John Peter Carr, 2007-05-26 Over the course of evolution most plants have acquired the ability to defend themselves against most groups of pathogens including the viruses Many antiviral resistance phenomena have been known and studied for decades but until recently understanding of their underlying mechanisms has lagged behind These phenomena include resistance to infection resistance to virus translocation through the plant recovery from infection and genetically defined resistance together with the associated phenomena of the local lesion response and induced or acquired resistance The identification and cloning of plant resistance genes characterization of downstream signaling components and especially the explosion of data regarding gene silencing mechanisms has led to rapid progress in the investigation of natural resistance phenomena Meanwhile in plant virology there has been remarkable progress in the arenas of replication movement proteins and plasmodesmatal gating and in the discovery of gene silencing suppressors Therefore it seemed timely and appropriate to link older but still important data on the well known classical resistance phenomena with the new information that has emerged during the last decade or so We hope that this book will inspire further research in this area as resistance presents the most economical and environmentally sound approach to control plant virus diseases Future technologies that emerge from this research might include an improved ability to introduce resistance genes into virus susceptible agronomically important cultivars to improve current pathogen derived resistance strategies using our new knowledge of small interfering and microRNAs or to develop targeted chemical treatments
