Arms Beyond Doubt:

Military Technology, Military Strategy and the Arms Race Marek Thee, 2025-03-03 First published in 1986 Military Technology Military Strategy and the Arms Race argues that a principal factor contributing to the arms race is the military research and development R and D sector It traces the arms race since World War II and explores the relationship between the emergence of new weapon technology the development of new weapon systems and their impact on strategic thinking It considers the positions for both the United States and its allies in NATO and for the erstwhile Soviet Union It argues that military R and D which consumes an increasing proportion of total funds spent on R and D has developed a self sustaining technological momentum which is baked by a powerful military industrial bureaucratic technological complex and is increasingly out of control of political leaders The book argues that negotiations to limit the numbers of weapons fail to address the main problem and that more emphasis should be given to considering ways of limiting and controlling military R and D It concludes by proposing a radical shift in policy to achieve this This historical reference work is important for scholars and researchers of military studies defence studies international relations diplomacy and international politics

Arms beyond doubt : the tyranny of weapons technology Ralph Eugene Lapp, Weapons Under Fire Lauren Holland, 2013-11-26 First Published in 1997 In an effort to find the validity of middle ground this book offers a comprehensive analysis that looks further than the House Committee on National Security's actions on the B 2 bomber President Clinton's campaign promise to support the Seawolf submarine and the Pentagon's use of a concurrent and risky management strategy for the 71 6 billion F 22 fighter aircraft program It provides a dissection of the decision making process for a representative sample of major weapons systems to invalidate the claims that pork and malfeasance are both pervasive and determinate

America's Foreign Policy Challenges for the 1980's Ronald Reagan, 1984 **Realism, Strength, Negotiation**, 1984 An anthology of 40 speeches by President Ronald Reagan Vice President George Bush and Secretary of State George Shultz Taken together they represent a comprehensive accounting of the Reagan administration's foreign policy the principles on which it is based its goals and purposes the plans and programs by which it has been advanced and the progress it has made toward achieving its goals The addresses cover each of the regions of the world and the major foreign policy initiatives undertaken by the Reagan administration **Justifying Ballistic Missile Defence** Columba Peoples, 2010 Examines the ways in which views of technology have been used in debates over ballistic missile defence Cooperation and Discord in U.S.-Soviet Arms Control Steve Weber, 2014-07-14 If international cooperation was difficult to achieve and to sustain during the Cold War why then were two rival superpowers able to cooperate in placing limits on their central strategic weapons systems Extending an empirical approach to game theory particularly that developed by Robert Axelrod Steve Weber argues that although nations employ many different types of strategies broadly consistent with game theory's tit for tat only strategies based on an ideal type of enhanced contingent restraint promoted cooperation in U S Soviet arms

control As a theoretical analysis of the basic security behaviors of states the book has implications that go beyond the three bilateral arms control cases Weber discusses implications that remain important despite the end of superpower rivalry An important theoretical analysis of cooperation between the U S and the Soviet Union in the area of arms control An excellent work on a subject that has received very little attention Choice Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Flying Blind Michael E. Brown, 2019-01-24 Flying Blind offers an astute analysis of the role of organizational forces in initiating and shaping weapons programs Michael E Brown concerns himself with how weapons programs begin and why they turn out as they do In the process he redresses a large imbalance in our understanding of how nations arm themselves In an unmatched account constructed from massive archival work and material declassified through the Freedom of Information Act the author provides a detailed description of all fifteen postwar U S strategic bomber programs from the B 35 to the B 2 Challenging the conventional wisdom about arms races and the weapons acquisition process Brown marshals compelling evidence that Air Force reactions to strategic developments not technological opportunism or industry initiative brought about many major innovations in those programs He also discusses competing explanations of the cost schedule and performance problems that plague U S acquisition efforts He maintains that powerful strategic and bureaucratic forces lead American military organizations to set their performance requirements far beyond the state of the art and to push their programs as fast as possible This he argues is a recipe for disaster Developing a comprehensive explanation of the cost and performance problems that plague modern weapons programs he presents policy recommendations designed to address these issues

Strategic Dynamics and Nuclear Weapons Proliferation in South Asia Bhumitra Chakma, 2004 This book analyses India and Pakistan s decision to go nuclear against the odds of Nuclear Non Proliferation Treaty based nuclear order It reflects upon the key factors that contributed to and the process that prompted India and Pakistan s nuclear programmes to take a military orientation which eventually culminated in the May 1998 nuclear tests It also explains the motivation which underscored both India and Pakistan s determination to advance nuclear postures in 1998 that appeared to be inconsistent with the post Cold War global strategic environment Further this book explains why international and regional nuclear non proliferation regimes were ineffective in preventing India and Pakistan from going nuclear
