territory for the cinematic beyond the bounds of familiar filmmaking practices and the traditional theatrical exhibition space. First emerging in the 1960s amidst seismic shifts in the arts, multi-screen films, live cinematic performance, light art, kinetic art, video, and computer-generated imagery all placed under expanded cinema's umbrella re-emerged at the dawn of the 2000s, opening a vast new horizon of possibility for the moving image and perhaps even heralding the end of cinema as we know it. *Cinema Expanded: Avant Garde Film in the Age of Intermedia* offers a bold new account of its subject, breaking from previous studies and from larger trends in film and art scholarship. Author Jonathan Walley argues that expanded cinema's apparent departure from the traditions and forms of cinema as we know it actually radically asserts cinema's nature and artistic autonomy. Walley also resituates expanded cinema within the context of avant-garde film history, linking it to a mode of filmmaking that has historically investigated and challenged the nature and limits of cinematic form. As an outgrowth of this tradition, expanded cinema offered a means for filmmakers within the avant-garde, regardless of their differing styles, formal concerns, and politics, to stake out cinema's unique aesthetic terrain, its ontology, its independence, its identity. In addition to reconsidering the better-known expanded cinema works of the 1960s and 70s by artists like Andy Warhol, Robert Whitman, and Nam June Paik, *Cinema Expanded* also provides the first scholarly accounts of scores of lesser-known works across more than 50 years. Making new arguments about avant-garde cinema in general and its complex meditations on the nature of cinema, it urgently addresses current and crucial debates about the fate of the moving image amidst a digital age of near-constant technological change.

Works of Game John Sharp, 2015-03-06 An exploration of the relationship between games and art that examines the ways that both gamemakers and artists create game-based artworks. Games and art have intersected at least since the early twentieth century, as can be seen in the Surrealists' use of *Exquisite Corpse* and other games, Duchamp's obsession with Chess, and Fluxus event scores and boxes, to name just a few examples. Over the past fifteen years, the synthesis of art and games has clouded for both artists and gamemakers. Contemporary art has drawn on the tool set of videogames but has not considered them a cultural form with its own conceptual, formal, and experiential affordances. For their part, game developers and players focus on the innate properties of games and the experiences they provide, giving little attention to what it means to create and evaluate fine art. In *Works of Game*, John Sharp bridges this gap, offering a formal aesthetics of games that encompasses the commonalities and the differences between games and art. Sharp describes three communities of practice and offers case studies for each: *Game Art*, which includes such artists as Julian Oliver, Cory Arcangel, and JODI; Joan Heemskerk and Dirk Paesmans, who treat videogames as a form of popular culture from which can be borrowed subject matter, tools, and processes; and *Artgames*, created by gamemakers including Jason

Rohrer Brenda Romero and Jonathan Blow explore territory usually occupied by poetry painting literature or film Finally Artists Games with artists including Blast Theory Mary Flanagan and the collaboration of Nathalie Pozzi and Eric Zimmerman represents a more synthetic conception of games as an artistic medium The work of these gamemakers Sharp suggests shows that it is possible to create game based artworks that satisfy the aesthetic and critical values of both the contemporary art and game communities

Australian Artists in the Contemporary Museum Jennifer Barrett,Jacqueline Millner,2016-12-05 This unique book proposes a re reading of the relationship between artists and the contemporary museum In Australia in particular the museum has played a significant role in the colonial project and this has generally been considered as the predominant mode of artists engagement with such institutions and collections Australian Artists in the Contemporary Museum expands the post colonial frame of reference used to interpret this work to demonstrate the broader implications of the relationship between artists and the museum and thus to offer an alternative way of understanding recent contemporary practices The authors central argument is that artists engagement with the museum has shifted from politically motivated critique taking place in museums of fine art towards interventions taking place in non art museums that focus on the creation of knowledge more

broadly Such interventions assume a number of forms including the artist acting as curator art works that highlight the use of taxonomic modes of display and categorization and the re consideration of the aesthetics of collections to suggest different ways of interpreting objects and their history Central to these interventions is the challenge to better connect the museum and its public The book will be essential reading for scholars professionals and students in the fields of contemporary art and museum studies art history and in the museum sector These include artists curators museum and gallery professionals postgraduate researchers art historians designers and design scholars art and museum educators and students of visual art art history and museum studies This project has been assisted by the Australian government through the Australia Council for the Arts its arts funding and advisory body

The Art and Politics of Asger Jorn Karen Kurczynski,2017-07-05 A leading figure of the postwar avant garde Danish artist Asger Jorn has long been recognized for his founding contributions to the Cobra and Situationist International movements yet art historical scholarship on Jorn has been sparse particularly in English This study corrects that imbalance offering a synthetic account of the essential phases of this prolific artist s career It addresses his works in various media alongside his extensive writings and his collaborations with various artists groups from the 1940s through the mid 1960s Situating Jorn s work in an international post Second World War context Karen Kurczynski reframes our understanding of the 1950s away from the Abstract Expressionist focus on individual expression toward a more open ended conception of art as a public engagement with contemporary culture and politics Kurczynski engages with issues of interest to twenty first century artists and scholars highlighting Jorn s proposition that the sensory address of art and its complex relationship to popular media can have a direct social impact Perhaps most significantly this study foregrounds Jorn s assertion that creativity is crucial to subjectivity itself in our increasingly mediated Society of the Spectacle
