Williams,2025-03-15 The Airborne Mafia explores how a small group of World War II airborne officers took control of the US Army after World War II This powerful cadre cemented a unique airborne culture that had an unprecedented impact on the Cold War US Army and beyond Robert F Williams reveals the trials and tribulations this group of officers faced in order to bring about their vision He spotlights the relationship between organizational culture operational behavior and institutional change in the United States Army during the Cold War showing that as airborne officers ascended to the highest ranks of the army they transmitted their culture throughout their service in four major ways civil military relations preparation for potential atomic combat helicopter airmobility and strategic response forces Experiences of training and commanding airborne divisions in World War II led these men to hold sway in army doctrine by the mid 1950s Dominating institutional thought and imparting their values beliefs and norms throughout the service they enjoyed a special privilege within the group culture Williams demonstrates this impact privilege and power by focusing on the paratrooper triumvirate of Matthew Ridgway Maxwell Taylor and James Gavin and the lasting impression they made on how the US Army fought The Airborne Mafia illuminates the power subcultures can have in changing their parent cultures over time particularly one as set in its ways and as large as the US Army With a deft touch deep research and an unwavering eye for the human stories behind organizational change Williams helps explain the existence and importance of the paratrooper mystique that remains within the military still today      Parameters ,1997      Military Intelligence ,1982  
Entrepreneurial Success and Failure in the Aviation Industry Howard G. Jones,1999 This dissertation shows how the history of the Waco Aircraft Company reflects the transformation of the American economy in the twentieth century Beginning just after the First World War its entrepreneur Clayton J Brukner developed a network of relationships within the aviation industry This allowed his company to develop significant competitive advantages in the private flying market Those advantages and the popular appeal of aviation helped Waco to become the largest manufacturer of civilian aircraft by 1929 The transformation of business government relations during the New Deal demanded changes in Brukner s business strategy The depression significantly cut sales of its popular biplanes but Waco kept its Troy Ohio factory open and earned some profits during the downturn Brukner s involvement with the trade associations in the 1930s revealed the critical role the government the military in particular played in the development of aviation His flawed leadership in the changing context led to decisions that degraded the quality of its network signals and diminished Waco s effectiveness in crafting appropriate

policies As the international situation grew increasingly tense throughout the 1930s Waco like other manufacturers turned to exports to enhance sales Contracts with foreign governments partially offset the setback the depression had caused domestically They did not however drive Brukner to evaluate sufficiently Waco s potential participation in the U S military market Only after the Munich Crisis in September 1938 when President Franklin D Roosevelt decided to call for increased military spending did the Waco Aircraft Company position itself to receive defense contracts It was almost three years however before the Army Air Forces directed the company to design and manufacture transport aircraft and cargo gliders In the meantime Brukner had not developed the organizational capabilities needed to manage military contracts **Drop Zone Sicily** William B. **Armor** ,1985      *The Wehrmacht Retreats* Robert M. Citino,2016-09-16 Throughout 1943 the German army heirs to a military tradition that demanded and perfected relentless offensive operations succumbed to the realities of its own overreach and the demands of twentieth century industrialized warfare In his new study prizewinning author Robert Citino chronicles this weakening Wehrmacht now fighting desperately on the defensive but still remarkably dangerous and lethal Drawing on his impeccable command of German language sources Citino offers fresh vivid and detailed treatments of key campaigns during this fateful year the Allied landings in North Africa General von Manstein s great counterstroke in front of Kharkov the German attack at Kasserine Pass the titanic engagement of tanks and men at Kursk the Soviet counteroffensives at Orel and Belgorod and the Allied landings in Sicily and Italy Through these events he reveals how a military establishment historically configured for violent aggression reacted when the tables were turned how German commanders viewed their newest enemy the U S Army after brutal fighting against the British and Soviets and why despite their superiority in materiel and manpower the Allies were unable to turn 1943 into a much more decisive year Applying the keen operational analysis for which he is so highly regarded Citino contends that virtually every flawed German decision to defend Tunis to attack at Kursk and then call off the offensive to abandon Sicily to defend Italy high up the boot and then down much closer to the toe had strong supporters among the army s officer corps He looks at all of these engagements from the perspective of each combatant nation and also establishes beyond a shadow of a doubt the synergistic interplay between the fronts Ultimately Citino produces a grim portrait of the German officer corps dispelling the longstanding tendency to blame every bad decision on Hitler Filled with telling vignettes and sharp portraits and copiously documented *The Wehrmacht Retreats* is a dramatic and fast paced narrative that will engage military historians and general readers alike      **West Point History of World War II** United States Military Academy,2016-11-08 Reader s Digest Endowed Book Fund
