Drug Dependence Current Problems And Issues:

Drug Dependence M.M. Glatt,2012-12-06 Drug dependence according to the 1969 World Health Organization definition is A state psychic and sometimes also physical resulting from the interaction between a living organism and a drug characterized by behavioural and other responses that always include a compulsion to take the drug on a continuous or periodic basis in order to experience its psychic effects and sometimes to avoid the discomfort of its absence Tolerance may or may not be present A person may be dependent on more than one drug The substitution of the term Drug Dependence in place of the previously employed terms Drug Addiction and Drug Habituation was recommended by a WHO Expert Committee in 1964 It was felt that there had been ongoing confusion in the use of the terms addiction and habituation and in particular misuse of the term addiction In 1965 the WHO Expert Committee was pleased to note the generally favourable reaction to the recommendations made in the previous year and the gradual acceptance of the new term In general in subsequent years the term Drug Dependence has gained increasing acceptance Yet it would seem that difficulties may arise whatever term and definition may be used Glatt 1974 and although by and large the newer term seems more appropriate than the older definitions one still often comes across the term Addiction and this not only when discussing the matter with laymen or drug misusers themselves

The Dependence Phenomenon M. Glatt, 2012-12-06 there is scarcely any agent which can be taken into the body to which some individuals will not get a reaction satisfactory or pleasurable to them persuading them to continue its use even to the point of abuse Eddy 1965 Dependence is one of the major problems of our modern society both in industrialized and developing nations There is however nothing new in man s dependence on drugs For many centuries past there can be few people throughout the world who do not overuse misuse or abuse some drugs For many the drugs that are

overused are caffeine from tea or coffee nicotine from tobacco or alcohol from beer wine or spirits all socially accepted normal ingredients of everyday life in most communities For a prescribed medical smaller group misuse concerns commonly substances such as barbiturates amphetamines For an even smaller group there is the less socially acceptable abuse of specific drugs such as morphine and related analgesics cannabis or hallucinogens **Cumulated Index Medicus** ,1977
