dependency In an attempt to answer these questions the State of California established a task force on self esteem and social responsibility in 1987 The aim of this body was to determine what connections might exist between these two factors and to suggest policy guidelines relating to the welfare of Californians and to the expenditure of public resources The ten essays in this volume prepared by faculty members of the University of California draw on research in the social and behavioral sciences to explore these issues They assess the substantive assertions and research findings in the field and make careful evaluations of their reliability and validity In many cases strong connections between self esteem and problematic behavior are established in others the connections are weak and in some the causal relationship is as yet imperfectly understood One of the conclusions of the book is that research on these issues needs to be improved particularly in the areas of comparative and longitudinal studies Guidelines for future research are suggested and some points of policy direction are elaborated These essays may indeed promote additional research for the premise that social stability and welfare are largely dependent on the psychological state of a people poses a challenging and provocative counter emphasis to the assumption that social institutions are the primary determinants of individual welfare
