## Dual Mind And Its Origin:

**History and Power of Mind** Richard Ingalese, 2007-04-01 A great student of the Science of Mind Richard Ingalese frequently lectured on New Thought and topics of mental therapeutics The History and Power of Mind is a collection of many of his lectures and articles first published in 1902 with Ingalese's own annotations and expansions Difficult subjects to wrangle from self control to hypnotism to self healing were not a problem for the articulate and charismatic Ingalese who brings insight and intelligence to esoteric ideas and puts them in a practical and applicable context that demystifies mental and psychic phenomena for the intellectual reader curious about the mind how it works and what it can do American lawyer RICHARD INGALESE b 1854 was a self taught alchemist and proponent of New Thought He claimed to have confected the true Philosopher's Stone which confers immortality and turns common metals into gold and disappeared along with his wife a psychic and healer sometime in the early 20th century Before their disappearance Ingalese authored several articles and books including Fragments of Truth 1921 Astrology and Health 1927 and Cosmogony and Evolution 1907 *The Janus-Face of Language: Where Are the Emotions in Words and the Words in Emotions?* Cornelia Herbert, Thomas Ethofer, Andreas J. Fallgatter, Peter Walla, Georg Northoff, 2018-09-28 Language has long been considered independent from emotions In the last few years however research has accumulated empirical evidence against this theoretical belief of a purely cognitive based foundation of language In particular through research on emotional word processing it has been shown that processing of emotional words activates emotional brain structures elicits emotional facial expressions and modulates action tendencies of approach and avoidance probably in a similar manner as processing of non verbal emotional stimuli does In addition it has been shown that emotional content is already processed in the visual cortex in a facilitated manner which suggests that processing of emotional language content is able to circumvent in depth semantic analysis Yet this is only one side of the coin Very recent research putting words into context suggests that language may also construe emotions and that by studying word processing one can provide a window to one's own feelings All in all the empirical observations support the thesis of a close relationship between language and emotions at the level of word meaning as a specific evolutionary achievement of the human species As such this relationship seems to be different from the one between emotions and speech where emotional meaning is conveyed by nonverbal features of the voice But what does this relationship between written words and emotions theoretically imply for the processing of emotional information The present Research Topic and its related articles aim to provide answers to this question This book comprises several experimental studies investigating the brain structures and the time course of emotional word processing Included are studies examining the affective core dimensions underlying affective word processing and studies that show how these basic affective dimensions influence word processing in general as well as the interaction between words feelings and expressive behavior In addition new impetus comes from studies that on the one hand investigate how task sublexical and intrapersonal factors influence emotional word processing and on the other hand

extend emotional word processing to the domains of social context and self related processing Finally future perspectives are outlined including research on emotion and language acquisition culture and multilingualism In summary this textbook offers scientists from different disciplines insight into the neurophysiological behavioral and subjective mechanisms underlying emotion and language interactions It gives new impulses to existing theories on the embodiment of language and emotion and provides new ways of looking at emotion cognition interactions *The Theosophical Forum* ,1896 The Annals of Psychical Science ,1908 **Duat** Frederick Guttmann, There is a famous quote that says I don t know what life is but I know perfectly well when my dog is dead Every person has asked themselves at least once since their youth elementary things about existentialism Questions such as who am I What do I do here What should I do with my life Or what will happen after this life This is so important for our being that many do not hesitate to consult fortune tellers so that even to a certain degree they could calm that intrigue What we call death is part of these big questions Unfortunately for most this is the big question that at least officially or popularly lacks further answers The majority of the population may not want to think about this since an uncomfortable and even terrible fear restlessness and uncertainty invade their being However there is no shortage of seeing dead people in action or drama films and in one way or another the gore horror and crime drama genres are quite seductive for many We are aware that within us there is something that intrigues us about the Beyond a mix of intrigue respect fear and deep curiosity We all want to believe in one way or another that there is something beyond this life We all want to last to be long lived young immortal eternal When we are faced with the possibility of death that is where our inner being unequivocally says with complete honesty Father why have you forsaken me This phrase from Yeshua Jesus of Nazareth does not focus on him and his moment of alleged agony on the cross but on an unquestionable truth about how man is forced to bow before the emotional and psychological abyss that represents the complete feeling of vulnerability uncertainty fear panic loneliness and abandonment that represent the doors of the Beyond What would be the point of living for a while and then ceasing to exist How can life be a gift if when I have barely managed to enjoy something illness comes then old age and finally death Or how can I have confidence or certainty in something if you don t know if illness disability or death will visit you tomorrow What if you could know what lies beyond the threshold of death Would you be willing to believe in the possibility that your being will continue to exist once it leaves the bodily vehicle What if the body is just a dress for something else that can move through other dimensions and be reborn a thousand and thousands of times until eternity What if our destiny is to become superior beings who transcend death and become gods If you are willing to give rise to this possibility this work will surely interest you *The History and Power of Mind* Richard Ingalese,1905 **Clairvoyance and Clairaudience - Premonitions and Impressions** Edward B. Warman,1995-12 The Roots of Vedānta Śaṅkarācārya,2012 This erudite and wide ranging anthology offers a panoramic view of Vedānta in Sankara s own words with selections from standard translations of his commentaries on the Upaniads the Brahma sūtra Vedānta sūtra and the Bhagavad

g t texts which together form the scriptural canon of Ved nta and an independent treatise the Upade a S hasri on whose authenticity there is unanimity Exhibiting a deep empathy with the living tradition Sudhakshina has selected passages that explain all the important concepts and teachings including up to date deliberations on a kara Her general and sectional introductions illuminate and demystify the esoteric concepts **The Early Origins of the Social Sciences** Lynn

McDonald,1996 This study traces the methodological foundations research techniques and basic concepts of the social sciences from their earliest origins to the beginning of 20th century It discusses the French Enlightenment British moral philosophy and includes figures from the 19th century such as Marx *The Cambridge Companion to Mill* John

Skorupski,1998-01-13 A systematic and up to date account of the many facets of Mill s thought and influence

**Overcoming Your Alcohol, Drug & Recovery Habits** James DeSena,2002-09-01 Recognizing that an addiction to 12 step programs can be just as dangerous as an addiction to alcohol or drugs this book provides techniques to counter the self defeating beliefs that lead to addiction It enables those who have gone through Alcoholics Anonymous Narcotics Anonymous and formal 12 step addiction treatments to overcome the self destructive beliefs and attitudes that these programs promote These include the idea that addicts and alcoholics are powerless the belief that addiction is an incurable disease the assertion that people who slip inevitably lose control and the notion that those who reject the 12 step approach are doomed Devoted to helping individuals indoctrinated in 12 step dogma recognize their destructiveness this book provides effective psychological techniques to vanquish negative thinking and help individuals regain control of their lives *Secrets of the Light* Flora

Paul,2001-08 Secrets of the Light Provides the Bible student with fresh insight into the many levels of truth encoded in the Bible Provides the Biblical scholar with an abundance of references on Bible interpretation Provides everyone with an understanding of how light has been used in the Bible as a metaphor to pass wisdom down through generations who have often not understood its deeper meaning In Secrets of the Light author Flora E Paul first relates how her own evolution of religious understanding brought greater personal peace and fulfillment She then explores the meaning she has discovered hidden in plain sight within the symbolism used by the Bible She explains how the same profound truths are being provided to us through many different sources Secrets of the Light also provides an introduction to Theosophy an ancient blending of science and religion that gained wide attention early this century as the controversial Madame Blavatsky promoted it around the world As one of few books examining Theosophy that is not published by the Theosophical Society it speaks truthfully about differing biblical interpretations within the movement and how they compare with both modern scientific fact and mainstream Christian teachings *Phenomenology World-Wide* Anna-Teresa Tymieniecka,2014-11-14 Phenomenology is the philosophy of our times Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl Now its seminal ideas have been handed over to a new era The worldwide contributors to this volume make it manifest that phenomenological

inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology's universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl's project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond The key concepts and phases of Husserl's thought are here exfoliated Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated Phenomenology's geographic spread is reviewed We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences Lastly the phenomenological project's new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon Here is the movement's vanguard This collection has 71 entries Each entry is followed by a relevant bibliography There is a helpful Glossary of Terms and an Index of Names

*The Urantia Book* , 2008-06-28 You have just discovered the

literary masterpiece that answers your questions about God life in the inhabited universe the history and future of this world and the life of Jesus The Urantia Book harmonizes history science and religion into a philosophy of living that brings new meaning and hope into your life If you are searching for answers read The Urantia Book The world needs new spiritual truth that provides modern men and women with an intellectual pathway into a personal relationship with God Building on the world s religious heritage The Urantia Book describes an endless destiny for humankind teaching that living faith is the key to personal spiritual progress and eternal survival These teachings provide new truths powerful enough to uplift and advance human thinking and believing for the next 1000 years A third of The Urantia Book is the inspiring story of Jesus entire life and a revelation of his original teachings This panoramic narrative includes his birth childhood teenage years adult travels and adventures public ministry crucifixion and 19 resurrection appearances This inspiring story recasts Jesus from the leading figure of Christianity into the guide for seekers of all faiths and all walks of life     The Law Of Mental Medicine  
Thomson Jay Hudson,1903 The object of this book is primarily to assist in placing mental therapeutics on a firmly scientific basis and incidentally to place within the reach of the humblest intellect the most effective methods of healing the sick by mental processes Part I contains nothing new to the scientific world except perhaps the method of treatment It pertains solely to the psychological principles of mental medicine In Part II the fact is for the first time recognized that no hypothesis can possibly embrace a complete science of mental therapeutics that fails to take cognizance of those facts of physiology and histology which pertain to the subject matter     **The Sunday Magazine** ,1876
