Foxcroft,David Sibley,2022-12-29 Originally published in 1993 Adolescent Drinking and Family Life portrays teenage drinking not as a symptom of pathology but as a perfectly normal developmental phase within the context of the home environment Drinking is predominantly social behaviour and the family is seen as a major agent of socialization The authors have therefore explored family dynamics and the influence which the home environment has upon adolescent drinking to come up with a new theoretical model A major feature of this approach is the interaction of ideas from family life psychology and human geography The authors present a typology of domestic regimes illustrated by case studies of boundary enforcement and transgression The general theme of boundary transgression applied here to both the psychosocial environment and built form represents an interesting new theoretical perspective The integration of these two fields is an innovation which should stimulate further interdisciplinary work in adolescence and addiction research Adolescent Drinking and Family Life will be interesting to researchers and practitioners in adolescence family dynamics and alcohol as well as any social scientist with an interest in the link between behaviour and the home environment This new approach had important implications for health education and for interventions concerned with adolescent alcohol use at the time Today it can be read in its historical context *Riffraff and Other Stories About the Nomadic Life of a Texas Oilfield Brat.* Carol Mogensen,2015-06-19 Carol Mogensen begins a chronicle of her nomadic life by describing her family s wandering from one Texas oil boom town to another during the 1940s These wanderings over the dry Texas plains instilled in her a thirst for adventure and led to living in Puerto Rico and ultimately on a small island in Alaska She titles her book Riffraff as that is the way many residents of the small Texas farming communities whee cotton fields sat stop oil fields viewed the influx of nomadic oilfield workers into their communities Although some may consider her early years a hard scrabble existence she describes a childhood of being led into mischief by an older brother with humor Other stories describe the experience of being the first woman to parachute with Sky Divers in Potter County in 1960 a car trip through Mexico in 1961 with her college roommate an unpleasant incident at the notorious Jack Ruby s nightclub in Dallas the pathos of loss of a loved one to suicide and starting a new life with a new love in southeast Alaska delivering supplies to remote island locations **Human connection as a treatment for addiction** Andrea D. Clements,Human-Friedrich Unterrainer,Christopher C. H. Cook,2023-01-30 **Alcohol Health and Research World** ,1983 **One Man's Destiny** Walter M. Bachman,Katherine N. Wadsworth,Patrick M. O'Malley,Lloyd D. Johnston,John E. Schulenberg,2013-06-17 Why do some young adults substantially change their patterns of smoking drinking or illicit drug use after graduating from high school In this book the authors show that leaving high school and leaving home create new freedoms that are linked to increases in the use of cigarettes alcohol marijuana and cocaine They also show that marriage pregnancy and parenthood create new responsibilities that are linked to decreases in drug use The research is based on more than 33 000 young people followed from high school through young adulthood by the nationwide Monitoring the Future project Every two years participants reported on their drug use as well as their schooling employment military service living arrangements marriages pregnancies parenthood and even their divorces The unique qualities of this research large

nationally representative samples follow ups extending up to 14 years beyond high school and multiple approaches to analysis and data presentation allowed the examination of several important influences simultaneously while retaining much of the rich detail encountered in the real world On the whole the results are encouraging suggesting that the potentials for change and improvement during the transition to adulthood are as important as the detrimental effects of problem behavior in adolescence This research is a must read for anyone concerned with how new freedoms and responsibilities impact adolescents young adults and the use of licit and illicit drugs *Thinking about Drinking* United States. Children's Bureau,1968 Catholic pamphlet **Thinking about Drinking** ,1972 *College Drinking* George W. Dowdall,2023-07-03

Drinking is recognized as one of the most important problems confronting students on campus today with major impacts on health and safety This book answers crucial questions about why students drink examines its complex links to campus crime and sexual assault and offers new insights on how to address the issue It differs from other studies of college drinking by dispelling the myth that the problem is universal Dowdall s research reveals that the incidence of alcohol abuse varies enormously between colleges and in doing so identifies interventions and policies that have been effective and those that have failed His study is also unique in looking upstream at the broader cultural organizational and social forces that shape this behavior where most studies focus only on downstream behaviors well after students have selected their college and have started drinking Students and parents can take action to lower the risk of binge drinking by following the book s recommendations and consulting the data it provides about alcohol violations and crime at thousands of colleges For administrators and student affairs personnel it both defines and illuminates the issue and outlines effective interventions
