Fatal Accident Reporting System. Annual Report 1984 ,1986 *Human Behavior and Traffic Safety* Leonard Evans,2012-12-06 This volume contains the papers and discussions from a Symposium on Human Behavior and Traffic Safety held at the General Motors Research Laboratories on September 23-25 1984 This Symposium was the twenty ninth in an annual series sponsored by the Research Laboratories Initiated in 1957 these symposia have as their objective the promotion of the interchange of knowledge among specialists from many allied disciplines in rapidly developing or changing areas of science or technology Attendees characteristically represent the academic government and industrial institutions that are noted for their ongoing activities in the particular area of interest of this Symposium was to focus on the role of human behavior The objective in traffic safety In this regard a clear distinction is drawn between on the one hand human behavior and on the other human performance Human performance at the driving task or what the driver can do has been the subject of much research reported in the technical literature Although clearly of some relevance questions of performance do not appear to be central to most traffic crashes Of much more central importance is human behavior or what the driver in fact does This is much more difficult to determine and is the subject of the Symposium **Trends in**
