Medications can be prescribed to patients by physicians, nurse practitioners, or physician's assistants to be taken at home. However, it is also possible that prescription and non-prescription over-the-counter (OTC) drugs may be administered by healthcare staff, nurses, trained medication aides, medical assistants, pharmacists, and other trained professionals in hospitals, clinics, nursing homes, assisted living facilities, schools, camps, group homes, hospice, and during in-home care services. Most of the pediatric drug doses are based on age or weight, and the dose can be adjusted depending upon the child's clinical response.
