M. Forster's Material Humanism* Nour Dakkak, 2023-12-22 Through attending to the nonhuman E M Forster's *Material Humanism* *Queer Matters* places Forster's fiction in conversation with contemporary debates concerned with the intersection of neomaterialism environmental humanities and queer ecology The book revisits Forster's liberal humanism from a materialist perspective by focusing on humans embodied activities in artificial and natural environments By examining the everyday embodied experiences of characters the book thus brings to the fore insignificant and sometimes overlooked aspects in Forster's fiction It also places importance on the texts treatment of queer intimacy as an embodied experience that can transcend sexual desire The book acknowledges nonhuman agency as central to our understanding of queerness in Forster's texts and studies the representation of formless matters such as dust as a way through which Forster's ecological concerns arise by linking the fate of oppressed humans with oppressed nonhuman others      Forster Collection South Kensington Museum. Donald M. Hassler, Clyde Wilcox, 2008 This book offers an interpretation of the evolution of a growing genre in literary film and television As a follow up to their 1997 collection Political Science Fiction Hassler and Wilcox have assembled twenty four noted international scholars representing diverse fields of inquiry to assess the influential voices and trends from the past decade in New Boundaries in Political Science Fiction The terrors and technologies that permeate our daily lives have changed radically in the past decade further highlighting the underlying speculations on our contested future that remain the core of this genre In surveying the vast expanse of politically charged science fiction of recent years the editors posit that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive linear changes or progress or from a continuous return to primitive realities of war death and the competition for survival The discussion of political implications ranges among writers from H G Wells Robert A Heinlein Ursula Le Guin and Isaac Asimov to more radical recent voices such as Iain M Banks William Gibson Joanna Russ Philip K Dick and China Mieville While emphasizing the literature the collection also addresses political science fiction found on film and television from the original Star Trek through the newest incarnation of Battlestar Galactica
