 Birkett,2017-03-27 Reading the Runes in Old English and Old Norse Poetry is the first book length study to compare
 responses to runic heritage in the literature of Anglo Saxon England and medieval Iceland The Anglo Saxon runic script had
 already become the preserve of antiquarians at the time the majority of Old English poetry was written down and the
 Icelanders recording the mythology associated with the script were at some remove from the centres of runic practice in
 medieval Scandinavia Both literary cultures thus inherited knowledge of the runic system and the traditions associated with
 it but viewed this literate past from the vantage point of a developed manuscript culture There has as yet been no
 comprehensive study of poetic responses to this scriptural heritage which include episodes in such canonical texts as Beowulf
 the Old English riddles and the poems of the Poetic Edda By analysing the inflection of the script through shared literary
 traditions this study enhances our understanding of the burgeoning of literary self awareness in early medieval vernacular
 poetry and the construction of cultural memory and furthers our understanding of the relationship between Anglo Saxon and
 Norse textual cultures The introduction sets out in detail the rationale for examining runes in poetry as a literary motif and
 surveys the relevant critical debates The body of the volume is comprised of five linked case studies of runes in poetry
 viewing these representations through the paradigm of scriptural reconstruction and the validation of contemporary literary
