these results would rarely happen again The Confederacy had to struggle to place artillery and ammunition in the field The Union had on hand 4 167 pieces of artillery of which only 163 were field guns When the rebels took over Federal arsenals in the south they acquired a considerable amount of heavy guns but only 35 much needed field pieces Most of the country s powder mills were located in the North and little ammunition had been made in the South for some fifty years Starting almost from scratch the South built some remarkably efficient mills and arsenals to meet the demands Those four short years reshaped the military in many ways the tactics of the artillery and how it was utilized is still being studied today The artillery seldom received the grandeur of the cavalry and infantry but it was those lethal iron projectiles which softened up the enemy to allow the charges and attacks Take a trip through time beginning with the infancy of artillery during the American Revolution until the final shots were fired at Appomattox Most of the major battles are visited along with some lesser engagements and the role that the artillery played regarding their outcome With over 500 photographs many previously unpublished the reader will get a real feel what it was like to serve with the artillery during the Civil War Back cover
