Proceedings ,2002 *Software Engineering Techniques: Design for Quality* Krzysztof Sacha,2007-01-15 The aim of software engineering is to find methods for developing high quality software products at a reasonable cost As more and more computers are being used in areas in which a malfunction of the system can be a source of serious losses or disturbances to the functioning of the society the quality of software becomes a more and more critical factor of business success human security and safety Examples of such application areas are enterprise management public administration and social insurance or post delivery services The quality of services offered to the society depends on the quality of software systems that support the functioning of the respective public or private organizations service providers Software engineering consists of a selection of methods and techniques that vary from project to project and evolve in time The purpose of this volume is to provide an overview of the current work in software development techniques that can help with enhancing the quality of software The chapters of this volume organized by key topic area create an agenda for the IFIP Working Conference on Software Engineering Techniques SET 2006 The seven sections of the volume address the following areas software architectures modeling project management software quality analysis and verification methods data management and software maintenance *Software Engineering and Formal Methods* Alexandre Madeira,Alexander Knapp,2024-11-25 This book constitutes the refereed proceedings of the 22nd International Conference on Software Engineering and Formal Methods SEFM 2024 held in Aveiro Portugal during November 6 8 2024 The 23 full papers included in this book were carefully reviewed and selected from 68 submissions The topics covered range from formal modelling specification and design in software development over safety critical fault tolerant and secure systems to real time hybrid and cyber physical systems and quantum computing *Cumulated Index to the Books* ,1999 *Formal Methods and Software Engineering* Adrian Riesco,Min Zhang,2022-10-09 This book constitutes the proceedings of the 23rd International Conference on Formal Engineering Methods ICFEM 2022 held in Madrid Spain in October 2022 The 16 full and 4 short papers presented together with 1 doctoral symposium paper in this volume were carefully reviewed and selected from 41 submissions The papers cover for research in all areas related to formal engineering methods such as verification and validation software engineering formal specification and modeling software security and software reliability *Software Engineering Research and Applications* C.V. Ramamoorthy,Roger Y. Lee,Kyung Whan Lee,2004-05-05 It was our great pleasure to extend a welcome to all who participated in SERA 2003 the rst world classs International Conference on Software Engineering Research and Applications which was held at Crowne Plaza Union Square Hotel San Francisco California USA The conference was

sponsored by the International Association for Computer and Information Science ACIS in cooperation with the Software Engineering and Information Technology Institute at Central Michigan University This conference was aimed at discussing the wide range of problems encountered in present and future high technologies In this conference we had keynote speeches by Dr Barry Boehm and Dr C V Ramamoorthy and invited talks by Dr Raymond Yeh Dr Raymond Paul Dr Mehmet S ahinoglu which were fruitful to all who participated in SERA 2003 We would like to thank the publicity chairs and the members of our program committee for their work on this conference We hope that SERA 2003 was enjoyable for all participants

Grid and Cooperative Computing Minglu Li, Xian-He Sun, Qianni Deng, Jun Ni, 2004-04-19 Grid and cooperative computing has emerged as a new frontier of information technology It aims to share and coordinate distributed and heterogeneous network resources for better performance and functionality that can otherwise not be achieved This volume contains the papers presented at the 2nd International Workshop on Grid and Cooperative Computing GCC 2003 which was held in Shanghai P R China during December 7-10 2003 GCC is designed to serve as a forum to present current and future work as well as to exchange research ideas among researchers developers practitioners and users in grid computing Web services and cooperative computing including theory and applications For this workshop we received over 550 paper submissions from 22 countries and regions All the papers were peer reviewed in depth and qualitatively graded on their relevance originality significance presentation and the overall appropriateness of their acceptance Any concerns raised were discussed by the program committee The organizing committee selected 176 papers for conference presentation full papers and 173 submissions for poster presentation short papers The papers included herein represent the forefront of research from China USA UK Canada Switzerland Japan Australia India Korea Singapore Brazil Norway Greece Iran Turkey Oman Pakistan and other countries More than 600 attendees participated in the technical section and the exhibition of the workshop

Engineering and Deployment of Cooperative Information Systems Yanbo Han, Stefan Tai, Dietmar Wikarski, 2003-08-02 Today technologies for engineering and deployment of cooperative information systems have become increasingly critical in the construction of practically all types of large scale distributed systems Stimulating forums with different focuses are thus still in need of researchers and professionals from academia and industry to exchange ideas and experience and to establish working relationships The idea to organize in China an academic event focusing on current topics in the field was born during the IFIP World Computer Congress 2000 that was held in Beijing China And here are the proceedings of EDCIS 2002 This volume comprises the technical research papers accepted for presentation at EDCIS 2002 Of the initial 159 paper submissions involving nearly 500

authors from 14 countries of all continents 45 papers were carefully selected Every paper was reviewed by at least three members of the program committee and judged according to its technical merit and soundness originality significance presentation quality and relevance to the conference The accepted papers cover various subjects such as workflow technology coordination technology advanced transactions groupware systems semantic web ontologies mobile agents and enterprise modeling and enterprise application integration
