## **Circles Fifty Round Trips Through History Technology Science Culture:**

**Circles** James Burke, 2000      **Circles** James Burke, 2009-11-24 From the bestselling author of *The Knowledge Web* come fifty mesmerizing journeys into the history of technology each following a chain of consequential events that ends precisely where it began Whether exploring electromagnetic fields the origin of hot chocolate or DNA fingerprinting these essays which originally appeared in James Burke's popular *Scientific American* column all illustrate the serendipitous and surprisingly circular nature of change In *Room with Half a View* for instance Burke muses about the partly obscured railway bridge outside his home on the Thames Thinking of the bridge engineer who also built the steamship that laid the first transatlantic telegraph cable causes him to recall Samuel Morse which in turn conjures up Morse's neighbor firearms inventor Sam Colt and his rival Remington One dizzying connection after another leads to Karl Marx's daughter who attended Socialist meetings with a trombonist named Gustav Holst who once lived in the very house that blocks Burke's view of the bridge on the Thames Burke's essays all evolve in this organic manner highlighting the interconnectedness of seemingly unrelated events and innovations Romantic poetry leads to brandy distillation tonic water connects through Leibniz to the first explorers to reach the North Pole Witty instructive and endlessly entertaining *Circles* expands on the trademark style that has captivated James Burke fans for years This unique collection is sure to stimulate and delight history buffs technophiles and anyone else with a healthy intellectual curiosity      **Connections** James Burke, 2012-02-21

*Connections* is a brilliant examination of the ideas inventions and coincidences that have culminated in the major technological achievements of today How did the popularity of underwear in the twelfth century lead to the invention of the printing press How did the waterwheel evolve into the computer How did the arrival of the cannon lead eventually to the development of movies In this highly acclaimed and bestselling book James Burke brilliantly examines the ideas inventions and coincidences that have culminated in the major technological advances of today With dazzling insight he untangles the pattern of interconnecting events the accidents of time circumstance and place that gave rise to the major inventions of the world Says Burke My purpose is to acquaint the reader with some of the forces that have caused change in the past looking in particular at eight innovations the computer the production line telecommunications the airplane the atomic bomb plastics the guided rocket and television which may be most influential in structuring our own futures Each one of these is part of a family of similar devices and is the result of a sequence of closely connected events extending from the ancient world until the present day Each has enormous potential for humankind's benefit or destruction Based on a popular TV documentary series *Connections* is a fascinating scientific detective story of the inventions that changed history and the surprising links that connect them      **Teaching Multiwriting** Robert L. Davis, Mark F Shadle, 2007-04-23 Formulaic ways to train students in composition and rhetoric are no longer effective say authors Robert L Davis and Mark F Shadle Scholar teachers must instead reinvent the field from the inside *Teaching Multiwriting Researching and Composing with Multiple Genres Media*

Disciplines and Cultures presents just such a reinvention with multiwriting an alternative open approach to composition Seeking to open the minds of both writers and readers to new understandings the authors argue for the supplanting of the outdated research paper assignment with research projects that use multiple forms to explore questions that cannot be fully answered This innovative volume geared to composition teachers at all levels includes sixteen helpful illustrations and provides classroom exercises and projects for each chapter

**Island in a Storm** Abby Sallenger, 2009-06-02 In the mid nineteenth century the Isle Derniere was emerging as an exclusive summer resort on the coast of the Gulf of Mexico About one hundred miles from New Orleans it attracted the most prominent members of antebellum Louisiana society Hundreds of affluent planters and merchants retreated to the island not just for its pleasures but also to escape the scourge of yellow fever epidemics that ravaged cities like New Orleans each summer Then without warning on August 10 1856 a ferocious hurricane swept across the island killing half of its four hundred inhabitants The Isle Derniere was left barren except for a strange forest standing in the surf Drawing from a rich trove of newspaper articles letters diaries and interviews Abby Sallenger re creates the chain of events that led a group of people to seek refuge on an exposed strip of land in the sea He chronicles the dramatic course of the hurricane itself as seen through the eyes of a diverse cast of real life characters including eighteen year old Emma Mille her French father a steamboat captain a pastor and a slave Island in a Storm is the story of their bravery and cowardice luck and misfortune life and death At the heart of this narrative lies another equally compelling story Sallenger an oceanographer traces the insidious link between the environmental deaths across the Mississippi delta and the human deaths that occurred when the storm

swept ashore The result is a fascinating portrait of a coast in perpetual motion and a rising sea that made the Isle Derniere particularly vulnerable to a great hurricane Ultimately Island in a Storm is a cautionary environmental tale Global warming is spreading the unique hazards of river deltas to coasts around the world and the signs of what happened to Isle Derniere may soon be appearing on other islands The account of this nineteenth century disaster and its aftermath offers a vital historical lesson as we continue to develop precarious coastal locations whose vulnerability will only grow as sea levels rise across the globe
