Difference and Orientation Alexander Kluge, 2019-09-15 Alexander Kluge is one of contemporary Germany's leading intellectuals and artists. A key architect of the New German Cinema and a pioneer of auteur television programming, he has also cowritten three acclaimed volumes of critical theory published countless essays and numerous works of fiction and continues to make films even as he expands his video production to the internet. Despite Kluge's five decades of work in philosophy, literature, television, and media politics, his reputation outside of the German-speaking world still largely rests on his films of the 1960s, 70s, and 80s. With the aim of introducing Kluge's heterogeneous mind to an Anglophone readership, *Difference and Orientation* assembles thirty of his essays, speeches, glossaries, and interviews revolving around the capacity for differentiation and the need for orientation toward ways out of catastrophic modernity. This landmark volume brings together some of Kluge's most fundamental statements on literature, film, pre- and post-cinematic media, and social theory, nearly all for the first time in English translation. Together, these works highlight Kluge's career-spanning commitment to unorthodox essayistic thinking.

The Semiotic Sphere Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre-Socratic times in the West, and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions, semiotics as an organized undertaking began to bloom only in the 1960s. Workshops materialized with a perhaps surprising spontaneity over much of Europe, Eastern and Western, and in North America. Thereafter, others quickly surfaced almost everywhere over the literate globe. Different places strategically allied themselves with different legacies, but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems, their comparative analysis, and their classification. More or less permanent confederations were forged with the most diverse academic disciplines, and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward. Bit by bit, mutually supportive international networks were put together. Today, it can truly be asserted that semiotics has become a global enterprise. This, of course, is far from saying that the map is uniform or even that world-wide homogeneity is in the least desirable. While our conjoint ultimate goal remains steadily in focus, the multiplicity of avenues available for its realization is inherent in the adventure of the search itself.

Media, Culture and Conflict in Africa Osakue Stevenson Omoera, 2023-03-28 This volume brings together a range of views and arguments that healthily contribute to global conversations on media, culture, and conflict in Africa. It explores how cultural practices, media practices, social movements, and the possibilities of emerging technologies could be ventilated and directed towards remediating the perilous state of affairs in political, social, and economic spaces in contemporary Africa. As the intersection of culture and conflict is relatively underexplored or underresearched in African

media studies this book makes an important contribution to the field
