The Citadel of the Autarch Gene Wolfe, 1982 **The Citadel of the Autarch** Gene Wolfe, 2011-09-29 Severian the Torturer continues his epic journey across the lands of Urth carrying with him the Claw of the Conciliator and the great sword Terminus Est All his travels are leading towards a destiny that he dare not refuse Winner of the John W Campbell Award for best novel 1984 *Attending Daedalus* Peter Wright, 2003-10-01 This new study of the fiction of Gene Wolfe one of the most influential contemporary American science fiction writers offers a major reinterpretation of Gene Wolfe's four volume *The Book of the New Sun* and its sequel *The Urth of the New Sun* After exposing the concealed story at the heart of Wolfe's magnum opus Wright adopts a variety of approaches to establish that Wolfe is the designer of an intricate textual labyrinth intended to extend his thematic preoccupations with subjectivity the unreliability of memory the manipulation of individuals by social and political systems and the psychological potency of myth faith and symbolism into the reading experience **The Generation Starship in Science Fiction** Simone Caroti, 2014-01-10 This critical history explores the concept of the multi generational interstellar space voyage in science fiction between 1934 the year of its appearance into the 21st century It defines and analyzes what became known as the generation starship idea and examines the science and technology behind it also charting the ways in which generation starships manifest themselves in various SF scenarios It then traces the history of the generation starship as a reflection of the political historical and cultural context of science fiction's development *Solar Labyrinth* Robert Borski, 2004 Gene Wolfe's *BOOK OF THE NEW SUN* has been hailed by both critics and readers as quite possibly the best science fiction novel ever written And yet at the same time like another masterpiece of fiction James Joyce's *Ulysses* it's been deemed endlessly complex and filled with impenetrable mysteries Now however in the first book length investigation of Wolfe's literary puzzlebox Robert Borski takes you inside the twisting corridors of the tetralogy and along the way reveals his solutions to many of the novel's conundrums and riddles such as who really is Severian's lost twin sister almost certainly not who you think and why he believes the novel's main character may not even be the torturer Severian Furthermore and in essay after essay Borski demonstrates how a single master key will unlock many of the book's secret relationships all in the attempt to guide you through the labyrinth that is Gene Wolfe's *BOOK OF THE NEW SUN* **Shadows of the New Sun** Peter Wright, Peter Ronald Wright, 2007 Gene Wolfe is one of America's most acclaimed fantasy and science fiction writers This collection celebrates Wolfe's forty year writing career by bringing together all of the major interviews Wolfe gave between 1973 and 2003 and publishing for the first time his series of essays on the art of writing the future of libraries and the practicalities of reviewing fiction **BOOK JACKET** *Library Journal*, 1983-07 *On SF* Thomas M. Wizards, Aliens, and Starships Charles L. Adler,2014-02-02 A great book by itself or as a starting point for exploring the

physics of space exploration as well as the classics in science fiction Robert Schaefer New York Journal of Books From teleportation and space elevators to alien contact and interstellar travel science fiction and fantasy writers have come up with some brilliant and innovative ideas Yet how plausible are these ideas for instance could Mr Weasley s flying car in the Harry Potter books really exist Which concepts might actually happen and which ones wouldn t work at all Wizards Aliens and Starships delves into the most extraordinary details in science fiction and fantasy such as time warps shape changing rocket launches and illumination by floating candle and shows readers the physics and math behind the phenomena With simple mathematical models and in most cases using no more than high school algebra Charles Adler ranges across a plethora of remarkable imaginings from the works of Ursula K Le Guin to Star Trek and Avatar to explore what might become reality Adler explains why fantasy in the Harry Potter and Dresden Files novels cannot adhere strictly to scientific laws and when magic might make scientific sense in the muggle world He examines space travel and wonders why it isn t cheaper and more common today Adler also discusses exoplanets and how the search for alien life has shifted from radio communications to space based telescopes He concludes by investigating the future survival of humanity and other intelligent races Throughout he cites an abundance of science fiction and fantasy authors and includes concise descriptions of stories as well as an appendix on Newton s laws of motion Voice of Youth Advocates ,1983
