*Renewing Cities* Ross J. Gittell, 2014-07-14 The cities of Lowell and New Bedford in Massachusetts Jamestown in New York and McKeesport in Pennsylvania have all undergone years of adversity and decline their economic bases having been badly damaged by structural changes in the national economy particularly in the manufacturing sector In situations like these can local development efforts make a difference Ross Gittell answers in the affirmative This interdisciplinary work focuses on comparative case studies of the four cities The book reveals how public private and community based local economic development initiatives affect local economic performance what works and what does not work City leaders and institutions can help reorganize and reshuffle local resources with results that include increased investment greater effort by local individuals and institutions more cooperation among different development interests and improvement in city economic positioning relative to the regional economy and local development cycles Gittell emphasizes the possibility of shifting from a zero sum game attracting jobs from elsewhere toward the goal of converting underutilized local resources to higher value uses through alternative forms of economic and political organization Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Internal Revenue Service, 1989 Conservation and the City Peter Larkham, 2002-03-11 It is a widely held belief that cities must change or they will wither and die One of the key problems of urbanization is how to cope with these changes while retaining the structures constructed and maintained by previous generations Conservation and the City is a study of conservation and change throughout the built environment city centres suburbs and even tiny villages and how the activities of conservation interact with the planning system Using detailed case studies from Britain and the Westernized world the author examines some of the key social economic and psychological ideas which support conservation as well as studying the urban landscape and the agents of change Conservation and the City seeks to understand urban conservation and in doing so presents possible solutions for managing change in the built environment of the future

*Our New Way Round the World* Charles Carleton Coffin, 1881 The Emerging Asian City Vinayak Bharne, 2012-11-12 The Asian urban landscape contains nearly half of the planet's inhabitants and more than half of its slum population living in some of its oldest and densest cities It encompasses some of the world's oldest civilizations and colonizations and today contains some of the world's fastest

growing cities and economies As such Asian cities create concomitant imagery polarizations of poverty and wealth blurred lines between formality and informality and stark juxtapositions of ancient historic places with shimmering new skylines This book embraces the complexity and ambiguity of the Asian urban landscape and surveys its bewildering array of multifarious urbanities and urbanisms Twenty four essays offer scholarly reflections and positions on the complex forces and issues shaping Asian cities today looking at why Asian cities are different from the West and whether they are treading a different path to their futures Their combined narrative spanning from Turkey to Japan and Mongolia to Indonesia is framed around three sections Traditions reflects on indigenous urbanisms and historic places Tensions reflects on the legacies of Asia s East West dialectic through both colonialism and modernism and Transformations examines Asia s new emerging utopias and urban aspirations The book claims that the histories and destinies of cities across various parts of Asia are far too enmeshed to unpack or oversimplify Avoiding the categorization of Asian cities exclusively by geographic location south east Middle East or the convenient tagging of the term Asian on selective regional parts of the continent it takes a broad intellectual view of the Asian urban landscape as a both and phenomenon as a series of diverse confluences geographic historic and political extending from the deserts of the Persian Gulf region to the Pearl River Delta Arguing for Asian cities to be taken seriously on their own terms this book represents Asia as a fount of extraordinary knowledge that can challenge our fundamental preconceptions of what cities are and ought to be

Gotham Edwin G. Burrows,Mike Wallace,1998-11-19 In Gotham winner of the 1999 Pulitzer Prize Edwin G Burrows and Mike Wallace have produced a monumental work of history one that ranges from the Indian tribes that settled in and around the island of Manna hata to the consolidation of the five boroughs into Greater New York in 1898 It is an epic narrative a story as vast and as varied as the city it chronicles and it underscores that the history of New York is the story of our nation

*Harper's New Monthly Magazine* ,1878 *Metropolitan Natures* Stephane Castonguay,Michele Dagenais,2011-07-30 One of the oldest metropolitan areas in North America Montreal has evolved from a remote fur trading post in New France into an international center for services and technology A city and an island located at the confluence of the Ottawa and St Lawrence Rivers it is uniquely situated to serve as an international port while also providing rail access to the Canadian interior The historic capital of the Province of Canada once Canada s foremost metropolis Montreal has a multifaceted cultural heritage drawn from European and North American influences Thanks to its rich past the city offers an ideal setting for the study of an evolving urban environment Metropolitan Natures presents original histories of the diverse environments

that constitute Montreal and its region. It explores the agricultural and industrial transformation of the metropolitan area, the interaction of city and hinterland, and the interplay of humans and nature. The fourteen chapters cover a wide range of issues from landscape representations during the colonial era to urban encroachments on the Kahnawake Mohawk reservation on the south shore of the island from the 1918-1920 Spanish flu epidemic and its ensuing human environmental modifications to the urban sprawl characteristic of North America during the postwar period. Situations that politicize the environment are discussed as well, including the economic and class dynamics of flood relief highways built to facilitate recreational access for the middle class, power generating facilities that invade pristine rural areas, and the elitist environmental hegemony of fox hunting. Additional chapters examine human attempts to control the urban environment through street planning, waterway construction, water supply, and sewerage.

**Cultural Complexes in Europe** Jörg Rasche, Thomas Singer, 2025-03-26. What is going on in Europe? The actual conflicts between its nations or states can be traced back to old and revived cultural complexes. In this book, first compiled in 2016, Jungian analysts explore the cultural identities of their European homelands and nations. This is a new approach to old questions: What makes a people feel at home? How do their traditions and narratives form a cultural Self and identity? How do they differ from one another? Exploring cultural complexes blends knowledge of history, economics, sociology, anthropology, geography, psychology, religious studies, literature, and poetry. But as every complex is built around an emotional core, the study of how cultural complexes live in the psyche is not limited to these disciplines. Each author and reader engages in a confrontation with their emotions, prejudices, and projections. The shape that the ideas and feelings of a cultural complex take in the psyche can be inchoate, rapidly shifting, and yet paradoxically long-standing and often quite immune and impermeable to the reason that traditional disciplines of thought would impose on them. These cultural complexes do not necessarily provide a coherent or linear sequencing of facts and events because that is not how they actually exist and function in the psyche of individuals and groups. At the same time, cultural complexes shape what it means to be a citizen of a particular city, region, or country of Europe. This remarkable book is an important read for Jungian analysts and those interested in Europe's historical and cultural development.
