Cities Of God The Religion Of The Italian Communes:

Cities of God Augustine Thompson, 2010-11-01 When religion is considered the subjects are usually saints heretics theologians and religious leaders thereby ignoring the vast majority of those who lived in the communes Drawing on many ecclesiastical and secular sources this book aims to give a voice to the majority orthodox lay people and those who ministered to them

Law, State and Religion in the New Europe Lorenzo Zucca, Camil Ungureanu, 2012-01-19 The return of religion to the public sphere raises various dilemmas Rights and values pluralism and identity justice and efficacy autonomy and tradition and integration and toleration cannot always be balanced without the loss of something valuable This volume of essays tackles such dilemmas from two perspectives To begin major contemporary theorists rethink the place of religion in the public sphere from republican liberal and critical theoretical viewpoints Contributors then bring together theory and practice to better conceptualize and assess the latest developments in European jurisprudence with respect to religion

Churchmen and Urban Government in Late Medieval Italy, c.1200-c.1450 Frances Andrews, Agata Pincelli, 2013-11-28 Major new study of secular religious boundaries and the role of the clergy in the administration of Italy's late medieval city states

A People's Church Agostino Paravicini Bagliani, Neslihan Şenocak, 2023-06-15 A People's Church brings together a distinguished international group of historians to provide a sweeping introduction to Christian religious life and institutions in medieval Italy Each essay treats a single theme as broadly as possible highlighting both the unique aspects of medieval Christianity on the Italian peninsula and the beliefs and practices it shared with other Christian societies Because of its long tradition of communal self governance Christianity in medieval Italy perhaps more than anywhere else was truly a people's church At the same time its exceptional urban wealth and literacy rates along with its rich and varied intellectual and artistic culture led to diverse forms of religious devotion and institutions Contributors Maria Pia Alberzoni on heresy Frances Andrews on urban religion Cécile Caby on monasticism Giovanna Casagrande on mendicants George Dameron on Florence Antonella Degl'Innocenti on saints Marina Gazzini on lay confraternities Maureen C Miller on bishops Agostino Paravicini Bagliani and Pietro Silanos on the papacy and Italian politics Antonio Rigo on clerical confraternities Neslihan Şenocak on the pievi and care of souls Giovanni Vitolo on Naples

Cities, Texts and Social Networks, 400-1500 Caroline Goodson, Anne E. Lester, Carol Symes, 2017-05-15 Cities Texts and Social Networks examines the experiences of urban life from late antiquity through the close of the fifteenth century in regions ranging from late Imperial Rome to Muslim Syria Iraq and al Andalus England the territories of medieval Francia Flanders the Low Countries Italy and Germany Together the volume's contributors move beyond attempts to define the city in purely legal economic or religious terms Instead they focus on modes of organisation representation and identity formation that shaped the ways urban spaces were called into being used and perceived Their interdisciplinary analyses place narrative and archival sources in communication with topography the built environment and evidence of sensory stimuli in order to capture sights sounds physical proximities and power

structures Paying close attention to the delineation of public and private spaces and secular and sacred precincts each chapter explores the workings of power and urban discourse and their effects on the making of meaning The volume as a whole engages theoretical discussions of urban space its production consumption memory and meaning which too frequently misrepresent the evidence of the Middle Ages It argues that the construction and use of medieval urban spaces could foster the emergence of medieval public spheres that were fundamental components and by products of pre modern urban life The resulting collection contributes to longstanding debates among historians while tackling fundamental questions regarding medieval society and the ways it is understood today Many of these questions will resonate with scholars of postcolonial or non Western cultures whose sources and cities have been similarly marginalized in discussions of urban space and experience And because these essays reflect a considerable geographical temporal and methodological scope they model approaches to the study of urban history that will interest a wide range of readers **Acta Periodica Duellatorum (vol. 2)**

fifth edition The Italian City Republics illustrates how from the eleventh century onwards many Italian towns achieved independence as political entities unhindered by any centralising power Until the fourteenth century when the regimes of individual tyrants took over in most towns these communes were the scene of a precocious and very well documented experiment in republican self government In this new edition Trevor Dean has expanded the book s treatment of women and gender the early history of the communes and the lives of non lites Focusing on the typical medium sized towns rather than the better known cities the authors draw on a rich variety of contemporary material both documentary and literary to portray the world of the communes illustrating the patriotism and public spirit as well as the equally characteristic factional strife which was to tear them apart Discussion of the artistic and social lives of the inhabitants shows how these towns were the seedbed of the cultural achievements of the early Renaissance The Bibliography has been updated to a list of Further Reading with the latest scholarship for students to continue their studies Both students and the general reader interested in Italian history literature and art will find this accessible book a rewarding and fascinating read **Women and Gender in**

Medieval Europe Margaret Schaus,2006 Publisher description **The Fruit of Liberty** Nicholas Scott Baker,2013-11-04

In the sixteenth century the city state of Florence failed In its place the Medicis created a principality becoming first dukes of Florence and then grand dukes of Tuscany The Fruit of Liberty analyzes the slow transformations that predated and facilitated the institutional shift from republic to principality from citizen to subject Fictive Orders and Feminine Religious Identities, 1200-1600 Alison More,2018 Any visitor to Belgium or the Netherlands is immediately struck by the number of convents and beguinages begijnhoven in both major cities and small towns Their number and location in urban centres suggests that the women who inhabited them once held a prominent role Despite leaving a visible mark on cities in Europe much of the story of these women known variously as beguines tertiaries klopjes recluses and anchoresses remains to be told Instead of aspiring to live as traditional religious they transcended normative assumptions about religion and gender and had a very real impact on their religious and secular worlds The sources for their tale are often fragmentary and difficult to interpret However careful scrutiny allows their voices to be heard Drawing on an array of sources including religious rules sermons hagiographic vitae and rapiaria *Fictive Orders and Feminine Religious Identities* traces the story of pious laywomen between the thirteenth and sixteenth centuries It both emphasizes the innovative roles of women who transcended established forms of institutional religious life and reveals the ways in which historiographical habits have obscured the dynamic and fluid nature of their histories By highlighting the development of irregular and extraregular communities and tracing the threads of monasticisation that wove their way around pious laywomen this book draws attention to the vibrant and dynamic culture of feminine lay piety that persisted from the later middle ages onwards *The Oxford Handbook of Religion and Europe* Grace Davie,Lucian Leuștean,2022 Features contributions from leading scholars providing crucial insight into the role of religious ideas structures and institutions in the making of Europe Introduces the building blocks of Europe's religious and the part that they played in the formation of the continent Explores the relationship between religious communities and ideologies in the twentieth century connections that play out very differently in East and West Europe Examines the role of religion in the construction of the European Union from the end of the Second World War until the present day Assesses the relationship between the major world religions and the idea of Europe Book jacket **The Transformation of the Laity in Bergamo, 1265-c.1400** Roisin Cossar,2006-07-01 This book examines the tension between social mores and religious activities among the laity in the Italian diocese of Bergamo during the later Middle Ages 1265 c 1400 Comparing the religious activities of lay men and women both rich and poor across a range of pious and ecclesiastical institutions including confraternities hospitals parishes and the diocese Roisin Cossar shows how the laity's access to these institutions increasingly came to depend on their gender and social status during the fourteenth century At the same time she argues that all lay people regardless of gender and social status viewed themselves as equal members of a lay ordo The book thus illuminates the complexity of late medieval religious culture as it simultaneously reflected and challenged secular social values The Making of Lay Religion in Southern France, c. 1000-1350 John H. Arnold,2024-03-20

What was Christianity like for ordinary people between the turn of the millennium and the coming of the Black Death? What changed and what continued in their experiences, habits, feelings, hopes, and fears? How did they know themselves to be Christians and indeed to be good Christians? This book answers those questions through a focus on one specific region, southern France, across a particularly fraught period of history, one beset by the changes wrought by the Gregorian reforms, the spectre of heresy, the violence of crusade, the coming of inquisition, and the pastoral revolution associated with the Fourth Lateran Council 1215. Using an array of different historical documents, John H. Arnold explores the material contexts of Christian worship from the eleventh through to the fourteenth centuries, the shifting episcopal expectations of the ordinary laity, the changes wrought through wider socioeconomic developments and periods of sharp inflection brought by the Albigensian crusade and its aftermath. Throughout the book, it explores the complex spectrum of lay piety, finding enthusiasms and doubts, faith and scepticism, agency and negotiation. It explores not just developments in the content of faith for the laity but the very dynamics of belief as a lived experience. We are shown how, across these key centuries, Christianity developed in its external practices but also via inculcating a more interiorized and affective mode of belief, and thus it is argued it can be said to have become truly a religion, a structured, demanding, and rewarding faith for the many and not just the few.

Ecologies and Economies in Medieval and Early Modern Europe, 2010-02-25 The field of premodern environmental history, the study of the complex and ever-changing interrelationship between human beings and the world around them prior to the Industrial Revolution, has grown vigorously over the past two decades in no small part due to the energy and expertise of Richard C. Hoffmann, York University, Canada. In this collection, historians of medieval and early modern Europe and social scientists with a sensitivity to the use of historical information present their current research in honor of Richard C. Hoffmann's retirement from teaching. The result is a panoramic and dynamic view of the state of the field of premodern environmental history by leading practitioners. The papers are organized under the broad themes of Premodern People and the Natural World and Aquatic Ecosystems and Human Economies. Contributors are Richard W. Unger, Paolo Squatriti, William Chester Jordan, Petra J. E. M. van Dam, Verena Winiwarter, Maryanne Kowaleski, Constance H. Berman, Pierre-Claude Reynard, Wim Van Neer, and Anton Ervynck.

Queen of Sorrows, Bianca M. Lopez, 2024-09-15 *Queen of Sorrows* takes an original approach to both late medieval Italian history and the history of Christianity using quantitative and qualitative analyses of a remarkable archive of 1,904 testaments to determine patterns in giving to the Virgin of Loreto shrine in the late fourteenth and early fifteenth centuries. Bianca M. Lopez argues that in central Italy, as elsewhere, the cult of the Virgin Mary gained new prominence at this time of unprecedented mortality. Individuals gave to Santa Maria di Loreto, which houses the structure in which Mary is believed to have lived, as an expression of their grief in the hope of strengthening family lineages beyond death and to care for loved ones believed to be languishing in purgatory. Lopez establishes statistical correlations between different social groups and their donations to Loreto over time, uncovering informative new historical patterns such as the prominence

of widow and migrant donors in the notarial record The testaments also provide a social history of Recanati revealing how its denizens venerated Mary as a saint with unrivaled spiritual power and uniquely sympathetic to grief having lost her own son Jesus In the fourteenth century plague survivors transformed their anguish into Marian devotion The devastation of the plague brought the Virgin out of noble courts and monasteries and onto city streets As Queen of Sorrows details however the popularity and growing wealth of Loreto's Marian shrine attracted the attention of the papacy and peninsular seigniorial lords who eventually brought Santa Maria di Loreto under the control of the Church

Monumental Sounds Matthew G. Shoaf, 2021-07-05 In *Monumental Sounds* Matthew G Shoaf examines interactions between sight and hearing in spectacular church decoration in Italy between 1260 and 1320 In this age of vision authorities concerns about whether and how worshipers listened to sacred speech spurred Giotto and other artists to reconfigure sacred stories to activate listening and ultimately bypass phenomenal experience for attitudes of inner receptivity New naturalistic styles served that work prompting viewers to give voice to depicted speech and guiding them toward spiritually fruitful auditory discipline This study reimagines narrative pictures as site specific extensions of a cultural system that made listening a meaningful practice Close reading of religious texts poetry and art historiography augments Shoaf's novel approach to pictorial naturalism and art's multisensorial dimensions This book has received the Weiss Brown Publication Subvention Award from the Newberry Library The award supports the publication of outstanding works of scholarship that cover European civilization before 1700 in the areas of music theater French or Italian literature or cultural studies

Exploring the Future of Christian Monasticisms Greg Peters, 2020-01-15 The institution of monasticism in the Christian Church is in general decline at least in so called first world nations Though there are many reasons for this monastic leaders are confronted by the reality of fewer communities monks and nuns nonetheless At the same time many younger Christians are rediscovering the rich heritage of the monastic tradition Though they themselves might not be called to join a traditional monastery they are eager to appropriate monastic practices in their own lives This had led to a movement known as the new monasticism or secular monasticism Despite lacking a unified vision and any central organization these new secular monastics are attempting in their own ways to carry on the tradition and practices of Christian monasticism As well there is a movement within historical Christian monasteries to pour new wine into old wineskins Traditional forms of monasticism are also generally flourishing in developing nations breathing new life into monasticism This volume looks at the current monastic landscape to assess where monasticism stands and to imagine ways in which it will grow in the future leading not only to a renewed Christian monasticism but to new monasticisms

The Turn to Transcendence Glenn W. Olsen, 2012-07-30 Phenomenal A must read for us who desire to topple the dictatorship of relativism and culture of death and replace it with the only alternative The Imaginative Conservative Especially concerned with the public nature of religion historian Glenn W Olsen author of *Christian Marriage A Historical Study* and *On the Road to Emmaus* The Catholic Dialogue with American and Modernity sets forth an exhaustively

researched and persuasive account of how religion has been reshaped in the modern period *The Turn to Transcendence* traces both the loss of transcendence and attempts to recover it while making its own proposals Neither reactionary nor modernist it questions how under conditions of modern life some form of the sacred and some form of the secular might both flourish at the same time But it also provides a warning that a religion unable to maintain itself with its own overt architecture language and calendars against an enveloping secular culture is destined for oblivion Glenn Olsen s book could hardly be more pivotal or insightful *Confronting the growing amnesia regarding culture s religious origin and transcendent purpose* Olsen proves both a masterful cartographer of modernity and a visionary of a culture that encourages and enables us to seek beyond ourselves Carl A Anderson *Supreme Knight of the Knights of Columbus* A brilliant book It rests on an amazing amount of scholarship that is wide ranging in history literature art science music theology and philosophy James Hitchcock professor of history St Louis University

The Making of Measure and the Promise of Sameness Emanuele Lugli, 2024-05-31 An interdisciplinary history of standardized measurements Measurement is all around us from the circumference of a pizza to the square footage of an apartment from the length of a newborn baby to the number of miles between neighboring towns Whether inches or miles centimeters or kilometers measures of distance stand at the very foundation of everything we do so much so that we take them for granted Yet this has not always been the case This book reaches back to medieval Italy to speak of a time when measurements were displayed in the open showing how such a deceptively simple innovation triggered a chain of cultural transformations whose consequences are visible today on a global scale Drawing from literary works and frescoes architectural surveys and legal compilations Emanuele Lugli offers a history of material practices widely overlooked by historians He argues that the public display of measurements in Italy s newly formed city republics not only laid the foundation for now centuries old practices of making but also helped to legitimize local governments and shore up church power buttressing fantasies of exactitude and certainty that linger to this day This ambitious truly interdisciplinary book explains how measurements rather than being mere descriptors of the real themselves work as powerful molds of ideas affecting our notions of what we consider similar accurate and truthful
