places in which they occur the spatial nature of political power Political Geography A Critical Introduction helps students understand how power is related to space place and territory illustrating how everyday life and the world of global conflict and nation states are inextricably intertwined This timely engaging textbook weaves critical postcolonial and feminist narratives throughout its exploration of key concepts in the discipline Accessible to students new to the field this text offers critical approaches to political geography including questions of gender sexuality race and difference and explains central political concepts such as citizenship security and territory in a geographic context Case studies incorporate methodologies that illustrate how political geographers perform research enabling students to develop a well rounded critical approach rather than merely focusing on results Chapters cover topics including the role of nationalism in shaping allegiances the spatial aspects of social movements and urban politics the relationship between international relations and security the effects of non human actors in politics and more Global in scope this book Highlights a diverse range of globally oriented issues such as global inequality that demonstrate the need for critical political geography Demonstrates how critiques of political geography intersect with decolonial feminist and queer movements Covers the Eurocentric origins of many of the discipline s key concepts Integrates advances in political geography theory and firsthand accounts of innovative research from rising scholars in the field Explores both intimate stories from everyday life and abstract concepts central to contemporary political geography Political Geography A Critical Introduction is an ideal resource for students in political and feminist geography as well as graduate students and researchers seeking an overview of the discipline

Asylum-Seeking, Migration and Church Revd Dr Susanna Snyder, 2012-11-01 Asylum Seeking Migration and Church addresses one of the most pressing issues confronting contemporary society How are we to engage with migrants Drawing on studies of church engagement with asylum seekers in the UK and critical immigration and refugee issues in North America Snyder presents an extended theological reflection on both the issue of asylum seeking and the fears of established populations surrounding immigration This book outlines ways in which churches are currently supporting asylum seekers encouraging closer engagement with people seen as other and more thoughtful responses to newcomers Creatively exploring biblical and theological traditions surrounding the stranger Snyder argues that as well as practising a vision of inclusive community churches would do well to engage with established population fears Trends in global migration and the dynamics of fear and hostility surrounding immigration are critically and creatively explored throughout the book Inviting more complex nuanced responses to asylum seekers and immigrants this book offers invaluable insights to those interested in Christian ethics practical theology social work mission and faith and social action as well as those working in the field of migration

Africa's Urban Revolution Doctor Edgar Pieterse, Susan Parnell, 2014-01-09 The facts of Africa s rapid urbanisation are startling By 2030 African cities will have grown by more than 350 million people and over half the continent s population will be urban Yet in the minds of policy makers scholars and much of the general public Africa remains a quintessentially rural

place This lack of awareness and robust analysis means it is difficult to make a policy case for a more overtly urban agenda As a result there is across the continent insufficient urgency directed to responding to the challenges and opportunities associated with the world s last major wave of urbanisation Drawing on the expertise of scholars and practitioners associated with the African Centre for Cities and utilising a diverse array of case studies Africa s Urban Revolution provides a comprehensive insight into the key issues demographic cultural political technical environmental and economic surrounding African urbanisation

Slow Urbicide Dorota Golańska,2022-11-22 The book presents a new materialist understanding of acts of deliberate destruction of the built environment and specifically of the politics of aggressive spatial containment and regularization of urbanity employed within the conflict in Israel Palestine Building on recent scholarship on slow violence and urbicidal policies it discusses the different dimensions of the violence against the urban space as well as exposes the complex material semiotic character of the urban territory and of its destruction By referring to the concepts of ethno territoriality and the right to the city the book aims to generate an enhanced understanding of problems situated at the overlap of urban studies and investigations of state sponsored violence focusing specifically on issues related to urban warfare Adopting a new materialist perspective the book is a searing examination of political violence in our times The volume will be of great interest to scholars and researchers of political science international relations cultural studies and urban studies It will also appeal to NGO professionals and activists across the world

Race and Environmental Justice in the Era of Climate Change and COVID-19 Tatiana Konrad,2025-08-01 Informed by transdisciplinary research in social and environmental justice *Race and Environmental Justice in the Era of Climate Change and COVID 19* is a contribution to the scholarly discourse as well as a form of activism for environmental climate and health justice Using race and Indigeneity as an analytical lens the book explores how justice in the era of climate change and COVID 19 is envisioned depicted and achieved With a focus largely on humans and environments its explorations of in justice illustrate the wide health and safety gaps between individuals communities and even nations living under different environmental conditions The volume also moves beyond the human toward justice for all beings This book foregrounds voices from world communities provides solutions to environmental and health crises and advances environmental justice

Urban Assemblages Ignacio Farías,Thomas Bender,2012-08-21 This book takes it as a given that the city is made of multiple partially localized assemblages built of heterogeneous networks spaces and practices The past century of urban studies has focused on various aspects space culture politics economy but these too often address each domain and the city itself as a bounded and cohesive entity The multiple and overlapping enactments that constitute urban life require a commensurate method of analysis that encompasses the human and non human aspects of cities from nature to socio technical networks to hybrid collectivities physical artefacts and historical legacies and the virtual or imagined city This book proposes and its various chapters offer demonstrations importing into urban studies a body of theories concepts and perspectives developed in the field of science and technology

studies STS and more specifically Actor Network Theory ANT The essays examine artefacts technical systems architectures place and eventful spaces the persistence of history imaginary and virtual elements of city life and the politics and ethical challenges of a mode of analysis that incorporates multiple actors as hybrid chains of causation The chapters are attentive to the multiple scales of both the object of analysis and the analysis itself The aim is more ambitious than the mere transfer of a fashionable template The authors embrace ANT critically as much as a metaphor as a method of analysis deploying it to think with to ask new questions to find the language to achieve more compelling descriptions of city life and of urban transformations By greatly extending the chain or network of causation proliferating heterogeneous agents non human as well as human without limit as to their enrolment in urban assemblages Actor Network Theory offers a way of addressing the particular complexity and openness characteristic of cities By enabling an escape from the reification of the city so common in social theory ANT's notion of hybrid assemblages offers richer framing of the reality of the city of urban experience that is responsive to contingency and complexity Therefore *Urban Assemblages* is a pertinent book for students practitioners and scholars as it aims to shift the parameters of urban studies and contribute a meaningful argument for the urban arena which will dominate the coming decades in government policies

Gendering Urban Space in the Middle East, South Asia, and Africa M. Rieker, K. Ali, 2008-05-26 The essays in this book critically examine the ways in which gendered subjects negotiate their life worlds in Middle Eastern South Asian and African urban landscapes They raise issues surrounding the city as a representative site of personal autonomy and political possibilities for women and or men

Fear, Space and Urban Planning Simone Tulumello, 2016-07-27 This book examines the phenomenon of urban fear the increasing anxiety over crime and violence in Western cities despite their high safety with a view to developing a comprehensive critical exploratory theory of fear space and urban planning that unravels the paradoxes of their mutual relations By focusing especially on the southern European cities of Palermo and Lisbon the book also aims to expand upon recent studies on urban geopolitics enriching them from the perspective of ordinary as opposed to global cities Readers will find enlightening analysis of the ways in which urban fear is re produced including by misinformative discourses on security and fear and the political construction of otherness as a means of exclusion The spatialization of fear e g through fortification privatization and fragmentation is explored and the ways in which urban planning is informed by and has in turn been shaping urban fear are investigated A concluding chapter considers divergent potential futures and makes a call for action The book will appeal to all with an interest in whether and to what extent the production of fearscape the contemporary landscapes of fear constitutes an emergent urban political economy

Augmented Urban Spaces Fiorella De Cindio, 2016-04-08 There have been numerous possible scenarios depicted on the impact of the internet on urban spaces Considering ubiquitous pervasive computing mobile wireless connectivity and the acceptance of the Internet as a non extraordinary part of our everyday lives mean that physical urban space is augmented and digital in itself This poses new problems as well as opportunities to those who have to

deal with it This book explores the intersection and articulation of physical and digital environments and the ways they can extend and reshape a spirit of place It considers this from three main perspectives the implications for the public sphere and urban public or semi public spaces the implications for community regeneration and empowerment and the dilemmas and challenges which the augmentation of space implies for urbanists Grounded with international real life case studies this is an up to date interdisciplinary and holistic overview of the relationships between cities communities and high technologies

The Radicals' City: Urban Environment, Polarisation, Cohesion Ralf Brand, Sara Fregonese, 2016-02-24 Bringing together comparative case studies from Belfast Beirut Amsterdam and Berlin this book examines the role of the urban environment in social polarisation processes In doing so it provides a timely and refreshingly innovative voice in the confusing babble on counter terrorism urban conflict and community cohesion Despite their socio political differences these cities are telling cases of how the location and shape of very mundane objects such as rubbish bins bridges clothes stores shopping malls and caf s in addition to the obvious fences walls and barbed wire are often subject to heated controversies and influence the way urban conflict is lived and practised Within a Science and Technology Studies STS theoretical framework the authors provide a systematic analysis of these four cities and provide many concrete and richly illustrated examples of material agency without losing sight of their specific historical political geographical and social conditions The STS angle permits some surprising yet extremely convincing conclusions which are of use not only for a range of practitioners but also to scholars interested in the social shaping processes and the consequences of urban artefacts The authors argue that although architecture and urban design is clearly not the sole cause of conflict and polarisation neither is it completely innocent Conversely it cannot be the silver bullet to solve related problems and to create community cohesion However the materiality of our cities must not be ignored in fact it can and should be enrolled in our efforts The book contains detailed descriptions of such positive cases as inspiration for practitioners as diverse as policy makers architects urban designers planners community workers consultants or police officers Research Handbook on International Law and Cities Aust, Helmut P., Nijman, Janne E., Marcenko, Miha, 2021-08-27 This groundbreaking Research Handbook provides a comprehensive analysis and assessment of the impact of international law on cities It sheds light on the growing global role of cities and makes the case for a renewed understanding of international law in the light of the urban turn **The Routledge Handbook of Architecture, Urban Space and Politics, Volume I** Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture

and urban space can unsettle the unquestioned construct of the spatial politics of governing. Considering both ongoing and unprecedented global problems from violence and urban warfare, the refugee crisis, borderization, detention camps, terrorist attacks to capitalist urbanization, inequity, social unrest, and climate change, this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics, architecture, and urban space. Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times. The operative and active political reading of space is disseminated through five thematics: Violence and War, Machines, Security and Borders, Race, Identity and Ideology, Spectacle and the Screen, and Mapping Landscapes and Big Data. This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics. This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities. Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution (CC BY) 4.0 license.

World Cities and Urban Form Mike Jenks, Daniel Kozak, Pattaranan Takkanon, 2013-12-02. This book presents new research and theory at the regional scale showing the forms metropolitan regions might take to achieve sustainability. At the city scale, the book presents case studies based on the latest research and practice from Europe, Asia, and North America, showing how both planning and flagship design can propel cities into world class status and also improve sustainability. The contributors explore the tension between polycentric and potentially sustainable development and urban fragmentation in a physical context but also in a wider cultural, social, and economic context.

Human Factors in Effective Counter-Terrorism Richard Warnes, 2024-02-29. This book seeks to provide a comparative assessment of the significance of human factors in effective counter terrorism. The phrase human factors is used to describe personal relationships, individual capabilities, effective leadership, technical interface, organisational culture, and the community engagement necessary to effectively minimise, counter, and control the threat of terrorism. Unlike many works in the field, this book is constructed around the input of experienced knowledge from over 170 semi-structured interviews of specialist military, policing, intelligence, and security practitioners, those actors actually involved in countering terrorism. These practitioners come from seven countries: the United Kingdom, Ireland, France, Spain, Israel, Turkey, and the United States, all of which have suffered over the years from different types of terrorist threat and responded with a mixture of counter terrorist measures. Where military practitioners also discussed overseas counter insurgency measures, that material has been included since terrorism forms a key aspect of such wider insurgencies. The resulting interview data was analysed through a variant of Grounded Theory to identify key emerging themes and issues, both positive and negative, relevant to human factors in the individual countries and more generically. This book incorporates the informed operational experiences and insights of the interviewees while seeking to provide examples of successful counter terrorist measures at the strategic, operational, and tactical levels. This book will be

of much interest to students of counter terrorism defence studies and security studies in general *Handbook of Urban Politics and Policy* Ronald K. Vogel, 2024-07-05 This authoritative Handbook provides a comprehensive overview of research into urban politics and policy in cities across the globe Leading scholars examine the position of urban politics within political science and analyse the critical approaches and interdisciplinary pressures that are broadening the field *Urban Theory Beyond the West* Tim Edensor, Mark Jayne, 2012-03-12 Since the late eighteenth century academic engagement with political economic social cultural and spatial changes in our cities has been dominated by theoretical frameworks crafted with reference to just a small number of cities in the Global North This volume seeks to redress that balance and focuses on theoretical engagements with cities beyond the West **Journal of Contemporary Urban Affairs Vol.4 No. 1., 2020**
